Journals of the AIAA

1971 Subject and Author Indexes

AIAA Journal
Journal of Spacecraft and Rockets
Journal of Aircraft
Journal of Hydronautics

A Publication of the American Institute of Aeronautics and Astronautics

1971

TECHNICAL EDITORS

AIAA JOURNAL

EDITOR-IN-CHIEF

GEORGE W. SUTTON
Avco Everett Research Laboratory

ASSOCIATE EDITORS

RICHARD H. BATTIN
MIT Instrumentation Laboratory
MITCHEL H. BERTRAM
NASA Langley Research Center
FRED E. CULICK
California Institute of Technology
EARL H. DOWELL
Princeton University
JOHN W. HUTCHINSON
Harvard University
JOSEPH KEMPNER
Polytechnic Institute of Brooklyn
CHARLES H. KRUGER
Stanford University
PAUL S. LYKOUDIS
Purdue University
STEPHEN H. MASLEN
Martin Marietta Corporation
DANIEL B. OLFE
University of California at San Diego
JOHN LEITH POTTER
ARO Inc.
HERBERT E. RAUCH
Lockheed Aircraft Corporation

JOURNAL OF SPACECRAFT AND ROCKETS

EDITOR-IN-CHIEF

RALPH R. RAGAN
The Charles Stark Draper Laboratory, MIT

ASSOCIATE EDITORS

KENN E. CLARK
Princeton University
DONALD C. FRASER
MIT Instrumentation Laboratory
FRANCIS W. FRENCH
Avco Everett Research Laboratory
LEONARD MEIROVITCH
Virginia Polytechnic Institute and State University
JOSEPH V. MULLIN
General Electric Company
YUSUF A. YOLER
The Boeing Company

JOURNAL OF AIRCRAFT

EDITOR-IN-CHIEF

CARL F. SCHMIDT
Aviation Consultant

ASSOCIATE EDITORS

HERBERT L. GODA
Institute for Defense Analyses
WILLIAM GREATHOUSE
Grumman Aerospace Corporation
J. E. DOUGHERTY Jr.
Federal Aviation Administration

JOURNAL OF HYDRONAUTICS

EDITOR-IN-CHIEF

JOHN P. BRESLIN
Stevens Institute of Technology

ASSOCIATE EDITORS

WINFIELD H. ARATA JR.
Northrop Corporation
LINCOLN D. CATHERS
Deep Submergence Systems Project

AIAA

AMERICAN INSTITUTE OF AERONAUTICS AND ASTRONAUTICS
1290 Avenue of the Americas, New York, N. Y. 10019
Area Code 212 581-4300

1971 OFFICERS*

President
MARTIN GOLAND (1971)

Treasurer
ROBERT W. RUMMEL (1972)

Vice-Presidents
Education: DAVID C. HAZEN (1972)
Publications: GORDON L. DUGGER (1972)
Section Affairs: FREDERICK L. BAGBY (1972)
Technical Activities: HOLT ASHLEY (1972)

1971 STAFF OFFICERS

Executive Secretary: JAMES J. HARFORD
Secretary: ROBERT R. DEXTER
Controller: JOSEPH J. MAITAN

1971 BOARD OF DIRECTORS*

Director—Technical:
MAC C. ADAMS (1972)
ROBERT C. COLLINS (1973)
EDGAR M. CORTRIGHT (1971)
A. SCOTT CROSSFIELD (1972)
JOHN C. EVVARD (1971)
MAYNARD L. PENNELL (1973)

Directors-at-Large:
OSCAR BAKKE (1971)
CHARLES W. HARPER (1971)
EDWARD H. HEINEMANN (1973)
CHRISTOPHER C. KRAFT, JR. (1972)
PAUL A. LIBBY (1973)
CARLOS C. WOOD (1972)

Directors—Regional:
J. EDWARD ANDERSON (1973)
HARVEY M. COOK (1971)
CHARLES W. DUFFY, JR. (1972)
EDWARD N. HALL (1971)
WALTER T. OLSON (1972)
ALAN Y. POPE (1973)

Director-Past President: RONALD SMELT (1971)

* Terms expire in year indicated.

1971 EDITORIAL STAFF

DIRECTOR OF SCIENTIFIC PUBLICATIONS
RUTH F. BRYANS

MANAGING EDITOR, SCIENTIFIC PUBLICATIONS
ANNE HUTH

ASSISTANT TO THE MANAGING EDITOR, SCIENTIFIC PUBLICATIONS
CAROL POPPENDIECK

JOURNAL COPY EDITORS
ELENA CARLES
SHERRY GOEDECKE
TERESA McLAUGHLIN
DOROTHY TISHER

Published by the American Institute of Aeronautics and Astronautics Inc. at 20th & Northampton Sts., Easton, Pa., 19042, U.S.A. Editorial Offices: 1290 Avenue of the Americas, New York. N. Y. 10019. Cable address: INSAERAST NEWYORK. West Coast Office: 9841 Airport Blvd., Los Angeles, Calif. 90045. European Office: 205 Regent St., London WIR 7DE, England. Price: Free for each journal subscription; additional copies, available from AIAA, 1290 Avenue of the Americas, New York, N. Y. 10019, $5.00 per copy.

April	41–76	October	109–156

SYN, SA, TN, EN, and TC indicate Synoptic, Survey Article, Technical Note, Engineering Note, and Technical Comment, respectively. The initials of the Journal in which the paper was published are in parentheses at the end of each entry. In the Subject Index, papers are listed chronologically with Synoptics first, followed by Survey papers, regular articles, Notes, and Comments.

LIST OF SUBJECT INDEX TOPIC TITLES

CONVENTIONAL AIRCRAFT TECHNOLOGY

Air Transportation Systems ... 4
Air Navigation, Communication, and Traffic Control Systems ... 4
General Aviation Systems (Including Ground Support) ... 4
Aircraft and Air Transportation Economics ... 4
Military Aircraft Missions ... 4
Aircraft Flight Operations ... 4
Aircraft Performance ... 4
Airplane and Component Aerodynamics ... 4
Aerodynamic and Powerplant Noise (Including Sonic Boom) ... 5
Aircraft Deceleration Systems ... 5
Aircraft Gust Loading and Wind Shear ... 5
Aircraft Powerplant Design and Installation ... 5
Aircraft Fuels and Fuel Systems ... 5
Aircraft Propulsion System Noise ... 5
Aircraft Rocket Applications ... 5
Aircraft Configuration Design ... 5
Aircraft Subsystem Design ... 5
Aircraft Structural Design (Including Loads) ... 6
Aircraft Structural Materials ... 6
Aircraft Vibration ... 6
Aircraft Fabrication ... 6
Aircraft Handling, Stability, and Control ... 6
Aircraft Landing Dynamics ... 6
Aircraft Testing ... 6
Aircraft and Component Wind Tunnel Testing ... 6
Aircraft Crew Training ... 6
Aircraft Cabin Environment and Life Support Systems ... 6

VTOL TECHNOLOGY

VTOL Missions and Transportation Systems ... 6
VTOL Flight Operations ... 6
VTOL Ground Support Systems ... 7
Rotary Wing Aerodynamics ... 7
VTOL Landing Dynamics ... 7
Ground (or Water-Surface) Effect Machines ... 7
VTOL Aircraft Design ... 7
VTOL Structural Design (Including Loads) ... 7
VTOL Vibration ... 7
VTOL Handling, Stability, and Control ... 7
VTOL Testing ... 7
VTOL Cabin Habitability and Design ... 7

LAUNCH VEHICLE AND MISSILE TECHNOLOGY

Launch Vehicle Systems (Including Ground Support) ... 7
Missile Systems ... 7
Sounding Rocket Systems ... 7
Launch Vehicle and Missile Trajectories ... 7
Launch Vehicle and Missile Mission Studies and Economics ... 7
Rocket Vehicle Aerodynamics ... 7
Rocket Vehicle Aerodynamic Heating ... 7
Rocket Vehicle Gust Loading and Wind Shear ... 7
Fuel and Propellant Storage, Transfer, and Control Systems ... 7
Launch Vehicle or Missile Propulsion System Integration ... 8
Launch Vehicle and Missile Configurational Design ... 8
Launch Vehicle and Missile Structural Design (Including Loads) ... 8
Launch Vehicle and Missile Fabrication ... 8
Launch Vehicle and Missile Subsystem Design ... 8
Uncontrolled Rocket and Missile Dynamics ... 8
Launch Vehicle and Controlled Missile Dynamics and Control ... 8
Launch Vehicle and Missile Guidance Systems (Including Command and Information Systems) ... 8
Tracking Systems ... 8
Launch Vehicle or Missile System and Component Ground Testing ... 8
Launch Vehicle or Missile Simulation ... 8
Launch Vehicle or Missile Flight Testing ... 8

SPACECRAFT TECHNOLOGY

Unmanned Lunar and Interplanetary Systems ... 8
Unmanned Earth Satellite Systems ... 8
Manned Lunar and Interplanetary Systems ... 8
Manned Space Station Systems ... 8
Entry Vehicles and Landers ... 9
Extraterrestrial Surface Transportation ... 9
Lunar and Planetary Trajectories ... 9
Earth-Orbital Trajectories ... 9
Spacecraft Mission Studies and Economics ... 9
Entry Vehicle Mission Studies and Flight Mechanics ... 9
Post-Entry Deceleration Systems and Flight Mechanics ... 9
Spacecraft Propulsion Systems Integration ... 9
Spacecraft Electric Power Systems ... 10
Spacecraft Temperature Control Systems ... 10
Spacecraft Configurational and Structural Design (Including Loads) ... 10
Meteoroid Protection Systems ... 10
Radiation Protection Systems ... 10
Spacecraft Attitude Dynamics and Control ... 10
Entry Vehicle Dynamics and Control ... 10
Spacecraft Communication Systems ... 11
Spacecraft Navigation, Guidance, and Flight-Path Control Systems ... 11
Spacecraft and Component Ground Testing and Simulation ... 11
Spacecraft Flight Testing ... 11
Re-Entry Vehicle Testing ... 11
Spacecraft Habitability and Life Support Systems ... 11
Space Medicine (Including Weightlessness, Radiation Effects, Psychology, etc.) ... 11
Spacecraft Sterilization ... 11
Extra-Vehicular Activity ... 11
Crew Training ... 11
Data Sensing and Presentation or Transmission Systems ... 11
Spacecraft Tracking ... 11

MARINE TECHNOLOGY

Surface Vessel Systems ... 11
Submerged Vessel Systems ... 11
Mining Systems ... 11
Vessel and Control Surface Hydrodynamics ... 11
Propulsion System Hydrodynamics ... 11
Undersea Acoustics ... 12
Marine Propulsion System Integration ... 12
Marine Electric Power Systems ... 12
Marine Vessel Design (Including Loads) ... 12
Corrosion/Erosion of Materials in Sea Water ... 12
Marine Vessel Vibration ... 12
Marine Vessel Trajectories, Stability, and Control ... 12
Undersea Navigation and Guidance ... 12
Undersea Communication ... 12
Marine Systems Testing ... 12
Undersea Extra-Vehicular Activity ... 12
Undersea Habitability and Life Support Systems ... 12
Undersea Medicine (Including Psychology, Pressure Effects, etc.) ... 12
Physical and Biological Oceanography ... 12
Sea Pollution Containment and Control ... 12

SUBJECT INDEX

CONVENTIONAL AIRCRAFT TECHNOLOGY

Air Transportation Systems

Operational constraints for STOL aircraft. R. K. Schaefer and K. R. Velten (JA) 643
Intercity V/STOL service and the businessman traveler. Alexis N. Sommers and Douglas C. Jeng (JA) 976
Turbulent skin friction for tapered wings. Richard Ross (JA,EN) 836

Air Navigation, Communication, and Traffic Control Systems

A comprehensive approach to design of the NF106B-VST model follower system. Harold H. Burke, Orrin C. Kaste, and Bartlett Wong (JA) 467
Seeking a new precision approach and landing system—A test of maturity. Siegbert B. Poritzky (JA) 538
Analysis of pilot warning indicator performance in terminal area traffic. J. Ray Ruetenik, William R. Lange, and John H. Thompson (JA) 905

General Aviation Systems (Including Ground Support)

Analysis of pilot warning indicator performance in terminal area traffic. J. Ray Ruetenik, William R. Lange, and John H. Thompson (JA) 905

Aircraft and Air Transportation Economics

Operational constraints for STOL aircraft. R. K. Schaefer and K. R. Velten (JA) 643
Comparative cost and capacity estimates of vertiports and airports, 1975–1985. Samuel Ewer Eastman (JA) 667

Military Aircraft Missions

Reduced-order modeling in aircraft mission analysis. Henry J. Kelley (AIAA J,TN) 349

Aircraft Flight Operations

A study of fog clearing using a CO_2 laser. G. J. Mullaney, W. H. Christiansen, and D. A. Russell (JA) 108
Operational constraints for STOL aircraft. R. K. Schaefer and K. R. Velten (JA) 643
Optimum mixing of inertial navigator and position fix data. Walter M. Hollister and Michel Claude Brayard (JA) 698
The pilot interface in area navigation. C. A. Fenwick and H. M. Schweighofer (JA) 862
Analysis of pilot warning indicator performance in terminal area traffic. J. Ray Ruetenik, William R. Lange, and John H. Thompson (JA) 905
Ratio of turbulent flight miles to total flight miles in the altitude range 45,000–65,000 ft. Edward V. Ashburn and David E. Waco (JA,EN) 127
Energy state approximation and minimum-fuel fixed-range trajectories. Nelson R. Zagalsky, Robert P. Irons Jr., and Robert L. Schultz (JA,EN) 488

Aircraft Performance

Improving the airplane efficiency by use of wing maneuver load alleviation. Roland J. White (JA) 769
Comparison of constant lift-coefficient climbs with flight-manual climbs for a jet transport. Federick Y. Thomasson and Gerald Cook (JA) 810
Advances in hypersonic exploration capability—Wind tunnel to flight Reynolds number. J. A. Penland and D. J. Romeo (JA) 881
Proposed STOL definition and field length criteria. R. K. Ransone (JA) 971

Airplane and Component Aerodynamics

Survey of viscous interactions associated with high Mach number flight. Robert H. Korkegi (AIAA J,SA) 771
Theoretical and experimental aerodynamics of the sailwing. Robert A. Ormiston (JA) 77
Transonic airfoil design. M. S. Cahn and J. R. Garcia (JA) 84
Vortex breakdown on slender sharp-edged wings. W. H. Wentz Jr. and D. L. Kohlman (JA) 156
An efficient, steady, subsonic collocation method for solving lifting-surface problems. Atlee M. Cunningham, Jr. (JA) 168
——Comments on "An efficient, steady, subsonic collocation method for solving lifting-surface problems." James D. Revell (JA,TC) 191
——Reply by author to J. D. Revell. A. M.Cunningham Jr. (JA,TC) 192
Predictions of vortex-lift characteristics by a leading-edge suction analogy. Edward C. Polhamus (JA) 193
Power-on channel wing aerodynamics. Edward F. Blick and Vincent Homer (JA) 234
Transonic flight and wind-tunnel buffet onset investigation of the F-8D aircraft. E. K. Damstrom and J. F. Mayes (JA) 263
Vortex wakes behind high-lift wings. J. E. Hackett and M. R. Evans (JA) 334
Expanding role of potential theory in supersonic aircraft design. E. Bonner (JA) 347
A comparison of methods for the analysis of wing-tail interaction flutter. William E. Triplett, Thomas H. Burkhart, and Edwin B. Birchfield (JA) 361
Approximate transfer functions for large aspect ratio wings in turbulent flow. L. T. Filotas (JA) 395
Application of finite-element theory to airplane configurations. R. G. Bradley and B. D. Miller (JA) 400
Application of the doublet-lattice method to nonplanar configurations in subsonic flow. T. P. Kalman, W. P. Rodden, and J. P. Giesing (JA) 406
A theory of the high-aspect-ratio jet flap. Keith P. Kerney (AIAA J) 431
Studies of engine-airframe integration on hypersonic aircraft. P. J. Johnston, J. M. Cubbage, and J. P. Weidner (JA) 495
Experimental investigation of incompressible flow past airfoils with oscillating jet flaps. John M. Simmons and Max F. Platzer (JA) 587
Testing of cylinders in sheared flow. Melvin H. Snyder Jr. (JA) 593
Slender-body aerodynamics for high-speed ground vehicles. Henry W. Woolard (JA) 597
Dynamic stability of a nonrigid parachute and payload system. Dean Wolf (JA) 603
Unsteady airfoil stall, review and extension. Lars E. Ericsson and J. Peter Reding (JA) 609
Some trim drag considerations for maneuvering aircraft. Linwood W. McKinney and Samuel M. Dollyhigh (JA) 623
Prediction of interference loading on aircraft stores at supersonic speeds. F. Dan Fernandes (JA) 633
A lifting-surface solution for vortex-induced airloads. Wayne Johnson (AIAA J) 689
Some considerations relative to the prediction of unsteady air loads on lifting configurations. Holt Ashley (JA) 747
Determination of F-4 aircraft transonic buffet characteristics. E. G. Hollingsworth and M. Cohen (JA) 757
Influence of the static and dynamic aerodynamic characteristics on the spinning motion of aircraft. William Bihrle Jr. (JA) 764
Jet aircraft air pollutant production and dispersion. John B. Heywood, James A. Fay, and Lawrence H. Linden (AIAA J) 841
The configuration of a cable towed in a circular path. Richard A. Skop and Young-il Choo (JA) 856
Prediction of installed nozzle flowfields. W. Press Jr., M. Konarski, and E. Grund (JA) 988
Aerodynamics of slender bodies and wing-body combinations at $M\infty = 1$. John R. Spreiter and Stephen S. Stahara (AIAA J) 1784
Vortex computation by the method of weighted residuals using exponentials. Hartmut H. Bossel (AIAA J) 2027
An explicit formula for additive drag of a supersonic conical inlet. Frank W. Barry (JA,EN) 279
Glide performance of advanced parawings. William C. Sleeman Jr. (JA,EN) 392
Added mass in roll of a four-finned configuration. Y. K. Chung (JA,EN) 394
Dynamic stall simulation problems. Lars E. Ericsson and J. Peter Reding (JA,EN) 579
Effect of air injection into the core of a trailing vortex. E. D. Poppleton (JA,EN) 672
Design data for a disk rotating in a rarefied environment. D. G. Barbee, T. Shih, and P. H. Newell Jr. (JA,EN) 674
Vortex flow over helicopter rotor tips. John D. Hoffman and Henry R. Velkoff (JA,EN) 739
A direct matrix method for the divergence problem. V. T. Nagaraj (JA,EN) 743
Lift and drag of a wing-cone configuration in hypersonic flow. Adolfo Reggiori (AIAA J,TN) 744
Downwash correction for a two-dimensional finite wing. Nathan Ness (JA,EN) 745
Solution of the lifting line equation for twisted elliptic wings. L. T. Filotas (JA,EN) 835
Convergence-proof of discrete-panel wing loading theories. John DeYoung (JA,EN) 837
Effect of unsteady pressure gradient reduction on dynamic stall delay. Franklin O. Carta (JA,EN) 839
Vortex velocity distributions at large downstream distances. Andrew H. Logan (JA,EN) 930
Determining aircraft stability coefficients from dynamic motions. S. M. Batill and C. W. Ingram (JA,EN) 932

XUM

Shock interaction effect on a flapped delta wing at M=8.2. Dhanvada Madhava Rao (AIAA J,TN) 985
Flowfield produced by trailing vortices in the vicinity of the ground. J. K. Harvey and F. J. Perry (AIAA J,TN) 1659
Alleviation of vortex-induced heating to the lee side of slender wings in hypersonic flow. Allen H. Whitehead Jr. and Mitchel H. Bertram (AIAA J,TN) 1870
Hypersonic lee-surface heating alleviation on delta wing by apex-drooping. Dhanvada Madhava Rao (AIAA J,TN) 1875
Delta wing shock shape at hypersonic speed. Dhanvada Madhava Rao (AIAA J,TN) 2093
Downwash-velocity potential method for lifting surfaces. John Kenneth Haviland (AIAA J,TN) 2268
A new area rule for hypersonic wing-bodies. N. Malmuth (AIAA J,TN) 2460
Comment on "Spanwise distribution of induced drag in subsonic flow by the vortex lattice method." G. J. Hancock (JA,TC) 681
——Reply by authors to G. J. Hancock. T. P. Kalman, J. P. Giesing, and W. P. Rodden (JA,TC) 681

Aerodynamic and Powerplant Noise (Including Sonic Boom)

Transmission and reflection of sound by a blade row. R. Amiet (AIAA J,SYN) 1893
Perspective of SST aircraft noise problem. I: Acoustic design considerations. G. S. Schairer, J. V. O'Keefe, and P. E. Johnson (JA) 19
——Perspective of SST aircraft noise problem. II: Thrust losses and installation factors. G. S. Schairer, J. V. O'Keefe, and P. E. Johnson (JA) 72
Engine compatibility programs for the supersonic transport propulsion system. J. B. Taylor (JA) 213
Aircraft noise abatement—The prospects for a quieter metropolitan environment. Robert L. Paullin and James F. Miller (JA) 444
Application of heat and force fields to sonic-boom minimization. David S. Miller and Harry W. Carlson (JA) 657
Reduction of noise from supersonic jet flows. Darshan S. Dosanjh, James C. Yu, and Amr N. Abdelhamid (AIAA J) 2346
Sonic boom reflection factors for flight near the threshold Mach number. Charles Thomas (JA,EN) 490
Sonic boom minimization including both front and rear shocks. A. R. George and R. Seebass (AIAA J,TN) 2091
Development of a sonic boom simulator with detonable gases. R. T. Strugielski, L. E. Fugelso, End W. J. Byrne (AIAA J,TN) 2266

Aircraft Deceleration Systems

Aerodynamic decelerators—An engineering review. William B. Pepper and Randall C. Maydew (JA,SA) 3
Flexibility as a model parachute performance parameter. H. G. Heinrich and Thomas R. Hektner (JA) 704
Ring buckling of inflated drag bodies. A. D. Topping (JA) 869
Stress analysis of parachutes using finite elements. William M. Mullins and Donald T. Reynolds (JSR) 1068
Wind-tunnel tests of small decelerator stabilizers. William B. Pepper and Harold N. Post (JA,EN) 120
Development of a gliding guided ribbon parachute for transonic speed deployment. William B. Pepper and Ira T. Holt (JA,EN) 281
Parachute critical opening velocity. Kenneth E. French (JA,EN) 675

Aircraft Gust Loading and Wind Shear

T-tail transport empennage loads in continuous atmospheric turbulence. H. M. Dodd Jr. and K. G. Pratt (JA) 616
Improving the airplane efficiency by use of wing maneuver load alleviation. Roland J. White (JA) 769
Flight investigation of the influence of turbulence on lateral-directional flying qualities. James A. Franklin (JA) 795
Response of flight vehicles to nonstationary atmospheric turbulence. L. J. Howell and Y. K. Lin (AIAA J) 2201
Optimal stochastic control and aircraft gust alleviation. Ronald A. Hess (JA,EN) 284
Acoustics: A new approach for monitoring the environment near airports. D. W. Beran (JA,EN) 934

Aircraft Powerplant Design and Installation

Status of the powered airplane. Frank E. Rom (JA) 26
Inlet vortex. J. L. Colehour and B. W. Farquhar (JA) 39
Evaluation of heat transfer for film-cooled turbine components. Darryl E. Metzger and Darrell D. Fletcher (JA) 33
——Comment on "Evaluation of heat transfer for film-cooled turbine components." E. R. G. Eckert, R. J. Goldstein, and D. R. Pedersen (JA,TC) 63
Engine compatibility programs for the supersonic transport propulsion system. J. B. Taylor (JA) 213
Inlet dynamics and compressor surge. Ronald A. Mays (JA) 219
Attenuation of inlet flow distortion upstream of axial flow compressors. G. M. Callahan and A. H. Stenning (JA) 227
Engine/inlet compatibility analysis procedure. J. L. Campbell and S. H. Ellis (JA) 301
Powered engine simulator procedures and experience for the DC-10 wing engine. H. R. Welge and J. R. Ongarato (JA) 523
Development of JT8D turbofan engine composite fan blades. S. A. Sattar, H. Stargardter, and D. G. Randall (JA) 648
Hypersonic research engine integated propulsion control. W. Curran and P. Stiglic (JA) 652
Dynamic performance characteristics of mixed and unmixed turbofan engines. Franz N. Fett (JA) 820
Calculation of supersonic compressor losses. W. R. Wells and W. Tabakoff (JA,EN) 282
Use of flow variable gradients in design calculations of inlets. Raymond Sedney (JA,EN) 487
Real gas effects in compressors for aircraft gas turbines. Allen E. Fuhs (JA,EN) 740

Aircraft Fuels and Fuel Systems

Endothermic fuels for hypersonic vehicles. H. Lander and A. C. Nixon (JA) 200

Aircraft Propulsion System Noise

Transmission and reflection of sound by a blade row. R. Amiet (AIAA J,SYN) 1893
Aircraft noise abatement—The propects for a quieter metropolitan environment. Robert L. Paullin and James F. Miller (JA) 444

Aircraft Rocket Applications

Aircraft Configuration Design

Aeronautical vehicles—1970 and beyond. Laurence K. Loftin Jr. (JA,SA) 939
Perspective of SST aircraft noise problem. I: Acoustic design considerations. G. G. Schairer, J. V. O'Keffe, and P. E. Johnson (JA) 19
——Perspective of SST aircraft noise problem. II: Thrust losses and installation factors. G. S. Schairer, J. V. O'Keefe, and P. E. Johnson (JA) 72
Status of the nuclear powered airplane. Frank E. Rom (JA) 26
Use of ground based simulators in aircraft design. P. G. Dillenschneider and A. W. Shaw (JA) 113
An all turbofan VTOL or STOL intercity transport. T. Gardner Hill (JA) 254
Design of a dual wide-angle visual cue simulator. J. L. Copeland, W. M., Kahlbaum Jr., L. E. Barker Jr., G. G. Steinmetz, and R. D. Grove (JA) 374
Air-breathing launch vehicle for Earth-orbit shuttle—New technology and development approach. J. R. Henry and C. H. McLellan (JA) 381
Application of finite-element theory to airplane configurations. R. G. Bradley and B. D. Miller (JA) 400
Effects of engine exhaust flow on boattail drag. Dave Bergman (JA) 434
A comprehensive approach to design of the NF106B-VST model follower system. Harold H. Burke, Orrin C. Kaste, and Bartlett Wong (JA) 467
Biotechnology problems relative to the space shuttle vehicle. Richard Carpenter (JA) 662
Analysis of parawing canopy behavior in free-flight depolyment. Dewey L. Clemmons Jr. (JA) 776
Boeing 737 engine gravel protection. Charles E. Loughney (JA) 792
Advances in hypersonic exploration capability—Wind tunnel to flight Reynolds number. J. A. Penland and D. J. Romeo (JA) 881
Added mass in roll of a four-finned configuration. Y. K. Chung (JA,EN) 394
Airplane economic design evaluation (AEDE) computerized model and its application. Howard D. Ramlow and Richard M. Thatcher (JA,EN) 576
Position of the thrust line and longitudinal stability. Amnon Katz (JA,EN) 738

Aircraft Subsystem Design

A simplified Kalman estimator for an aircraft landing display. Robert B. Merrick (JA) 44
Computer-aided wiring and cabling design as applied to aircraft avionics systems. W. J. Balchunas (JA) 50
Theories on the mechanics of tires and their applications to shimmy analysis. R. L. Collins (JA) 271
Avionics and ECM system integration on military aircraft. Salvatore Fucci and Peter Zuzolo (JA) 388
The pilot interface in area navigation. C. A. Fenwick and H. M. Schweighofer (JA) 862

A pilot-vehicle systems approach to longitudinal flight director design. D. T. McRuer, D. H. Weir, and R. H. Klein (JA) 890
C-5A man landing gear bogie pitching control. Herman S. D. Yang (JA) 912

Aircraft Structural Design (Including Loads)

Theories on the mechanics of tires and their applications to shimmy analysis. R. L. Collins (JA) 271
Advanced design concepts for buckling-critical composite shell structures. L. B. Greszczuk and R. J. Miller (JA) 367
Computer aided stabilator design including aeroelastic constraints. William E. Triplett and Klaus D. Ising (JA) 554
Minimum weight design of stiffened fiber composite cylinders. Thomas P. Kicher and Tung-Lai Chao (JA) 562
General instability of eccentrically stiffened cylindrical panels. George J. Simitses (JA) 569
T-tail transport empennage loads in continuous atmospheric turbulence. H. M. Dodd Jr. and K. G. Pratt (JA) 616
Application of fully stressed design procedures to wing and empennage structures. W. Lansing, W. Dwyer, R. Emerton, and E. Ranalli (JA) 683
Improving the airplane efficiency by use of wing maneuver load alleviation. Roland J. White (JA) 769
Boeing 737 engine gravel protection. Charles E. Loughney (JA) 792
Use of reinforced epoxy models to design and analyze aircraft structures. E. I. Riegner and A. E. Scotese (JA) 813
Stress concentration factors for bonded lap joints. Gary R. Wooley and Dale R. Carver (JA) 817
Minimum weight web-core sandwich panels subjected to uniaxial compression. Jack R. Vinson and Sidney Shore (JA) 843
Fracture behavior of surface-cracked tension elements. Charles E. Feddersen (AIAA J) 2309
Center deflections of square plates with elastic edge beams. James Ting-Shun Wang (JA,EN) 286

Aircraft Structural Materials

Minimum weight web-core sandwich panels subjected to uniaxial compression. Jack R. Vinson and Sidney Shore (JA) 843
Composite airframe design. D. G. Whinery, K. I. Clayton, and C. Tanis (JA) 924

Aircraft Vibration

Transonic flight and wind-tunnel buffet onset investigation of the F-8D aircraft. E. K. Damstrom and J. F. Mayes (JA) 263
Synthesis of tire equations for use in shimmy and other dynamic studies. L. C. Rogers and H. K. Brewer (JA) 689
Jet noise excitation of an integrally stiffened panel. Mervyn D. Olson and Garry M. Lindberg (JA) 847
Response of flight vehicles to nonstationary atmospheric turbulence. L. J. Howell and Y. K. Lin (AIAA J) 2201

Aircraft Fabrication

Aircraft Handling, Stability, and Control

Aircraft elastic mode control. Robert L. Swaim (JA,SA) 65
Approach guidance to circular flight paths. F. H. Kishi and I, Pfeffer (JA) 89
Optimum horizontal guidance techniques for aircraft. Heinz Erzberger and Homer Q. Lee (JA) 95
Constrained gain problem and its application to aircraft control systems. S. J. Asseo (JA) 241
An approach to the determination of aircraft handling qualities using pilot transfer functions. James J. Adams and Howard B. Hatch Jr. (JA) 319
Summary and interpretation of recent longitudinal flying qualities results. I. L. Ashkenas (JA) 324
Approach flying qualities—Another chapter. Ralph C. A'Harrah and Jerry L. Lockenour (JA) 329
An in-flight investigation of bank-angle control parameters for cruising flight. G. Warren Hall (JA) 341
Effect of visual threshold on aircraft control. A. G. Barnes (JA) 450
A comprehensive approach to design of the NF106B-VST model follower system. Harold H. Burke, Orrin C. Kaste, and Bartlett Wong (JA) 467
Effects of leading-edge vortex flow on the roll damping of slender wings. Richmond P. Boyden (JA) 543
Recent experience with techniques for prediction of spin characteristics of fighter aircraft. Joseph R. Chambers and James S. Bowman Jr. (JA) 548
Flight investigation of the influence of turbulence on lateral-directional flying qualities. James A. Franklin (JA) 795
Influence of bobweights on pilot-induced oscillations. T. Peter Neal (JA) 732
A flying qualities criterion for the design of fighter flight-control systems. T. Peter Neal and Rogers E. Smith (JA) 803
Comparison of constant lift-coefficient climbs with flight-manual climbs for a jet transport. Federick Y. Thomasson and Gerald Cook (JA) 810
Measurement and analysis if pilot scanning behavior during simulated instrument approaches. David H. Weir and Richard H. Klein (JA) 897
Requirements in simulators used in handling qualities research. J. T. Gallagher (JA) 917
A self-organizing adaptive aircraft control system. H. M. Richarde Jr. and E. R. Rang (JA) 967
Control surface pumping—A pilot's technique for controlling the flight path precisely. William Bihrle Jr. (JA,EN) 56
Optimal stochastic control and aircraft gust alleviation. Ronald A. Hess (JA,EN) 284
A nonvarying-C* control scheme for aircraft. Edward R. Rang (JA,EN) 679
Position of the thrust line and longitudinal stability. Amnon Katz (JA,EN) 738
Determining aircraft stability coefficients from dynamic motions. S. M. Batill and C. W. Ingram (JA,EN) 932

Aircraft Landing Dynamics

Effect of visual threshold on aircraft control. A. G. Barnes (JA) 450
A pilot-vehicle systems approach to longitudinal flight director design. D. T. McRuer, D. H. Weir, and R. H. Klein (JA) 890
A system model for low-level approach. W. A. Johnson and D. T. McRuer (JA) 983

Aircraft Testing

DC-10 test program effectiveness. Arthur Torosian and James F. Murray (JA) 529
Determination of F-4 aircraft transonic buffet characteristics. E. G. Hollingsworth and M. Cohen (JA) 757
Analysis of parawing canopy behavior in free-flight deployment. Dewey L. Clemmons Jr. (JA) 776

Aircraft and Component Wind Tunnel Testing

Wind-tunnel boundary interference on a V/STOL model. Ching-Fang Lo (JA) 162
Development of high-response data analysis AIDS for inlet-engine testing. Malcolm Rowe and Mark B. Sussman (JA) 307
Designing jet aircraft wind-tunnel test programs with propulsion system simulation. James L. Grunnet (JA) 421
Powered engine simulator procedures and experience for the DC-10 wing engine. H. R. Welge and J. R. Ongarato (JA) 523
Recent experience with techniques for prediction of spin characteristics of fighter aircraft. Joseph R. Chambers and James S. Bowman Jr. (JA) 548
Advances in hypersonic exploration capability—Wind tunnel to flight Reynolds number. J. A. Penland and D. J. Romeo (JA) 881
Separation and reattachment in transonic airfoil flow. E. Stanewsky and B. H. Little (JA) 952
Wind-tunnel systems and techniques for aircraft/stores compatibility studies. S. B. Moore (JA) 1000
A new economic flexible nozzle for supersonic wind tunnels. Siegfried F. Erdmann (JA,EN) 58
Flowfield produced by trailing vortices in the vicinity of the ground. J. K. Harvey and F. J. Perry (AIAA J,TN) 1659

Aircraft Crew Training

Aircraft Cabin Environment and Life Support Systems

Biotechnology problems relative to the space shuttle vehicle. Richard Carpenter (JA) 662

VTOL TECHNOLOGY

VTOL Missions and Transportation Systems

An all turbofan VTOL or STOL intercity transport. T. Gardner Hill (JA) 254
Comparative cost and capacity estimates of vertiports and airports, 1975-1985. Samuel Ewer Eastman (JA) 667

VTOL Flight Operations

Optimal takeoff trajectories of a heavily loaded helicopter. Frederic H. Schmitz (JA) 717
A fluidic low-speed air-speed indicator. Richard J. Miner (JA) 789

XUM

VTOL Ground Support Systems

Rotary Wing Aerodynamics

Boundary-layer discontinuity on a helicopter rotor blade in hovering. Henry R. Velkoff, Dwight A. Blaser, and Kenneth M. Jones (JA) 101
Tip vortex effects on oscillating rotor blades in hovering flight. W. P. Jones and B. M. Rao (AIAA J) 106
Parameter variation—An insight to V/STOL design. Arthur G. Jones (JA) 629
Optimal takeoff trajectories of a heavily loaded helicopter. Frederic H. Schmitz (JA) 717
Airfoils in two-dimensional nonuniformly sheared slipstreams. G. R. Ludwig and J. C. Erickson Jr. (JA) 874
A two-dimensional theory for rotor blade flutter in forward flight. K. W. Shipman and E. R. Wood (JA) 1008
Crossflow and unsteady boundary-layer effects on rotating blades. H. A. Dwyer and W. J. McCroskey (AIAA J) 1498
Vortex flow over helicopter rotor tips. John D. Hoffman and Henry R. Velkoff (JA,EN) 739
Errata: "Compressibility effects on oscillating rotor blades in hovering flight." W. P. Jones and B. M. Rao (AIAA J,TC) 1664

VTOL Landing Dynamics

Ground (or Water-Surface) Effect Machines

Hover and forward speed aerodynamics of several tracked air-cushion vehicle models. Henry W. Woolard, Kwan L. So, and Richard J. Sergeant (JA) 473

VTOL Aircraft Design

An all turbofan VTOL or STOL intercity transport. T. Gardner Hill (JA) 254
Optimizing the propulsion/lift system for turbofan STOL aircraft. H. T. Bowling, C. H. Hurkamp, and R. M. Thornton (JA) 427
——Comment on "Optimizing the propulsion/lift system for turbofan STOL aircraft. James T. Pyle (JA,TC) 1034
——Reply by author to J. T. Pyle. H. T. Bowling (JA,TC) 1034
Parameter variation—An insight to V/STOL design. Arthur G. Jones (JA) 629
Simulator investigation of the VTOL transport. D. K. Mendela (JA) 783

VTOL Structural Design (Including Loads)

A two-dimensional theory for rotor blade flutter in forward flight. K. W. Shipman and E. R. Wood (JA) 1008
Coriolis coupled bending vibrations of hingeless helicopter rotor blades. Maurice I. Young (JA,EN) 676

VTOL Vibration

Stochastic properties of turbulence excited rotor blade vibrations. Gopal H. Gaonkar and Kurt H. Hohenemser (AIAA J) 419

VTOL Handling, Stability, and Control

Jet flap diffuser: A new thrust amplifying device. Jean-Pierre Morel and Peter B. S. Lissaman (JA) 491
Automatic guidance concept for VTOL aircraft. W. C. Hoffman, J. Zvara, A. E. Bryson Jr., and N. D. Ham (JA) 637
Simulator investigation of the VTOL transport. D. K. Mendela (JA) 783
Comment on "Minimum control power for VTOL aircraft stability augmentation." H. C. Curtiss Jr. (JA,TC) 288
——Reply by author to H. C. Curtiss, Jr. Robert L. Swaim (JA,TC) 288

VTOL Testing

Advantage of testing aircraft rotor models with sharply deflected wakes in water. Theodore R. Goodman and August F. Lehman (JA,EN) 585

VTOL Cabin Habitability and Design

LAUNCH VEHICLE AND MISSILE TECHNOLOGY

Launch Vehicle Systems (Including Ground Support)

Airbreathing launch vehicle for Earth orbit shuttle—Performance and operation. T. J. Gregory, L. J. Williams, and D. E. Wilcox (JA) 724
Churchill research range auroral launcher facility. J. A. Tarzwell (JSR,EN) 908
Rapid technique for thermal analysis of PCB modules. Thomas M. Zappula (JSR,EN) 1160

Missile Systems

High-g resistant electronic fuse for projectile payloads. William H. Mermagen (JSR,EN) 900

Sounding Rocket Systems

A study of the magnus effects on a sounding rocket at supersonic speeds. James C. Uselton and Jack B. Carman (JSR) 28
Plasma generator for space vehicle neutralization. H. J. King and Seiji Kami (JSR) 1048
Astrobee D: An advanced technology meteorological rocket vehicle. R. B. Jenkins, J. P. Taylor, T. P. Browne, and L. A. Briggs (JSR,EN) 895
Impulse trajectory correction by the "Cassiopee" system. M. Bismut, J. Bouttes, and J. Fave (JSR,EN) 906
Low-cost molded plastic sounding rocket motors. James C. Ward Jr. (JSR,EN) 1083
Roughness effects on heat transfer in the supersonic region of a conical nozzle. Meyer Reshotko (JSR,EN) 1097

Launch Vehicle and Missile Trajectories

Air-to-air missile trajectories for maximization of launch range. Gerald M. Anderson and George W. Watt (JSR) 747
Performance and flight characteristics of the sandhawk family of rocket systems. Gerald G. Wilson and William A. Millard (JSR) 783
Optimum launch trajectories for the ATS-E mission. Omer F. Spurlock and Fred Teren (JSR) 1202
Reduction of launch vehicle injection errors by trajectory shaping. Richard Rosenbaum (AIAA J) 1228
Impulse trajectory correction by the "Cassiopee" system. M. Bismut, J. Bouttes, and J. Fave (JSR,EN) 906
Rapid technique for thermal analysis of PCB modules. Thomas M. Zappula (JSR,EN) 1160

Launch Vehicle and Missile Mission Studies and Economics

Performance and flight characteristics of the sandhawk family of rocket systems. Gerald G. Wilson and William A. Millard (JSR) 783
Space interceptors: An investigation of seven main parameters. Robert Salkeld (JSR,EN) 541

Rocket Vehicle Aerodynamics

Hypersonic characteristics of sharp cones at angles of attack. Benjamin Diamant and Paul K. Chang (JSR,SYN) 1105
Control jet interaction investigation. Bob G. Gilman (JSR) 334
Missile aerodynamic predictions to 180°. Millard L. Howard, Eugene N. Brooks Jr., and Bernard F. Saffell Jr. (JSR) 488
Comparison of free-flight experimental results with theory on the nonlinear aerodynamic effects of bluntness for slender cones at Mach Number 17. Gerald N. Malcolm and John V. Rakich (AIAA J) 473
Analytic difficulties in predicting dynamic effects of separated flow. Lars E. Ericsson, J. Peter Reding, and Rolf A. Guenther (JSR) 872
Aerodynamic design of a land speed record car. T. P. Torda and Thomas A. Morel (JA) 1029
An analysis of plume-induced boundary-layer separation. Michael C. Fong (JSR) 1107
Aerodynamics of finned missiles at high angle of attack. William L. Oberkampf and John D. Nicolaides (AIAA J) 2378
Flight measurement of aerodynamic coefficients on a bomb. Neil Edmund Gilbert (JSR,EN) 186
Nonlinear aerodynamic characteristics of sounding rockets. John D. Nicolaides, Charles W. Ingram, and David D. Tarkowski (JSR,EN) 1158
Ablation surface cross-hatching on cones in hypersonic flow. E. P. Williams and G. R. Inger (AIAA J,TN) 2077
Nonaffine similarity laws for power-law bodies. Howard Jaslow (AIAA J,TN) 2466

Rocket Vehicle Aerodynamic Heating

Practical methods for predicting aerodynamic heating effects on sounding rockets. L. D. Wing (JSR) 1114

Rocket Vehicle Gust Loading and Wind Shear

Fuel and Propellant Storage, Transfer, and Control Systems

A survey of current developments in surface tension devices for propellant

acquisition. S. C. De Brock, R. K. Grove, R. O. Sloma, D. L. Balzer, Yvonee Brill, and G. A. Yankura (JSR,SA) 83
Design and development of a fluidic chamber pressure control subsystem for the NERVA engine. J. J. Carroll, G. W. Felsing, J. D. Mockenhaupt, E. A. Sheridan, and W. S. Lewellen (JSR) 966

Launch Vehicle or Missile Propulsion System Integration

Ullage mixing effects on tank pressurization performance. D. W. Kendle (JSR,EN) 990
Quenching of solid-propellant rockets by water injection. Leon D. Strand and Walter Gerber (JSR,EN) 992

Launch Vehicle and Missile Configurational Design

Dynamic analysis of a flexible vehicle moving along a flexible support. David A. Hunt (JSR) 665
Airbreathing launch vehicle for Earth orbit shuttle—Performance and operation. T. J. Gregory, L. J. Williams, and D. E. Wilcox (JA) 724
A multivortex method for axisymmetric bodies at angle of attack. Silvio B. Angelucci (JA) 959
Vacuum-tube launchers and boosters. L. D. Duncan and W. L. Vechione (JSR,EN) 679
Impulse trajectory correction by the "Cassiopee" system. M. Bismut, J. Bouttes, and J. Fave (JSR,EN) 906
Nonaffine similarity laws for power-law bodies. Howard Jaslow (AIAA J,TN) 2466

Launch Vehicle and Missile Structural Design (Including Loads)

Fracture behavior of surface-cracked tension elements. Charles E. Feddersen (AIAA J) 2309

Launch Vehicle and Missile Fabrication

Maximal plastic deformation of semi-infinite rods. W. C. Sweatt and W. J. Stronge (AIAA J,TN) 2069

Launch Vehicle and Missile Subsystem Design

High-g resistant electronic fuse for projectile payloads. William H. Mermagen (JSR,EN) 900

Uncontrolled Rocket and Missile Dynamics

Nonlinear motion of a missile with slight configurational asymmetrics. Charles H. Murphy (JSR) 259
Resonance instability for finned configurations having nonlinear aerodynamic properties. Thomas A. Clare (JSR) 278
Measurements of the dynamical behavior of projectiles over long flight paths. William H. Mermagen (JSR) 380
Instability of optimal stochastic control systems under parameter variations. Jason L. Speyer (AIAA J) 382
Gravity-induced angular motion of a spinning missile. Charles H. Murphy (JSR) 824
Response of an asymmetric missile to spin varying through resonance. Charles H. Murphy (AIAA J) 2197
Aerodynamics of finned missiles at high angle of attack. William L. Oberkampf and John D. Nicolaides (AIAA J) 2378
Flight measurement of aerodynamic coefficients on a bomb. Neil Edmund Gilbert (JSR,EN) 186
Impulse trajectory correction by the "Cassiopee" system. M. Bismut, J. Bouttes, and J. Fave (JSR,EN) 906
Nonlinear aerodynamic characteristics of sounding rockets. John D. Nicolaides, Charles W. Ingram, and David D. Tarkowski (JSR,EN) 1158

Launch Vehicle and Controlled Missile Dynamics and Control

Space interceptors: An investigation of seven main parameters. Robert Salkeld (JSR,EN) 541

Launch Vehicle and Missile Guidance Systems (Including Command and Information Systems)

Homing radar tracking accuracy improvement with frequency diversity. P. Jones, E. A. Mickle, and G. D. Swetnam (JSR) 983
Nonlinear proportional navigation and the minimum time-to-turn. A. G. Rawling (JSR,EN) 198
Rapid technique for thermal analysis of PCB modules. Thomas M. Zappula (JSR,EN) 1160
Optimal intercept guidance for short-range tactical missiles. Ronald G. Cottrell (AIAA J,TN) 1414

Tracking Systems

Homing radar tracking accuracy improvement with frequency diversity. P. Jones, E. A. Mickle, and G. D. Swetnam (JSR) 983

Launch Vehicle or Missile System and Component Ground Testing

A 12 Mw, 200 atm arc heater for re-entry testing. James H. Painter and Ronald J. Ehmsen (AIAA J, SYN) 2307
An improved method for accelerometer precision centrifuge test data reduction. Theodore C. Maier (JSR,EN) 686

Launch Vehicle or Missile Simulation

Launch Vehicle or Missile Flight Testing

SPACECRAFT TECHNOLOGY

Unmanned Lunar and Interplanetary Systems

Mars and Venus orbiter spacecraft electric propulsion systems. J. H. Molitor and K. J. Russell (JSR) 506
Nuclear shuttle for interorbital and transplanetary applications. Kurt P. Johnson and Richard J. Holl (JSR) 600
Heating environment and protection during Jupiter entry. Michael E. Tauber and Roy M. Wakefield (JSR) 630
A Jupiter orbiter mechanics experiment. Charles K. Paul (JSR) 751
Solar array degradation due to meteoroid impacts during extended planetary missions. A. J. Richardson and J. W. Warren (JSR,EN) 681

Unmanned Earth Satellite Systems

Magnetic compensation of a gravity-gradient stabilized satellite. D. L. Klinger, M. G. Lyons, E. D. Scott, and J. J. Rodden (JSR) 435
A magnetic attitude control system for an axisymmetric spinning spacecraft. John A. Sorensen (JSR) 441
Semipassive and active nutation dampers for dual-spin spacecraft. D. L. Mingori, J. A. Harrison, and G. T. Tseng (JSR) 448
Attitude stabilization of synchronous communications satellites employing narrow-beam antennas. H. J. Dougherty, K. L. Lebsock, and J. J. Rodden (JSR) 834
Supply and resupply of stations in synchronous orbit. Duane W. Dugen (JSR,EN) 430

Manned Lunar and Interplanetary Systems

Stochastic crew motion modeling. T. C. Hendricks and C. H. Johnson (JSR) 150
Early manned exploration of the planets. Richard R. Titus (JSR) 517
Nuclear shuttle for interorbital and transplanetary applications. Kurt P. Johnson and Richard J. Holl (JSR) 600
An experimental study on the visual detection of stars in a spacecraft environment. R. P. Heinisch (JSR) 852
Design of an astronaut-operated, lunar-surface, antenna-aiming mechanism. N. S. Ajlouny and A. R. Spencer (JSR,SYN) 1009
Lunar escape-to-orbit systems simulation (LESS) using simplified manual control. Dvaid B. Middleton and George J. Hurt Jr. (JSR) 1011
Unmanned lunar logistics vehicle may support the astronauts. Frank J. Hendel (JSR,EN) 428
Integrated electronics for the space shuttle. R. E. Lewis and R. A. Gardiner (JSR,EN) 555
Chemical nonequilibrium boundary-layer effects on a simulated space shuttle configuration during re-entry. John C. Adams Jr. (JSR,EN) 683

Manned Space Station Systems

Space station design and operation. T. D. Smith and D. E. Charhut (JSR) 593
Space station orbit selection. David E. Davin (JSR) 759
A movable-mass attitude-stabilization system for artificial-g space stations. Dara W Childs (JSR) 829
An experimental study on the visual detection of stars in a spacecraft environment. R. P. Heinisch (JSR) 852
Space station requirements and utilization. R. E. Greer and C. W. Roberts (JSR) 958

XUM

Supply and resupply of stations in synchronous orbit. Duane W. Dugan (JSR,EN) 430

Entry Vehicles and Landers

Planetary entry body heating rate measurements in air and Venus atmospheric gas up to T15,000°K. F. R. Livingston and J. W. Willard (AIAA J) 485
Dynamic stability tests of spinning entry bodies in the terminal regime. Peter Jaffe (JSR) 575
Re-entry capsule dynamics. Lars E. Ericsson and J. Peter Reding (JSR) 579
Analysis of parawing canopy behavior in free-flight depolyment. Dewey L. Clemmons Jr. (JA) 776
Landing impact protection through a hybrid attenuation system. E. J. Merz, J. A. Burnes, and S. R. McClure (JSR) 879
Free fall stability and base pressure drop tests for planetary entry configurations. J. M. Cassanto and P. Buce (JSR,EN) 790
Summary of the NASA-SRI Round Robin Ablation Program. N. K. Hiester, C. F. Clark, and N. S. Vojvodich (JSR,EN) 886
Full-scale flight test base pressure results for a blunt planetary entry probe configuration. J. M. Cassanto (JSR,EN) 996
Measurements of shock wave location in hypersonic nitrogen flow. Mervin E. Hillard Jr., William D. Harvey, and M. Lawrence Emory (JSR,EN) 1004
Monte Carlo simulation of the Apollo Command Module land landing. H. B. Chenoweth (JSR,EN) 1074
Ablation surface cross-hatching on cones in hypersonic flow. E. P. Williams and G. R. Inger (AIAA J,TN) 2077

Extraterrestrial Surface Transportation

A proposed obstacle sensor for a Mars rover. William L. Kuriger (JSR) 1043

Lunar and Planetary Trajectories

Normalized hodographic mapping for constrained trajectory families. Fang Toh Sun (AIAA J) 223
Early manned exploration of the planets. Richard R. Titus (JSR) 517
Prediction of Apollo service module motion after jettison. D. H. Merchant, R. M. Gates, and J. F. Murray (JSR) 587
Solar electric propulsion asteroid belt mission. L. E. Schwaiger, J. M. Shollenberger Jr., J. H. Molitor, and D. MacPherson (JSR) 612
A Jupiter orbiter mechanics experiment. Charles K. Paul (JSR) 751
Trajectory requirements for Comet rendezvous. Alan L. Friedlander, John C. Niehoff, and John I. Walters (JSR) 858
A method of orbit determination using overlapping television pictures. J. K. Campbell (JSR) 867
Optimal interplanetary trajectories for chemically propelled spacecraft. George A. Hazelrigg Jr. (JSR) 915
Precision targeting for multiple swingby interplanetary trajectories. Stephen Bayliss (JSR) 927
Analysis of Mariner VII pre-encounter anomaly. H. J. Gordon, S. K. Wong, and V. J. Ondrasik (JSR) 931
Periodic swing-by orbits connecting Earth and Mars. Charles S. Rall and Walter M. Hollister (JSR) 1017
Touring the Galilean satellites. John C. Niehoff (JSR) 1021
Some three-body numerical solutions for low-thrust orbiter missions. John S. MacKay and Alfred C. Mascy (JSR) 1143
Utilization of Jupiter swingby trajectories for Comet exploration. Larry A. Manning (JSR) 1152
Analytical investigation of near-parabolic lunar trajectories between Moon and cislunar libration point. William B. Blair (AIAA J) 2437
Rendezvous equations in the vicinity of the second libration point. R. B. Gerding (JSR,EN) 292
A computer survey of impulsive ellipse-ellipse transfer. H. Gardner Moyer (AIAA J,TN) 321
Approximate analytic modeling of a ballistic aerobraking planetary capture. T. A. Heppenheimer (JSR,EN) 554
Solar electric missions to Ceres. David R. Brooks (JSR,EN) 889
Earth escape regions near the Moon. J. Pike (AIAA J,TN) 948
A new guidance system figure-of-merit. George R. Young (JSR,EN) 1103
Comments on "Optimal controls for out-of-plane motion about the translunar libration point." Robert W. Farquhar (JSR,TC) 815
——Reply by author to R. W. Farquhar. T. A. Heppenheimer (JSR,TC) 816

Earth-Orbital Trajectories

Two-to-one resonances near the equilateral libration points. Ali Hasan Nayfeh (AIAA J) 23
Normalized hodographic mapping for constrained trajectory families. Fang Toh Sun (AIAA J) 223
Manual onboard methods of orbit determination. Peter Bielkowicz, Roger C. Horrigan, and Richard C. Walsh (JSR) 284
Space station orbit selection. David E. Davin (JSR) 759
Switching conditions and a synthesis technique for the singular Saturn guidance problem. W. F. Powers and J. P. McDanell (JSR) 1027
Optimum launch trajectories for the ATS-E mission. Omer F. Spurlock and Fred Teren (JSR) 1202
A computer survey of impulsive ellipse-ellipse transfer. H. Gardner Moyer (AIAA J,TN) 321
Extension of angle-only state-determination to curvilinear coordinates. Alan M. Schneider (JSR,TC) 1238

Spacecraft Mission Studies and Economics

SERT II: Mission, thruster performance, and in-flight thrust measurements. W. R. Kerslake, R. G. Goldman, and W. C. Nieberding (JSR) 213
Unmanned lunar logistics vehicle may support the astronauts. Frank J. Hendel (JSR,EN) 428
Supply and resupply of stations in synchronous orbit. Duane W. Dugan (JSR,EN) 430
Solar electric missions to Ceres. David R. Brooks (JSR,EN) 889
A new guidance system figure-of-merit. George R. Young (JSR,EN) 1103

Entry Vehicle Mission Studies and Flight Mechanics

An evaluation of ablation mechanisms for the Apollo heat shield material. Eugene P. Bartlett, Larry W. Anderson, and Donald M. Curry (JSR) 463
Influence of asymmetric transition on re-entry vehicle characteristics. A Martellucci and R. S. Neff (JSR) 476
Effect of lift with roll rate variation on re-entry vehicle impact. J. P. Crenshaw (JSR) 483
Matched asymptotic solutions for optimum lift controlled atmospheric entry. Yun-Yuan Shi (AIAA J) 2229
Minimum range-sensitivity deorbit. Barry A. Galman (JSR,EN) 189
Spin variations in slender entry vehicles during rolling trim. William F. Bootle (AIAA J,TN) 729
A matched asymptotic solution for skipping entry into planetary atmosphere. Yun-Yuan Shi, L. Pottsepp, and M. C. Eckstein (AIAA J,TN) 736
Free fall stability and base pressure drop tests for planetary entry configurations. J. M. Cassanto and P. Buce (JSR,EN) 790

Post-Entry Deceleration Systems and Flight Mechanics

Development of a biowaste resistojet. Carl R. Halbach and Ronald Y. Yoshida (JSR) 273
——Comment on "Development of a biowaste resistojet." Gilbert S. Bahn (JSR,TC) 1238
Alternating current operation of a colloid source. W. C. Burson Jr. and P. C. Herren Jr. (JSR) 606
Solar electric propulsion asteroid belt mission. L. E. Schwaiger, J. M. Shollenberger Jr., J. H. Molitor, and D. MacPherson (JSR) 612
Flexibility as a model parachute performance parameter. H. G. Heinrich and Thomas R. Hektner (JA) 704
Attached inflatable decelerator (AID) performance evaluation and mission-application study. Herman L. Bohon and Robert Miserentino (JSR) 952
Parawing technology for spacecraft land landing a progress report. J. H. Moeller and E. M. Linhart (JA) 1016
Theoretical drag prediction for trailing decelerators at supersonic speeds. Thomas W. Brunner and Robert M. Nerem (JA) 1022
Stress analysis of parachutes using finite elements. William M. Mullins and Donald T. Reynolds (JSR) 1068
A new correlation of parachute weight data. Kenneth E. French (JSR,EN) 71
Snatch force during lines-first parachute deployments. Earle K. Huckins III (JSR,EN) 298
Performance of disk-gap-band, ringsail, and cross parachutes at low Earth altitudes. Harold N. Murrow and Clinton V. Eckstrom (JSR,EN) 418
Ground and flight test results for a decelerator towline energy absorber. Ross L. Goble and Earl L. Councill Jr. (JSR,EN) 423

Spacecraft Propulsion Systems Integration

A survey of current developments in surface tension devices for propellant acquisition. S. C. DeBrock, R. K. Grove, R. O. Sloma, D. L. Balzer, Yvonne Brill, and G. A. Yankura (JSR,SA) 83
Monopropellant thruster exhaust effects upon spacecraft. Warren C. Lyon (JSR,SA) 689
S-IVB restart chilldown experience. J. C. Davisson and G. A. McHarris (JSR) 99
SERT II: Design requirements for integrating electric propulsion into a spacecraft. R. J. Rulis (JSR) 209

XUM

SERT II: Mission, thruster performance, and in-flight thrust measurements. W. R. Kerslake, R. G. Goldman, and W. C. Nieberding (JSR) 213
NASA's space tug and hydrogen oxygen auxiliary propulsion. John R. Burke and William L. Haberman (JSR) 234
Lunar flying vehicle propulsion system. Lee Carey and Charles Stricklin (JSR) 323
Plasma generator for space vehicle neutralization. H. J. King and Seiji Kami (JSR) 1048
Application of a deflagration plasma gun as a space propulsion thruster. Dah Yu Cheng (AIAA J) 1681
Development of 2021 aluminum alloy propellant tanks. Warren Berger and Elliott Willner (JSR,EN) 69
Propulsion requirements for drag-free satellites. Daniel B. DeBra (JSR,EN) 412
Astrobee D: An advanced technology meteorological rocket vehicle. R. B. Jenkins, J. P. Taylor, T. P. Browne, and L. A. Briggs (JSR,EN) 895

Spacecraft Electric Power Systems

Review of SERT II power conditioning. James W. Bagwell (JSR) 225
SERT II: Solar array power system. G. A. D. Shaw and J. D. Falconer (JSR) 231
Solar array degradation due to meteoroid impacts during extended planetary missions. A. J. Richardson and J. W. Warren (JSR,EN) 681
FEP encapsulated N/P silicon solar cells after simulated micrometeoroid exposure. Michael J. Mirtich and John M. Bozek (JSR,EN) 1164

Spacecraft Temperature Control Systems

Spacecraft Configurational and Structural Design (Including Loads)

Monte Carlo dynamic analysis for lunar module landing loads. D. H. Merchant and D. T. Sawdy (JSR) 48
Landing impact protection through a hybrid attenuation system. E. J. Merz, J. A. Burnes, and S. R. McClure (JSR) 879
Bearing axis wobble for a dual spin vehicle. J. E. McIntyre and M. J. Gianelli (JSR) 945
Transverse vibrations of a rotating counterweighted cable of small flexural rigidity. William C. Kerr and Jacob M. Abel (AIAA J) 2326
Snatch force during lines-first parachute deployments. Earle K. Huckins III (JSR,EN) 298
Summary of the Nasa-SRI Round Robin Ablation Program. N. K. Hiester, C. F. Clark, and N. S. Vojvodich (JSR,EN) 886
Monte Carlo simulation of the Apollo Command Module land landing. H. B. Chenoweth (JSR,EN) 1074

Meteoroid Protection Systems

Radiation Protection Systems

An active radiation shield for cylindrically shaped vehicles. S. H. Levine and R. Lepper (JSR) 773

Spacecraft Attitude Dynamics and Control

Attitude motion of a nutationally damped dual-spin spacecraft in the presence of near-Earth environment. P. G. Fuechsel, P. M. Bainum, and P. J. Grunberger (JSR,SYN) 913
Passive damping of the forced precession motion of a two-body satellite. Wai K. Lim (JSR) 41
Lunar module digital autopilot. William S. Widnall (JSR) 56
Stochastic crew motion modeling. T. C. Hendricks and C. H. Johnson (JSR) 150
Stochastic stability of a satellite influenced by aerodynamic and gravity gradient torques. L. P. Sheporaitis (AIAA J) 218
——Comment on "Stochastic stability of a satellite influenced by aerodynamic and gravity gradient torques." Peter S. Sagirow (AIAA J,TC) 2477
——Reply by author to P. S. Sagirow. L. Sheporaitis (AIAA J,TC) 2477
Effect of crew motions on spacecraft orientation. John R. Davidson and Robert L. Armstrong (AIAA J) 232
Results of flexible spacecraft attitude control studies utilizing hybrid coordinates. Peter W. Likins and Gerald E. Fleischer (JSR) 264
Development of a fluidically controlled hydrazine roll-rate control system. Richard W. Sievers and Samuel B. Martin (JSR) 317
Stability of a dual-spin satellite with two dampers. F. R. Vigneron (JSR) 386
Magnetic compensation of a gravity-gradient stabilized satellite. D. L. Klinger, M. G. Lyons, E. D. Scott, and J. J. Rodden (JSR) 435
A magnetic attitude control system for an axisymmetric spinning spacecraft. John A. Sorensen (JSR) 441
Semipassive and active nutation dampers for dual-spin spacecraft. D. L. Mingori, J. A. Harrison, and G. T. Tseng (JSR) 448
Equations of motion of flexible spacecraft. Phillip B. Grote, John C. McMunn, and Rafael Gluck (JSR) 561
Stable limit cycles due to nonlinear damping in dual-spin spacecraft. Peter W. Likins, Gan-tai Tseng and D. Lewis Mingori (JSR) 568
Nonlinear resonant roll motion of magnetically oriented satellites. R. W. Kammuller (AIAA J) 582
Stable equilibria of satellites containing a momentum wheel in a controlled gimbal. J. U. Beusch and N. P. Smith (JSR) 736
Variable parameter nutation damper for SAS-A. B. E. Tossman (JSR) 743
Nutation damping and vibration isolation in a flexibly coupled dual-spin spacecraft. C. K. Cretcher and D. L. Mingori (JSR) 817
A movable-mass attitude-stabilization system for artificial-g space stations. Dara W. Childs (JSR) 829
Attitude stabilization of synchronous communications satellites employing narrow-beam antennas. H. J. Dougherty, K. L. Lebsock, and J. J. Rodden (JSR) 834
Effects of flexibility in the bearing assemblies of dual-spin spacecraft. M. P. Scher (AIAA J) 900
Linearization of the closed-loop dynamics of a dual-spin spacecraft. Kevin J. Phillips (JSR) 938
Bearing axis wobble for a dual spin vehicle. J. E. McIntyre and M. J. Gianelli (JSR) 945
Lunar escape-to-orbit systems simulation (LESS) using simplified manual control. David B. Middleton and George J. Hurt Jr. (JSR) 1011
Dynamically unbalanced dual-spin space stations with rigid or low-coupling interconnections. Richard A. Wenglarz (JSR) 1032
Periodic solution of plane librational motion of a satellite. Frank C. Liu (AIAA J) 1240
Dynamic equilibrium of a compound pendulum in an artificial satellite. T. R. Kane and S. Athel (AIAA J) 1456
A method for the Liapunov stability analysis of force-free dynamical systems. Leonard Meirovitch (AIAA J) 1695
Stability of gravity-stabilized drag-free satellites. Alan W. Fleming and Daniel B. DeBra (AIAA J) 1980
Librations of gravity-oriented satellites in elliptic orbits through atmosphere. V. J. Modi and S. K. Shrivastava (AIAA J) 2208
An expression for ring-baffle-slosh-damping under reduced gravity conditions. Harry J. Buchanan and Cornelius C. Shih (JSR,EN) 294
Stability of a liquid-filled gyroscope: Inviscid analysis, viscous corrections, and experiments. John T. Frasier and W. Eugene Scott (JSR,EN) 523
Observations on the thermally induced twist of thin-walled open-section booms. Shabeer Ahmed (JSR,EN) 534
Dynamics of spin-stabilized satellites during extension of long flexible booms. D. B. Cherchas (JSR,EN) 802
Attitude motion in an eccentric orbit. D. K. Anand, R. S. Yuhasz, and J. M. Whisnant (JSR,EN) 903
Induction and wave drag on long cylindrical satellites. N. S. Venkataraman and W. A. Gustafson (AIAA J,TN) 944
Rotational stability of a semielastic body. John R. Glaese (AIAA J,TN) 969
Dynamically unbalanced dual-spin space stations with rigid or low-coupling with rigid connections. Richard A. Wenglarz (JSR) 1032
Inversion of spin-stabilized spacecraft by mass translation—Some practical aspects. Norman H. Beachley (JSR,EN) 1078
Use of fibers in gravity-gradient stabilization systems. Subhash Garg and Peter Hughes (JSR,EN) 1085
Attitude determination of a spin-stabilized lunar satellite. William O. Covington Jr. (JSR,EN) 1088
Stability of a dual-spin satellite in circular orbit. F. R. Vigneron (JSR,EN) 1092
Spin rate behavior of ISIS-I. F. R. Vigneron, D. Harrison and G. Bower (JSR,EN) 1099
Attitude control of an orbiting space vehicle. Donald W. Sutherlin, Joseph S. Boland III, and Michael T. Borelli (JSR,EN) 1165
Rotational equations of motion for a triaxial rigid body. J. E. Cochran (AIAA J,TN) 1195
Approximate solution for coupled librations of an axisymmetric satellite in circular orbit. V. J. Modi and S. K. Shrivastava (AIAA J,TN) 1212
Planar motion of a large flexible satellite. R. Budynas and C. Poli (AIAA J,TN) 2099
Wobble damping of spinning satellites for misaligned control axes. Richard A. Wenglarz (AIAA J,TN) 2454
Comment on "Thermally induced vibration and flutter of flexible booms." Giuliano Augusti (JSR,TC) 202
Comment on "Thermally induced vibration and flutter of a flexible boom." Peter F. Jordan (JSR,TC) 204
——Reply by author to P. F. Jordan and G. Augusti and new results of two-mode approximation based on a rigorous analysis of thermal bending flutter of a flexible boom. Yi-Yuan Yu (JSR,TC) 205
Comment on "Stability of a spinning body containing elastic parts via Liapunov's direct method." Valentin V. Rumyantsev (AIAA J,TC) 1884
——Reply by author to V. V. Rumyantsev. Leonard Meirovitch (AIAA J,TC) 1885

Entry Vehicle Dynamics and Control

Re-entry dynamics of a trimmed body with constant spin. Raymond J. Tolosko (JSR) 21

Effects of products of inertia on re-entry vehicle roll behavior. Albert E. Hodapp Jr. and Edward L. Clark Jr. (JSR) 155
——Errata: "Effects of products of inertia on re-entry vehicle roll behavior." Albert E. Hodapp Jr. and Edward L. Clark Jr. (JSR,TC) 816
An exploratory study of the roll behavior of ablating cones. John B. McDevitt (JSR) 161
Dynamic stability tests of spinning entry bodies in the terminal regime. Peter Jaffe (JSR) 575
Re-entry capsule dynamics. Lars E. Ericsson and J. Peter Reding (JSR) 579
Approximate optimal atmospheric entry trajectories. Jason L. Speyer and M. Edward Womble (JSR) 1120
Optimal transition from entry to cruising flight. Robert F. Stengel (JSR) 1126
Method for extracting dynamic damping coefficient from flight test lateral rate data. T. D. Burton and R. A. Larmour (JSR) 1191
Response of an asymmetric missile to spin varying through resonance. Charles H. Murphy (AIAA J) 2197
A modified perturbation method for solving optimal control problems with state variable inequality constraints. W. E. Williamson and B. D. Tapley (AIAA J) 2222
Free fall stability and base pressure drop tests for planetary entry configurations. J. M. Cassanto and P. Buce (JSR,EN) 790
Effect of yaw of repose on ballistic match of similar projectiles. H. R. Vaughn and G. G. Wilson (AIAA J,TN) 1208

Spacecraft Communication Systems

A frequently agile receiver for satellite TV distribution. Colin J. R. Pallemaerts (JSR) 842
Project delphi—Technical aid to the developing nations by consulting services satellite. R. G. Pay (JSR) 847
Frequency stability characteristics and stabilization techniques in an SSB-FDMA/PhM multiple access system. S. J. Andrzejewski (JSR) 977
Antenna boresight parameter estimation. Richard M. Terasaki (JSR) 1058
Transmitted data volume, orientation accuracy, and size of parabolic antenna for spacecraft. G. Yu. Maksimov (JSR,EN) 183
Effect of asymmetrical flow from trailblazer flight measurements. R. DeVore, R. Caldecott, and J. D. Lee (JSR,EN) 299

Spacecraft Navigation, Guidance, and Flight-Path Control Systems

Applied resistojet technology. T. Kent Pugmire, Robert Shaw, and George R. Enos (JSR) 63
Effect of lift with roll rate variation on re-entry vehicle impact. J. P. Crenshaw (JSR) 483
Optimal station-keeping at collinear points. Edward A. Euler and E. Y. Yu (JSR) 513
A Second- and higher order perturbation analysis of two-body trajectories. T. T. Soong and N. A. Paul (AIAA J) 589
Minimum N-impulse time-free transfers between elliptic orbits. Huntington W. Small (AIAA J) 594
A method of orbit determination using overlapping television pictures. J. K. Campbell (JSR) 867
Guidance and navigation for solar electric interplanetary missions. Kenneth H. Rourke and James F. Jordan (JSR) 920
Analysis of Mariner VII pre-encounter anomaly. H. J. Gordon, S. K. Wong, and V. J. Ondrasik (JSR) 931
A small low angular momentum inertial gyroscope. M. S. Sapuppo and P. J. Pijoan (JSR) 971
Switching conditions and a synthesis technique for the singular Saturn guidance problem. W. F. Powers and J. P. McDanell (JSR) 1027
In-flight calibration of an interplanetary navigation instrument. Thomas C. Duxbury and Hiroshi Ohtakay (JSR) 1038
Approximate optimal atmospheric entry trajectories. Jason L. Speyer and M. Edward Womble (JSR) 1120
The critical dynamic errors of a strapdown guidance system. D. Sargent and H. Zarett (JSR) 1208
Stability of gravity-stabilized drag-free satellites. Alan W. Fleming and Daniel B. DeBra (AIAA J) 1980
Optimal nonplanar escape from circular orbits. T. N. Edelbaum (AIAA J) 2432
Efficient trajectory modeling for rocket/moving target spatial relationships. Allen F. Herzberg (JSR,EN) 891

Spacecraft and Component Ground Testing and Simulation

A 12 Mw, 200 atm arc heater for re-entry testing. James H. Painter and Ronald J. Ehmsen (AIAA J,SYN) 2307
Contamination danger by oil-lubricated ball bearings in spacecraft. Walter Wilkens (JSR) 962
Ground and flight test results for a decelerator towline energy absorber. Ross L. Goble and Earl L. Councill Jr. (JSR,EN) 423
Stability of a liquid-filled gyroscope: Inviscid analysis, viscous corrections, and experiments. John T. Frasier and W. Eugene Scott (JSR,EN) 523
Apollo spacecraft certification test program. J. H. Levine and P. E. Fitzgerald Jr. (JSR,EN) 677
An improved method for accelerometer precision centrifuge test data reduction. Theodore C. Maier (JSR,EN) 686

Spacecraft Flight Testing

S-IVB restart chilldown experience. J. C. Davisson and G. A. McHarris (JSR) 99
Antenna boresight parameter estimation. Richard M. Terasaki (JSR) 1058
Ground and flight test results for a decelerator towline energy absorber. Ross L. Goble and Earl L. Council Jr. (JSR,EN) 423
Full-scale flight test base pressure results for a blunt planetary entry probe configuration. J. M. Cassanto (JSR,EN) 996

Re-Entry Vehicle Testing

Flexibility as a model parachute performance parameter. H. G. Heinrich and Thomas R. Hektner (JA) 704
Method for extracting dynamic damping coefficient from flight test lateral rate data. T. D. Burton and R. A. Larmour (JSR) 1191

Spacecraft Habitability and Life Support Systems

Fluid dynamics in a large arterial bifurcation. Czeslaw M. Rodkiewicz and Darrel H. Howell (AIAA J,TN) 2284

Space Medicine (Including Weightlessness, Radiation Effects, Psychology, etc.)

Fluid dynamics in a large arterial bifurcation. Czeslaw M. Rodkiewicz and Darrel H. Howell (AIAA J,TN) 2284

Spacecraft Sterilization

Extra-Vehicular Activity

Crew Training

Data Sensing and Presentation or Transmission Systems

A frequency agile receiver for satellite TV distribution. Colin J. R. Pallemaerts (JSR) 842
Trends in Earth resources satellites data communications systems. M. Noda (JSR) 1148

Spacecraft Tracking

MARINE TECHNOLOGY

Surface Vessel Systems

Turning characteristics and control of submerged and floating vehicles. Allen G. Lindgren and Brian N. Belanger (JH) 118
Preliminary mathematical analysis of a rigid-airfoil, hydrofoil water conveyance. Robert M. L. Baker Jr. and James S. Douglas (JH) 140

Submerged Vessel Systems

Turning characteristics and control of submerged and floating vehicles. Allen G. Lindgren and Brian N. Belanger (JH) 118
Tests of cylindrical shell under concentrated loads applied to a reinforcing ring. Arnold Allentuch, Kevin Brady, Eugene Golub, and Joseph Kempner (AIAA J,TN) 2089

Mining Systems

Vessel and Control Surface Hydrodynamics

Preliminary mathematical analysis of a rigid-airfoil, hydrofoil water conveyance. Robert M. L. Baker Jr. and James S. Douglas (JH) 140

Propulsion System Hydrodynamics

Effect of polymer additives on propeller performance. T. Kowalski (JH) 11
Exciting-force operators for ship propellers. John P. Breslin (JH) 85

Undersea Acoustics

Marine Propulsion System Integration

Marine Electric Power Systems

A closed Brayton cycle power system for deep submersible vehicles. H. Balukjian and R. Rackley (JH) 5
High-rate nonaqueous lithium battery. M. Eisenberg and K. Wong (JH) 97

Marine Vessel Design (Including Loads)

Preliminary mathematical analysis of a rigid-airfoil hydrofoil water conveyance. Robert M. L. Baker Jr. and James S. Douglas (JH) 140

Corrosion/Erosion of Materials in Sea Water

Marine Vessel Vibration

Exciting-force operators for ship propellers. John P. Breslin (JH) 85

Marine Vessel Trajectories, Stability, and Control

Variable-displacement buoys. Gary M. Connell (JH,EN) 107
Turning characteristics and control of submerged and floating vehicles. Allen G. Lindgren and Brian N. Belanger (JH) 118

Undersea Navigation and Guidance

Undersea Communication

Marine Systems Testing

Undersea Extra-Vehicular Activity

Undersea Habitability and Life Support Systems

Undersea Medicine (Including Psychology, Pressure Effects, etc.)

Advanced biotechnology for underwater operations. Charles F. Gell (JH) 91

Physical and Biological Oceanography

Remote sensing of sea conditions with microwave radiometer systems. J. C. Aukland, P. J. Caruso, Jr., and W. H. Conway (JH) 15
Worldwide oceanic wind and wave predictions using a satellite radar-radiometer. Richard K. Moore and Willard J. Pierson Jr. (JH) 52

Sea Pollution Containment and Control

Forces. and motions of a flexible floating barrier. Jerome H. Milgram (JH) 41
A systems engineering solution to open-sea oil spills. Charles A. Rodenberger (JH) 132

PROPULSION

Properties of Fuels and Propellants

Ignition temperature vs droplet size for hydrazine and pentaborane in air. R. C. Ahlert and R. L. Peskin (AIAA J,SYN) 1889
Thrust-chamber technology for oxygen difluoride/diborane propellants. R. W. Riebling and W. B. Powell (JSR,SA) 4
Monopropellant thruster exhaust effects upon spacecraft. Warren C. Lyon (JSR,SA) 689
Experimental evaluation of catalysts for monopropellant hydrazine propulsion. H. Greer, S. M. King, P. C. Marx, and D. Taylor (JSR) 105
Microthrusters employing catalytically reacted N_2-O_2-H_2 gas mixtures, tridyne. H. E. Barber, G. L. Falkenstein, C. A. Buell, and R. N. Gurnitz (JSR) 111
Analysis of liquid rocket engine exhaust plumes. Terry Greenwood, David Seymour, Robert Prozan and Alan Ratliff (JSR) 123
Colloid microthruster system life test. S. Zafran and J. C. Beynon (JSR) 140
Endothermic fuels for hypersonic vehicles. H. Lander and A. C. Nixon (JA) 200
A photographic and analytic study of composite propellant combustion in an acceleration field. P. G. Willoughby, C. T. Crowe, and K. L. Baker (JSR) 310
Effect of oxygen concentration on the thermal stability of naphthenes. H. T. Henderson and A. C. Nixon (JA) 831
Effects of the acceleration vector on transient burning rate of an aluminized solid propellant. G. Burton Northam (JSR) 1133
An experimental investigation of solid-propellant erosive burning in an acceleration field. E. J. Sturm and R. E. Reichenbach (AIAA J) 1941
Particulate matter in the exhaust of a boron-loaded solid propellant. A. M. Mellor (AIAA J) 1944
Heterogeneous combustion of boron-containing polymers. R. P. Rastogi and S. K. Baijal (AIAA J) 2399
A solid-propellant rocket motor modulated by a fluidic vortex valve. R. F. Walsh, W. S. Lewellen, and D. B. Stickler (JSR,EN) 77
Ignition of metal powders in gaseous ClF_3. James T. Bryant and Nathan J. Sippel (JSR,EN) 192
Burning rate temperature sensitivity of composite solid propellants. D. L. Ewing and J. R. Osborn (JSR,EN) 290
An experimental method for determining the condensed phase heat of reaction of double-base propellants. C. E. Kirby and N. P. Suh (AIAA J,TN) 754
Hydrazine azide as an additive for monopropellant hydrazine. Thomas F. Seamans, Jack Kahrs, and George R. Huson (JSR,EN) 1080
Resistivity of NaI-glycerol solutions. J. D. Hepburn, F. E. Vermeulen, and F. S. Chute (AIAA J,TN) 2270
Comment on "Assessment of the explosive hazards of large solid rocket motors." Alfred Africano (JSR,TC) 911
——Reply by authors to A. Africano. Martin Zimmer, Joyce McDevitt, and Charles B. Dale (JSR,TC) 912

Combustion in Gases

Microthrusters employing catalytically reacted N_2-O_2-H_2 gas mixtures, tridyne. H. E. Barber, G. L. Falkenstein, C. A. Buell, and R. N. Gurnitz (JSR) 111
Reaction between oxygen difluoride and diborane: Kinetics and a proposed mechanism. Robert A. Rhein (AIAA J) 353
Influence of chemical kinetic and turbulent transport coefficients on afterburning rocket plumes. H. S. Pergament and D. E. Jensen (JSR) 643
Liquid-propellant rocket abort fire model. B. E. Bader, A. B. Donaldson, and H. C. Hardee (JSR) 1216
Structure of turbulent diffusion flames. Paul M. Chung (AIAA J,TN) 2282

Combustion in Heterogeneous Media

Gas phase reactions near the solid-gas interface of a deflagrating double-base propellant strand. C. L. Thompson Jr. and N. P. Suh (AIAA J) 154
A photographic and analytic study of composite propellant combustion in an acceleration field. P. G. Willoughby, C. T. Crowe, and K. L. Baker (JSR) 310
Reactions near the burning surface of double-base propellants. Cecil E. Kirby and Nam P. Suh (AIAA J) 317
Reaction between oxygen difluoride and diborane: Kinetics and a proposed mechanism. Robert A. Rhein (AIAA J) 353
Spectra and temperature of propellant flames during depressurization. A. D. Baer, N. W. Ryan and E. B. Schulz (AIAA J) 869
Shock-wave ignition of liquid fuel drops. C. W. Kauffman and J. A. Nicholls (AIAA J) 880
Combustion of liquid hydrocarbons in a high-speed airstream. Raymond B. Edelman, Stephen Schmotolocha, and Simon Slutsky (AIAA J) 1357
An experimental investigation of rapid depressurization extinguishment. G. E. Jensen and R. S. Brown (AIAA J) 1667
Fuel droplet burning rates in a combustion gas environment. G. M. Faeth and R. S. Lazar (AIAA J) 2165
Heterogeneous combustion of boron-containing polymers. R. P. Rastogi and S. K. Baijal (AIAA J) 2399
An experimental method for determining the condensed phase heat of reaction of double-base propellants. C. E. Kirby and N. P. Suh (AIAA J,TN) 754
Comment on "An investigation of the acceleration induced burning rate increase of nonmetalized composite propellants" Robert L. Glick (AIAA J,TC) 542
——Reply by authors to R. L. Glick. E. J. Sturm and R. E. Reichenbach (AIAA J,TC) 543
Errata: "Initial temperature and pressure effects on composite solid propellant burning rates: Comparisons with theory." David W. Blair (AIAA J,TC) 992

Combustion Stability, Ignition, and Detonation

Ignition temperature vs droplet size for hydrazine and pentaborane in air. R. C. Ahlert and R. L. Peskin (AIAA J,SYN) 1889
Nonlinear longitudinal combustion instability: Influence of propellant composition. A. K. Roberts and W. G. Brownlee (AIAA J) 140

XUM

A comparison of analysis and experiment for solid-propellant combustion instability. M. W. Beckstead and F. E. C. Culick (AIAA J) 147
Dynamics of an explosive reaction center. L. J. Zajac and A. K. Oppenheim (AIAA J) 545
Combustion instability studies with plastic propellant. Richard D. Gould (AIAA J) 560
One-dimensional stability AP deflagrations. Warren C. Strahle (AIAA J) 565
Acoustic wave amplication in solid rockets by discrete mass injection. Jefferson Y. S. Yang and Gary A. Flandro (AIAA J) 876
Head-end secondary flows in solid-propellant rockets due to transverse acoustic waves. Jefferson Y. S. Yang and Gary A. Flandro (AIAA J) 1125
Analysis of the F-1 acoustic liner. C. L. Oberg and N. M. Kuluva (JSR) 1138
Combustion stabilization with acoustic cavities. C. L. Oberg (JSR) 1220
A model for ammonium perchlorate deflagration between 20 and 100 atm. C. Guirao and F. A. Williams (AIAA J) 1345
Ignition of homogeneous solid propellanti under shock-tube conditions: Further theoretical development. R. K. Kumar and C. E. Hermance (AIAA J) 1615
Amplification by wave distortion in unstable combustors. M. F. Heidmann (AIAA J,TN) 336
Injector design criteria using noncircular orifice geometry. R. M. McHale, W. H. Nurick, and S. D. Clapp (JSR,EN) 408
Analysis of a combustion instability problem using the technique of multiple scales. C. E. Mitchell (AIAA J,TN) 532
Influence of the injection conditions on the ignition of methane and hydrogen in a hot Mach 2 air stream. K. Bier, G. Kappler, and H. Wilhelmi (AIAA J,TN) 1865
Comments on "Role of aluminum in suppressing instability in solid propellant rocket motors." E. W. Price (AIAA J,TC) 987

Subsonic and Supersonic Airbreathing Propulsion

Three-dimensional thrust nozzle design for maximum axial thrust. Lynn E. Snyder and H. Doyle Thompson (AIAA J,SYN) 1891
Evaluation of heat transfer for film-cooled turbine components. Darryl E. Metzger and Darrell D. Fletcher (JA) 33
——Comment on "Evaluation of heat transfer for film-cooled turbine components." E. R. G. Eckert, R. J. Goldstein, and D. R. Pedersen (JA,TC) 63
Effects of density ratio on rotary jet flow induction. J. D. McBrayer and K. H. Hohenemser (JA) 208
Engine compatibility programs for the supersonic transport propulsion system. J. B. Taylor (JA) 213
Inlet dynamics and compressor surge. Ronald A. Mays (JA) 219
Attenuation of inlet flow distortion upstream of axial flow compressors. G. M. Callahan and A. H. Stenning (JA) 227
Development of high-response data analysis AIDS for inlet-engine testing. Malcolm Rowe and Mark B. Susman (JA) 307
Application of random data techniques to aircraft inlet diagnostics. R. C. Crites and M. V. Heckart (JA) 502
Correlation of turbofan engine thrust performance with compound nozzle flow theory. M. R. L'Ecuyer, J. J. Morrison, and W. E. Mallett (JA) 510
Dynamic performance characteristics of mixed and unmixed turbofan engines. Franz N. Fett (JA) 820
Exhaust nozzle drag: Engine vs airplane force model. Dave Bergman (JA) 825
A supersonic intake control system for the external compression mode. R. G. Schweikhardt and R. P. Grippe (JA) 995
Effect of suspended solid particles on the properties in cascade flow. W. Tabakoff and M. F. Hussein (AIAA J) 1514
A turbulent boundary layer with mass addition, combustion, and pressure gradients. J. W. Jones, L. K. Isaacson, and S. Vreeke (AIAA J) 1762
Particulate matter in the exhaust of a boron-loaded solid propellant. A. M. Mellor (AIAA J) 1944
Effects of swirling inlet flow on pressure recovery in conical diffusers. A. T. McDonald, R. W. Fox, and R. V. Van Dewoestine (AIAA J) 2014
Measurements of particulated gas flow pressure on cascade nozzles. W. Tabakoff and M. F. Hussein (JA,EN) 121
An explicit formula for additive drag of a supersonic conical inlet. Frank W. Barry (JA,EN) 279
Wave structure of exhaust from transonic aircraft. Allen E. Fuhs (JA,EN) 280
Calculation of supersonic compressor losses. W. R. Wells and W. Tabakoff (JA,EN) 282
Pressure distribution on blades in cascade nozzle for particulate flow. W. Tabakoff and M. F. Hussein (JA,EN) 736
Real gas effects in compressors for aircraft gas turbines. Allen E. Fuhs (JA,EN) 740

Hypersonic Airbreathing Propulsion

Three-dimensional thrust nozzle design for maximum axial thrust. Lynn E. Snyder and H. Doyle Thompson (AIAA J,SYN) 1891
Endothermic fuels for hypersonic vehicles. H. Lander and A. C. Nixon (JA) 200
Air-breathing launch vehicle for Earth-orbit shuttle—New technology and development approach. J. R. Henry and C. H. McLellan (JA) 381
Studies of engine-airframe integration on hypersonic aircraft. P. J. Johnston, J. M. Cubbage, and J. P. Weidner (JA) 495
A comparative study of three axisymmetric inlets for a hypersonic cruise mission. Daniel P. Bencze and Norman E. Sorensen (JA) 516

VTOL Propulsion

Effects of density ratio on rotary jet flow induction. J. B. McBrayer and K. H. Hohenemser (JA) 208
Optimizing the propulsion/lift system for turbofan STOL aircraft. H. T. Bowling, C. H. Hurkamp, and R. M. Thornton (JA) 427
——Comment on "Optimizing the propulsion/lift system for turbofan STOL aircraft. James T. Pyle (JA,TC) 1034
——Reply by author to J. T. Pyle. H. T. Bowling (JA,TC) 1034
Jet flap diffuser: A new thrust amplifying device. Jean-Pierre Morel and Peter B. S. Lissaman (JA) 491
A slanted round jet at low forward speed. T. Strand (JA,EN) 278

Solid and Hybrid Rocket Engines

Theory of dynamic extinguishment of solid propellants with special reference to nonsteady heat feedback law. M. Summerfield, L. H. Caveny, R. A. Battista, N. Kubota, Yu. A. Gostintsev, and H. Isoda (JSR) 251
Effects of the acceleration vector on transient burning rate of an aluminized solid propellant. G. Burton Northam (JSR) 1133
An experimental investigation of solid-propellant erosive burning in an acceleration field. E. J. Sturm and R. E. Reichenbach (AIAA J) 1941
Heterogeneous combustion of boron-containing polymers. R. P. Rastogi and S. K. Baijal (AIAA J) 2399
A solid-propellant rocket motor modulated by a fluidic vortex valve. R. F. Walsh, W. S. Lewellen, and D. B. Stickler (JSR,EN) 77
Burning rate temperature sensitivity of composite solid propellants. D. L. Ewing and J. R. Osborn (JSR,EN) 290
Quenching of solid-propellant rockets by water injection. Leon D. Strand and Walter Gerber (JSR,EN) 992
Low-cost molded plastic sounding rocket motors. James C. Ward Jr. (JSR,EN) 1083
Comments on "Hydroduct using a thermite fuel." Leonard Greiner (JH,TC) 40
Comment on "Torsional oscillation of an encased hollow cylinder of finite length." G. L. Anderson (JSR,TC) 303
——Reply by author to G. L. Anderson. J. D. Achenbach (JSR,TC) 304
Comment on "Assessment of the explosive hazards of large solid rocket motors." Alfred Africano (JSR,TC) 911
——Reply by authors to A. Africano. Martin Zimmer, Joyce McDevitt, and Charles B. Dale (JSR,TC) 912

Liquid Rocket Engines

S-IVB restart chilldown experience. J. C. Davisson and G. A. McHarris (JSR) 99
Experimental evaluation of catalysts for monopropellant hydrazine propulsion. H. Greer, S. M. King, P. C. Marx, and D. Taylor (JSR) 105
Analysis of liquid rocket engine exhaust plumes. Terry Greenwood, David Seymour, Robert Prozan and Alan Ratliff (JSR) 123
Development of a fluidically controlled hydrazine roll-rate control system. Richard W. Sievers and Samuel B. Martin (JSR) 317
Deterioration of stainless steel regeneratively cooled thrust chambers. James K. Stanley (JSR) 329
Aerodynamic design of a land speed record car. T. P. Torda and Thomas A. Morel (JA) 1029
Analysis of the F-1 acoustic liner. C. L. Oberg and N. M. Kuluva (JSR) 1138
6-ft-diam metallic diaphragm for fluid storage and positive expulsion systems. David Gleich (JSR,EN) 404
Liquid fluorine feed system component design criteria. D. L. Endicott, P. L. Klevatt, and F. F. Stecker (JSR,EN) 406
Ullage mixing effects on tank pressurization performance. D. W. Kendle (JSR,EN) 990
Hydrazine azide as an additive for monopropellant hydrazine. Thomas F. Seamans, Jack Kahrs, and George R. Huson (JSR,EN) 1080
A new oxidizer for auxiliary ignition in liquid rocket motors. R. P. Rastogi, K. Kishore, and H. J. Singh (AIAA J,TN) 1408

Nuclear Propulsion

Status of the nuclear powered airplane. Frank E. Rom (JA) 26
An engineering study of the colloid-fueled reactor concept. Y. S. Tang, J. S. Stefanko, P. W. Dickson, and D. W. Drawbaugh (JSR) 129
NERVA technology reactor integrated with NASA Lewis Brayton cycle space power systems. L. H. Boman and J. G. Gallagher (JSR) 500
Nuclear shuttle for interorbital and transplanetary applications. Kurt P. Johnson and Richard J. Holl (JSR) 600

Operating characteristics and requirements for the NERVA flight engine. J. H. Altseimer, G. F. Mader, and J. J. Stewart (JSR) 766
Design and development of a fluidic chamber pressure control subsystem for the NERVA engine. J. J. Carroll, G. W. Felsing, J. D. Mockenhaupt, E. A. Sheridan, and W. S. Lewellen (JSR) 966

Electric and Advanced Space Propulsion

Pressure measurements in the exhaust of a pulsed megawatt MPD arc thruster. Charles J. Michels and Thomas M. York (AIAA J,SYN) 2305
Micorthrusters employing catalytically reacted N_2-O_2-H_2 gas mixtures, tridyne. H. E. Barber, G. L. Falkenstein, C. A. Buell, and R. N. Gurnitz (JSR) 111
An engineering study of the colloid-fueled reactor concept. Y. S. Tang, J. S. Stefanko, P. W. Dickson, and D. W. Drawbaugh (JSR) 129
Parametric investigation of mercury hollow-cathode neutralizers. D. C. Byers and Aaron Snyder (JSR) 133
Colloid microthruster system life test. S. Zafren and J. C. Beynon (JSR) 140
Microthruster development in France under direction of the Centre National d'Etudes Spatiales (CNES). Jean-Pierre Pujes (JSR) 146
Spectroscopic study of ion-neutral coupling in plasma acceleration. A. C. Malliaris and D. R. Libby (AIAA J) 160
——Comment on "Spectroscopic study of ion-neutral coupling in plasma acceleration." Denis J. Connolly and Ronald J. Sovie (AIAA J,TC) 1885
——Reply by author to D. J. Connolly and R. J. Sovie. A. C. Malliaris (AIAA J,TC) 1886
Acceleration patterns in quasi-steady MPD arcs. Robert G. Jahn, Kenn E. Clark, Ronald C. Oberth, and Peter J. Turchi (AIAA J) 167
Dynamic voltage-current characteristics of a megawatt MPD-ARC thruster. Charles J. Michels (AIAA J) 173
Plasma properties and performance of mercury ion thrusters. T. D. Masek (AIAA J) 205
SERT II: Design requirements for integrating electric propulsion into a spacecraft. R. J. Rulis (JSR) 209
SERT II: Mission, thruster performance, and in-flight thrust measurements. W. R. Kerslake, R. G. Goldman, and W. C. Nieberding (JSR) 213
Exploratory tests on a downstream-cathode MPD thruster. James A. Burkhart (JSR) 240
Operation of a lightweight power conditioner with a hollow-cathode ion thruster. E. V. Pawlik, E. N. Costogue, and W. C. Schaefer (JSR) 245
Electrostatic ion thruster ESKA-18-P of the DFVLR. Siegfried F. J. Baumgarth, Harro A. W. Bessling, and Uwe W. Sprengel (JSR) 305
Thermal radiation absorption by particle-seeded gases. J. R. Williams, W. L. Partain, A. S. Shenoy, and J. D. Clement (JSR) 339
Recent work on radio frequency ion thrusters. Horst W. Loeb (JSR) 494
Mars and Venus orbiter spacecraft electric propulsion systems. J. H. Molitor and K. J. Russell (JSR) 506
Thrust from arcjets with self-induced magnetic fields. H. A. Hassan (AIAA J) 578
Operational characteristics of colloid thrusters. Julius Perel, Arthur Y. Yahiku, John F. Mahoney, Howard L. Daley, and Allan Sherman (JSR) 702
Pulsed plasma and low-pressure detonator thrusters for secondary propulsion of spacecraft. A. V. La Rocca (JSR) 709
Development of a liquid-mercury cathode thruster system. J. Hyman Jr., J. R. Bayless, D. E. Schnelker, J. W. Ward, and J. Simpkins (JSR) 717
Guidance and navigation for solar electric interplanetary missions. Kenneth H. Rourke and James F. Jordan (JSR) 920
Design and development of a fluidic chamber pressure control subsystem for the NERVA engine. J. J. Carroll, G. W. Felsing, J. D. Mockenhaupt, E. A. Sheridan, and W. S. Lewellen (JSR) 966
Plasma generator for space vehicle neutralization. H. J. King and Seiji Kami (JSR) 1048
Exhaust characteristics of a megawatt nitrogen MPD-ARC thruster. Charles J. Michels and Donald R. Sigman (AIAA J) 1144
——Errata: "Exhaust characteristics of a megawatt nitrogen MPD-ARC thruster." Charles J. Michels and Donald R. Sigman (AIAA J,TC) 2112
Application of a deflagration plasma gun as a space propulsion thruster. Dah Yu Cheng (AIAA J) 1681
Velocity and thrust measurements in a quasi-steady magnetoplasmadynamic thruster. James M. Hoell Jr., Joseph Burlock, and Olin Jarrett Jr. (AIAA J) 1969
A study of hollow cathode discharge characteristics. C. M. Philip (AIAA J) 2191
Thermionic reactor ion propulsion spacecraft for unmanned outer planet exploration. J. F. Mondt and J. P. Davis (JSR,EN) 295
Life test summary and high-vacuum tests of 10-mlb resistojets. Ronald Y. Yoshida, Carl R. Halbach, and C. Scott Hill (JSR,EN) 414
A 30-cm mercury ion thruster module. H. J. King and R. L. Poeschel (JSR,EN) 420
Electron energy distributions in an ion engine discharge. Anthony R. Martin (JSR,EN) 548
Ion thruster systems with thrust vector deflection. H. J. King and D. E. Schnelker (JSR,EN) 552
An experimental investigation of superheated subliming solid thruster performance. W. L. Owens Jr. (JSR,EN) 806
Film-cooling on the anode of a plasma generator. L. Berkley Davis Jr. and Clifford J. Cremers (JSR,EN) 1096
Resistivity of NaI-glycerol solutions. J. D. Hepburn, F. E. Vermeulen, and F. S. Chute (AIAA J,TN) 2270
Comment on "Development of a biowaste resistojet." Gilbert S. Bahn (JSR,TC) 1238

Marine Propulsion

A feasibility study of a hydromagnetic waterjet propulsion system. Jon G. McGowan and S. N. B. Murthy (JH) 31
Comments on "Hydroduct using a thermite fuel". Leonard Greiner (JH,TC) 40

Airbreathing Engine Testing

Designing jet aircraft wind-tunnel test programs with propulsion system simulation. James L. Grunnet (JA) 421

Rocket Engine Testing

THERMOPHYSICS AND THERMOCHEMISTRY

Atomic, Molecular, and Plasma Properties

Specie concentration measurements utilizing Raman scattering of a laser beam. George F. Widhopf and Samuel Lederman (AIAA J) 309
Thermal radiation absorption by particle-seeded gases. J. R. Williams, W. L. Partain, A. S. Shenoy, and J. D. Clement (JSR) 339
Calculated equilibrium composition and radiation of metallic plasmas produced in hypervelocity impact. Kenneth E. Harwell, James L. Reid, and Albert R. Hughes (JSR) 358
Influence of differences in thermochemistry data upon high-temperature gas composition. T. E. Horton (AIAA J) 1308
Correlation of inviscid air nonequilibrium shock layer properties. Clarence J. Harris (AIAA J,TN) 334
Pressure change accompanying mixing of two ideal gases. J. R. O'Loughlin (JSR,EN) 898
Direct measurement of the thermal conductivity of shock heated argon. R. Ewald and H. Grönig (AIAA J,TN) 946
Design and development of a fluidic chamber pressure control subsystem for the NERVA engine. J. J. Carroll, G. W. Felsing, J. D. Mockenhaupt, E. A. Sheridan, and W. S. Lewellen (JSR) 966
Molecular beam extraction from equilibrium gas flows. Ulf Bossel (AIAA J,TN) 2060
Thermodynamic properties and nozzle flow of hydrogen to 1000 atm and 100,000°K. R. W. Patch (AIAA J,TN) 2298
Erratum: "A tractable method for estimating atomic and molecular transport coefficients." R. L. Fox and R. S. Bernard (AIAA J,TC) 2479

Liquid and Solid Thermophysical Properties

Two-dimensional transpiration-cooled nosetip. P. J. Schneider, R. E. Maurer, and M. G. Strapp (JSR) 170
Spectral absolute reflectance of CO_2 frosts from 0.5 to 12.0 μ. B. E. Wood, A. M. Smith, J. A. Roux, and B. A. Seiber (AIAA J) 1338
Spectral infrared reflectance of H_2O condensed on LN_2-cooled surfaces in vacuum. B. E. Wood, A. M. Smith, J. A. Roux, and B. A. Seiber (AIAA J) 1836
Lunar surface temperatures at tranquillity base. C. J. Cremers, R. C. Birkebak, and J. E. White (AIAA J) 1899
Phase change solidification dynamics. Anthony O. Ukanwa, Franklin J. Stermole, and John O. Golden (JSR,EN) 193
An experimental and analytical study of film boiling heat transfer to hydrogen. B. L. Pierce and J. W. H. Chi (JSR,EN) 809
Gravity-induced free convection effects in melting phenomena for thermal control. R. L. Bain, F. J. Stermole, and J. O. Golden (JSR,EN) 1000
Water and oxygen particles in space from Apollo missions. Ravi D. Sharma, M. L. Kratage, and A. C. Buffalano (JSR,EN) 1230

Material Ablation

An exploratory study of the roll behavior of ablating cones. John B. McDevitt (JSR) 161
Aerothermodynamic characteristics of slender ablating re-entry vehicles. H. G. Timmer, C. L. Arne, T. R. Stokes Jr., and H. H. Tang (JSR) 373
Heat-shield ablation at superorbital re-entry velocities. E. P. Bartlett, W. E. Nicolet, and J. T. Howe (JSR) 456
An evaluation of ablation mechanisms for the Apollo heat shield material. Eugene P. Bartlett, Larry W. Anderson, and Donald M. Curry (JSR) 463

XUM

Effect of gas phase chemical reactions on heat transfer to a charring ablator. A. F. Mills, A. V. Gomez, and G. Strouhal (JSR) 618
Heating environment and protection during Jupiter entry. Michael E. Tauber and Roy M. Wakefield (JSR) 630
Ablative material tests under transient heating simulating ballistic re-entry. Barry J. Mitchel (JSR) 636
Modeling reacting gas flow in the char layer of an ablator. Gary C. April, Ralph W. Pike, and Eduardo G. del Valle (AIAA J) 1113
Low-temperature simulation of hypersonic melting ablation and the observed wave patterns. Ching-Jen Chen and Simon Ostrach (AIAA J) 1120
Experimental studies of ablation surface patterns and resulting roll torques. E. P. Williams (AIAA J) 1315
An experimental study of the boundary layers on low-temperature subliming ablators. Fred Liffert and John Genovese (AIAA J) 1330
Heterogeneous rate coupling for graphite oxidation. J. R. Baron and H. Bernstein (AIAA J) 1588
Crosshatched ablation patterns in teflon. Philip R. Nachtsheim and Howard K. Larson (AIAA J) 1608
Measurements in ablating air-teflon boundary layers. John H. Chang and R. E. Center (AIAA J) 1819
Inelastic deformation and crosshatching. Harris Gold, Ronald F. Probstein, and Robert S. Scullen (AIAA J) 1904
Sublimation of flat-nosed cones with various axisymmetric steps in supersonic flow. A. F. Charwat and F. W. Spaid (AIAA J) 2392
Formulation of the surface ablation of a silica-nylon-phenol material. René C. Joatton (JSR,EN) 527
Effects of surface roughness on heat transfer to ablating bodies. Jin H. Chin (JSR,EN) 804
Experimental results on crosshatched ablation patterns. Hans W. Stock and Jean J. Ginoux (AIAA J,TN) 971
A channel test device for arc jet material ablation studies. Robert E. Sheldahl, George F. Wright Jr., and Erich Muehlberger (JSR,EN) 1162
Kinetic limitations on the diffusional control theory of the ablation rate of carbon. Howard G. Maahs (JSR,EN) 1226
Unperturbed multiple elliptical orbit re-entry of isotopic heaters. Arthur W. Barsell (JSR,EN) 1235
Ablation surface cross-hatching cones in hypersonic flow. E. P. Williams and G. R. Inger (AIAA J,TN) 2077

Heat Conduction

Evaluation of heat transfer for film-cooled turbine components. Darryl E. Metzger and Darrell D. Fletcher (JA) 33
——Comment on "Evaluation of heat transfer for film-cooled turbine components." E. R. G. Eckert, R. J. Goldstein, and D. R. Pedersen (JA,TC) 63
An approach to linear and nonlinear heat-transfer problem using a Lagrangian. B. Vujanovic (AIAA J) 131
Surface roughness effects on equilibrium temperature of interacting surfaces. R. G. Hering and T. F. Smith (JSR) 367
Heating environment and protection during Jupiter entry. Michael E. Tauber and Roy M. Wakefield (JSR) 630
Thermal modeling of the human body—Further solutions of the steady-state heat equation. John C. Chato and Avraham Shitzer (AIAA J) 865
Formation and maintenance of thermoclines in temperate lakes. T. R. Sundaram and R. G. Rehm (AIAA J) 1322
Thermal-mechanical response of nearly opaque materials exposed to continuous radiation. John T. Howe (AIAA J) 1911
Density, pressure, and temperature effects on heat transfer Apollo 11 fines. C. J. Cremers (AIAA J) 2180
Heat transfer with nonlinear boundary conditions via a variational principle. B. Vujanovic and A. M. Strauss (AIAA J,TN) 327
Spacer effects on lateral heat transfer in multilayer insulation. P. S. Jagannathan and C. L. Tien (JSR,EN) 416
Effects of surface roughness on heat transfer to ablating bodies. Jin H. Chin (JSR,EN) 804

Radiation and Radiative Heat Transfer

Angular distribution of thermal radiation from a cylindrical particle cloud. Leo W. Stockham and Allen C. McLellan (AIAA J,SYN) 2115
Nongray radiating flow about smooth symmetric bodies. W. B. Olstad (AIAA J) 122
Radiative transfer properties of a shocked Venus model atmosphere. H. J. Deacon Jr. and W. F. Rumpel (JSR) 177
Thermal radiation absorption by particle-seeded gases. J. R. Williams, W. L. Partain, A. S. Shenoy, and J. D. Clement (JSR) 339
Surface roughness effects on equilibrium temperature of interacting surfaces. R. G. Hering and T. F. Smith (JSR) 367
Planetary entry body heating rate measurements in air and Venus atmospheric gas up to T = 15,000°K. F. R. Livingston and J. W. Williard (AIAA J) 485
Radiation through a plane-parallel absorbing medium between directional surfaces. S. C. Traugott (AIAA J) 500
Coupled nongray radiating flows about long blunt bodies. Linwood B. Callis (AIAA J) 553
Performance of a charring ablator under transient and steady-state convective and radiative heating. Roy M. Wakefield and John H. Lundell (JSR) 626
Temperature distribution in lunar rilles. A. S. Adorjan (JSR) 669
An active radiation shield for cylindrically shaped vehicles. S. H. Levine and R. Lepper (JSR) 773
Radiative-gasdynamic coupling and nonequilibrium effects behind reflected shock waves. Leland A. Carlson (AIAA J) 858
A study of strong thermal interactions between a laser beam and an absorbing gas. Richard A. Chodzko and Shao-Chi Lin (AIAA J) 1105
Liquid-propellant rocket abort fire model. B. E. Bader, A. B. Donaldson, and H. C. Hardee (JSR) 1216
Spectral infrared reflectance of H_2O condensed on LN_2-cooled surfaces in vacuum. B. E. Wood, A. M. Smith, J. A. Roux, and B. A. Seiber (AIAA J) 1836
Thermal-mechanical response of nearly opaque materials exposed to continuous radiation. John T. Howe (AIAA J) 1911
Continuum radiative flux from nonisothermal nongray atomic gases. H. F. Nelson and A. L. Crosbie (AIAA J) 1929
Density, pressure, and temperature effects on heat transfer in Apollo 11 fines. Clifford J. Cremers (AIAA J9) 2180
New half-range differential approximation for spherically-symmetric radiative transfer. James B. Moreno and Isaac Greber (AIAA J) 2385
Iterative solution of a radiation dominated heat balance. Charles W. Bolz Jr. (JSR,EN) 79
A method for computing the nonequilibrium radiant emission from near-equilibrium shock layers. Gene P. Menees (AIAA J,TN) 351
A method of treating the nongray error in total emittance measurements. J. B. Heaney and J. H. Henninger (JSR,EN) 532
Radiosity at the midpoint of parallel plates. D. C. Look Jr. (JSR,EN) 536
Absorption of infrared radiation by high-density oxygen. William J. Borucki (JSR,EN) 685
Viscous blunt-body flow with radiation. Wilhelm Schneider (AIAA J,TN) 957
Comment on "Analysis of an active thermal protection system for high-altitude flight." A. F. Mills (AIAA J,TC) 1439
——Reply by author to A. F. Mills. Paul A. Libby (AIAA J,TC) 1440

Thermal Surface Properties

Surface roughness effects on equilibrium temperature of interacting surfaces. R. G. Hering and T. F. Smith (JSR) 367
Temperature distribution in lunar rilles. A. S. Adorjan (JSR) 669
Spectral infrared reflectance of H_2O condensed on LN_2-cooled surfaces in vacuum. B. E. Wood, A. M. Smith, J. A. Roux, and B. A. Seiber (AIAA J) 1836
Directional emittance of a two-dimensional ceramic coating. W. D. Turner and T. J. Love (AIAA J) 1849
Optical properties of coatings. Effect of pigment concentration. H. C. Hottel, A. F. Sarofim, W. H. Dalzell, and I. A. Vasalos (AIAA J) 1895
Lunar surface temperatures at tranquillity base. C. J. Cremers, R. C. Birkebak, and J. E. White (AIAA J) 1899
Radiative properties of rough surfaces. A. S. Adorjan and F. A. Wierum (AIAA J) 2172
Density, pressure, and temperature effects on heat transfer in Apollo 11 fines. Clifford J. Cremers (AIAA J) 2180
A method of treating the nongray error in total emittance measurements. J. B. Heaney and J. H. Henninger (JSR,EN) 532
Effects of surface roughness on heat transfer to ablating bodies. Jin H. Chin (JSR,EN) 804

Thermochemistry and Chemical Kinetics

Numerical methods for nonreacting and chemically reacting laminar flows—tests and comparisons. Clark H. Lewis (JSR) 117
Absolute rate constant measurements for the radiative combination of atomic oxygen with nitric oxide. M. Vanpee, K. D. Hill, and W. R. Kineyko (AIAA J) 135
Kinetics of high-temperature reactions of graphite with carbon dioxide and water. Merrill K. King (JSR) 470
Effect of gas phase chemical reactions on heat transfer to a charring ablator. A. F. Mills, A. V. Gomez, and G. Strouhal (JSR) 618
Performance of a charring ablator under transient and steady-state convective and radiative heating. Roy M. Wakefield and John H. Lundell (JSR) 626
Influence of chemical kinetic and turbulent transport coefficients on afterburning rocket plumes. H. S. Pergament and D. E. Jensen (JSR) 643
Shock-tube study of vibrational relaxation in carbon monoxide using pressure measurements. Ronald K. Hanson (AIAA J) 1811
Electron-density and electron-temperature measurements in boundary layers. Michael G. Dunn (AIAA J) 1561
Measurement of $C^+ + e^- + e^-$ and $CO^+ + e^-$ recombination in carbon monoxide flows. Michael G. Dunn (AIAA J) 2184
Chemical nonequilibrium boundary-layer effects on a simulated space shuttle configuration during re-entry. John C. Adams Jr. (JSR,EN) 683

Absorption of infrared radiation by high-density oxygen. William J. Borucki (JSR,EN) 685

Thermal Modeling and Experimental Thermal Simulation

Temperature distribution in lunar rilles. A. S. Adorjan (JSR) 669
Design of an astronaut-operated, lunar-surface, antenna-aiming mechanism. N. S. Ajlouny and A. R. Spencer (JSR,SYN) 1009
Liquid-propellant rocket abort fire model. B. E. Bader, A. B. Donaldson, and H. C. Hardee (JSR) 1216
Lunar surface temperatures at tranquillity base. C. J. Cremers, R. C. Birkebak, and J. E. White (AIAA J) 1899
A shielded fine-wire probe for rapid measurement of total temperature in high-speed flows. Leonard M. Weinstein (JSR,EN) 425
Limitations in thermal scale modeling. R. K. MacGregor (JSR,EN) 559
An experimental and analytical study of film boiling heat transfer to hydrogen. B. L. Pierce and J. W. H. Chi (JSR,EN) 809
Heat-transfer correlations for blunt cones at angle of attack. George F. Widhopf (JSR,EN) 1002
Simplified radiation analysis using modularized enclosures. John J. Chapter and J. M. Connolly (JSR,EN) 1006
A channel test device for arc jet material ablation studies. Robert E. Sheldahl, George F. Wright, Jr. and Erich Muehlberger (JSR,EN) 1162

FLUID DYNAMICS

Boundary Layers and Convective Heat Transfer—Laminar

Structure of nonequilibrium boundary layer along a flat plate in a partially ionized gas. Michio Nishida and Kazuoki Matsuoka (AIAA J,SYN) 2117
Approximate bridging relations in the transitional regime between continuum and free-molecule flows. Fred W. Matting (JSR) 35
Boundary-layer displacement and leading-edge bluntness effects on attached and separated laminar boundary layers in a compression corner. Part II: Experimental study. Michael S. Holden (AIAA J) 84
Numerical methods for nonreacting and chemically reacting laminar flows—tests and comparisons. Clark H. Lewis (JSR) 117
Laminar, transition, and turbulent boundary-layer characteristic with favorable pressure gradient $M_1 = 9.6$. H. T. Nagamatsu, D. C. Wisler, and R. E. Sheer Jr. (JA) 176
Electron thermochemical nonequilibrium effects in re-entry boundary layers. Doyle D. Knight (AIAA J) 193
Computation of nonequilibrium merged stagnation shock layers by successive accelerated replacement. Thomas C. Dellinger (AIAA J) 262
Boundary layer on a hypersonic sharp cone at small angle of attack. H. A. Dwyer (AIAA J) 277
Flush-mounted electrostatic probe in the presence of negative ions. K. J. Touryan and P. M. Chung (AIAA J) 365
Strong blowing into supersonic laminar flows around two-dimensional and axisymmetric bodies. G. R. Inger and G. A. Gaitatzes (AIAA J) 436
Laminar boundary layer on a cone at incidence in supersonic flow. R. R. Boericke (AIAA J) 462
Second-order longitudinal curvature effects in compressible laminar boundary layers. William F. Van Tassell and Dale B. Taulbee (AIAA J) 682
Similar laminar boundary layers with zero wall shear and mass addition. D. R. Kassoy (AIAA J) 725
Equilibrium enthalpy profiles for the incompressible turbulent boundary layer with heat transfer. Irwin E. Alber and Douglas E. Coats (AIAA J) 791
Boundary-layer pitot and hot-wire surveys at $M\infty \approx 20$. M. C. Fischer, D. V. Maddalon, L. M. Weinstein, and R. D. Wagner Jr. (AIAA J) 826
A study of hypersonic corner flow interactions. Ralph D. Watson and Leonard M. Weinstein (AIAA J) 1280
A study of general three-dimensional boundary-layer problems by an exact numerical method. Joe Der Jr. (AIAA J) 1294
Flat plate boundary-layer studies in a partially ionized gas. Raymond C. Tseng and L. Talbot (AIAA J) 1365
Crossflow and unsteady boundary-layer effects on rotating blades. H. A. Dwyer and W. J. McCroskey (AIAA J) 1498
Finite-difference solution for three-dimensional boundary layers with large positive and negative crossflows. Anastasius J. Karabelas and Thomas J. Hanratty (AIAA J) 1527
Electron-density and electron-temperature measurements in boundary layers. Michael G. Dunn (AIAA J) 1561
Turbulent boundary-layer shock interaction with and without injection. E. Alzner and V. Zakkay (AIAA J) 1769
Adiabatic laminar boundary-layer/shock-wave interactions on flared axisymmetric bodies. Harry P. Horton (AIAA J) 2141
Compressible boundary-layer computation by the method of weighted residuals using exponentials. Nimai K. Mitra and Hartmut H. Bossel (AIAA J) 2370
Ionizational and electronathermal nonequilibrium in MHD boundary layers. Donald W. Cott (AIAA J) 2404
Estimation of the maximum temperature of a swept leading edge for equilibrium glide entry. Davis H. Crawford (JSR,EN) 75
Numerical solution of boundary-layer flows with massive blowing. Philip R. Nachtsheim and Michael J. Green (AIAA J,TN) 533
Hypersonic strong interaction flow over an inclined surface. T. K. Chattopadhyay and C. M. Rodkiewicz (AIAA J,TN) 535
Application of transformation methods to wedge-shock/boundary-layer interactions. Donald R. Kotansky (AIAA J,TN) 731
Laminar incompressible flow past a circulation-controller circular lifting rotor. Allen Plotkin (AIAA J,TN) 756
Three-dimensional stagnation-point heat transfer in equilibrium air flows. Andrzej Wortman (AIAA J,TN) 955
Laminar boundary layers with large wall heating and flow acceleration. L. H. Back (AIAA J,TN) 966
Shock-wave strength for separation of a laminar boundary layer at transonic speeds. A. F. Messiter, A. Feo, and R. E. Melnik (AIAA J,TN) 1197
Mass transfer effectiveness at three-dimensional stagnation points. A. Wortman and A. F. Mills (AIAA J,TN) 1210
Recovery factor for highly accelerated laminar boundary layers. A. Wortman and A. F. Mills (AIAA J,TN) 1415
A new integral calculation of skin friction on a porous plate. Tse-Fou Zien (AIAA J,TN) 1423
Hypersonic limits for laminar, constant-pressure boundary layers. Merwin Sibulkin (AIAA J,TN) 1636
Vortex flow over a flat surface with suction. Kenichi Nanbu (AIAA J,TN) 1642
An effective approximation for computing the three-dimensional laminar boundary-layer flows. Kenneth K. Wang (AIAA J,TN) 1649
Laminar convective heat-transfer rates on a hemisphere cylinder in rarefied hypersonic flow. David E. Boylan (AIAA J,TN) 1661
Hypersonic lee-surface heating alleviation on delta wing by apex-drooping. Dhanvada Madhava Rao (AIAA J,TN) 1875
Numerical studies of the hypersonic strong interaction boundary-layer equations. M. J. Werle and S. F. Wornom (AIAA J,TN) 2058
Flap span effects on boundary-layer separation. Karlheinz O. W. Ball (AIAA J,TN) 2080
Separating self-similar laminar boundary layers. A. Wortman and A. F. Mills (AIAA J,TN) 2449
Nonequilibrium stagnation-point boundary-layer in a partially ionized gas. K. Matsuoka and M. Nishida (AIAA J,TN) 2457
Comment on "Local nonsimilarity boundary-layer solutions." M. Coxon and E. K. Parks (AIAA J,TC) 1664
——Reply by authors to M. Coxon and E. K. Parks. E. M. Sparrow (AIAA J,TC) 1664

Boundary Layers and Convective Heat Transfer—Turbulent

Optical crossed-beam measurements of turbulence intensities in a subsonic jet shear layer. M. Y. Su and F. R. Krause (AIAA J,SYN) 2113
An evaluation of theories for predicting turbulent skin friction and heat transfer on flat plates at supersonic and hypersonic Mach numbers. Edward J. Hopkins and Mamoru Inouye (AIAA J,SA) 993
Rotation of a disk in dilute polymer solutions. Michael Poreh and Touvia Miloh (JH) 61
An experimental study of turbulent diffusion of drag-reducing polymer additives. R. R. Walters and C. S. Wells (JH) 65
Measurement of turbulence intensities with piezoelectric probes in viscoelastic fluids. J. M. Rodriguez, G. K. Patterson, and J. L. Zakin (JH) 101
Laminar, transition, and turbulent boundary-layer characteristic with favorable pressure gradient $M_1 = 9.6$. H. T. Nagamatsu, D. C. Wisler, and R. E. Sheer, Jr. (JA) 176
Turbulent boundary layer on a rotating disk calculated with an effective viscosity. Paul Cooper (AIAA J) 255
Surface mass injection at supersonic and hypersonic speeds as a problem in turbulent mixing. Part II: Axially-symmetric flow. Lester Lees and Robert L. Chapkis (AIAA J) 1067
Calculation of compressible turbulent boundary layers with heat and mass transfer. Tuncer Cebeci (AIAA J) 1091
Physics of turbulent flow. Erik Mollo-Christensen (AIAA J) 1217
Mean and fluctuating electron density in equilibrium turbulent boundary layers. Anthony Demetriades and Richard Grabow (AIAA J) 1533
An analysis and application of the time-dependent turbulent boundary-layer equations. Henry McDonald and Stephen J. Shamroth (AIAA J) 1553
Turbulent heat-transfer measurements on a blunt cone at angle of attack. George F. Widhoff (AIAA J) 1574
Laboratory simulation of the atmospheric boundary layer. J. E. Cermak (AIAA J) 1746
A turbulent boundary layer with mass addition, combustion, and pressure gradients. J. W. Jones, L. K. Isaacson, and S. Vreeke (AIAA J) 1762
Compressible turbulent boundary-layer heat transfer to rough surfaces. D. E. Nestler (AIAA J) 1799
Inelastic deformation and crosshatching. Harris Gold, Ronald F. Probstein, and Robert S. Scullen (AIAA J) 1904
Separation controlled transonic drag-rise modification for V-shaped notches. Ronald H. Howell and Helmut H. Korst (AIAA J) 2051
Temperature distributions in supersonic turbulent boundary layers. H. U. Meier and J. C. Rotta (AIAA J) 2149

XUM

Parametric study of a two-dimensional turbulent wall jet in a moving stream with arbitrary pressure gradient. Suresh H. Goradia and Gene T. Colwell (AIAA J) 2156
Estimation of mass diffusion reduction by drag-reducing polymeric additives. Hillel Rubin (JH,EN) 73
Scaling of heat transfer to dilute polymeric solutions. Hillel Rubin (JH,EN) 148
Crossflow profiles for compressible, turbulent boundary layers. J. Richard Shanebrook and William J. Sumner (JA,EN) 188
Extension of Emmons' spot theory to flows on blunt bodies. Karl K. Chen and Noel A. Thyson (AIAA J) 821
Turbulent boundary-layer flow over a rotating flat-plate blade. W. J. McCroskey, J. F. Nash, and J. G. Hicks (AIAA J,TN) 188
Turbulent boundary-layer separation at low supersonic Mach numbers. Robert E. Wilson and Franz Maurer (AIAA J,TN) 189
Entrainment theory for compressible, turbulent boundary layers on adiabatic walls. William J. Summer and J. Richard Shanebrook (AIAA J,TN) 330
Turbulent kinetic energy equation for a transpired turbulent boundary layer. L. K. Isaacson and R. J. Christensen (AIAA J,TN) 527
Calculation of relaxing turbulent boundary layers downstream of tangential slot injection. Dennis M. Bushnell (JSR,EN) 550
Eddy viscosity distributions in a Mach 20 turbulent boundary layer. D. M. Bushnell and D. J. Morris (AIAA J,TN) 764
Time-dependent solutions of nonequilibrium dissociating flow past a blunt body. C. P. Li (JSR,EN) 812
Turbulent skin friction for tapered wings. Richard Ross (JA,EN) 836
Thin wing corrections for phase-change heat-transfer data. James L. Hunt and Joan I. Pitts (JSR,EN) 1228
Eddy viscosity model for turbulent pipe flow. Gdalia Kleinstein (AIAA J,TN) 1626
Computation of incompressible turbulent boundary layers at low Reynolds numbers. Tuncer Cebeci and G. J. Mosinskis (AIAA J,TN) 1632
Erratum: "Analytical prediction of the incompressible turbulent boundary layer with arbitrary pressure distribution" George S. Deiwert and Douglas E. Abbott (JH,TC) 40
Comment on "Flow of dilute polymer solutions in rough pipes" A. G. Fabula and D. M. Nelson (JH,TC) 153
——Reply by author to A. G. Fabula and D. M. Nelson. M. Poreh (JH,TC) 155

Boundary Layer Stability and Transition

Stability of plane Poiseuille flows of viscoelastic liquids: An asymptotic solution. Dean T. Mook and William P. Graebel (JH) 20
Influence of asymmetric transition on re-entry vehicle characteristics. A. Martellucci and R. S. Neff (JSR) 476
Aerodynamic characteristics of a slender body traveling in a tube. Theodore R. Goodman (AIAA J) 712
Supersonic boundary-layer transition: Effects of roughness and freestream disturbances. S. R. Pate (AIAA J) 797
Measurements and correlations of transition Reynolds numbers on sharp slender cones at high speeds. S. R. Pate (AIAA J) 1082
An analysis of plume-induced boundary-layer separation. Michael C. Fong (JSR) 1107
Integral theory for the instability of laminar compressible wakes behind slender bodies. Denny R. S. Ko (AIAA J) 1777
Observations on the transition process of two-dimensional supersonic wakes. Anthony Demetriades (AIAA J) 2128
Use of a variational method for solving viscoelastic stability problems. Dean T. Mook and Richard P. Benedict (JH,EN) 38
Drag reduction by use of MHD boundary-layer control. Gordon F. Anderson and Yung-Kuang Wu (JH,EN) 150
Wall curvature and transition effects in turbulent boundary layers. Tuncer Cebeci (AIAA J,TN) 1868
Hot wire measurements of freestream and shock layer disturbances. R. D. Wagner (AIAA J,TN) 2468
Hypersonic boundary-layer transition in the presence of wind-tunnel noise. P. Calvin Stainback (AIAA J,TN) 2475

Subsonic and Transonic Flow

A study of the magnus effects on a sounding rocket at supersonic speeds. James C. Uselton and Jack B. Carman (JSR) 28
Inlet vortex. J. L. Colehour and B. W. Farquhar (JA) 39
Calculation of plane steady transonic flows. Earll M. Murman and Julian D. Cole (AIAA J) 114
An efficient, steady, subsonic collocation method for solving lifting-surface problems. Atlee M. Cunningham, Jr. (JA) 168
——Comments on "An efficient, steady subsonic collocation method for solving lifting-surface problems." James D. Revell (JA,TC) 191
——Reply by author to J. D. Revell. A. M. Cunningham Jr. (JA,TC) 192
Predictions of vortex-lift characteristics by a leading-edge suction analogy. Edward C. Polhamus (JA) 193
Inlet dynamics and compressor surge. Ronald A. Mays (JA) 219
Some experimental results on sphere and disk drag. Frederick W. Roos and William W. Willmarth (AIAA J) 285
Transonic flight and wind-tunnel buffet onset investigation of the F-8D aircraft. E. K. Damstrom and J. F. Mayes (JA) 263
Dynamic instability of finned missiles caused by unbalanced fin forces. Daniel H. Platus (AIAA J) 378
Application of the doublet-lattice method to nonplanar configurations in subsonic flow. T. P. Kalman, W. P. Rodden, and J. P. Giesing (JA) 406
A theory of the high-aspect-ratio jet flap. Keith P. Kerney (AIAA J) 431
Application of random data techniques to aircraft inlet diagnostics. R. C. Crites and M. V. Heckart (JA) 502
Effects of leading-edge vortex flow on the roll damping of slender wings. Richmond P. Boyden (JA) 543
Experimental investigation of incompressible flow past airfoils with oscillating jet flaps. John M. Simmons and Max F. Platzer (JA) 587
Testing of cylinders in sheared flow. Melvin E. Snyder Jr. (JA) 593
A lifting-surface solution for vortex-induced airloads. Wayne Johnson (AIAA J) 689
Calculated transonic flow past slender fuselages and afterbodies. Martin R. Fink (JA) 710
Transonic flow in nozzles using the method of integral relations. S. G. Liddle and R. D. Archer (JSR) 722
Determination of F-4 aircraft transonic buffet characteristics. E. G. Hollingsworth and M. Cohen (JA) 757
Separation and reattachment in transonic airfoil flow. E. Stanewsky and B. H. Little (JA) 952
A multivortex method for axisymmetric bodies at angle of attack. Silvio B. Angelucci (JA) 959
Fluid mechanics of train-tunnel systems in unsteady motion. Miklos Sajben (AIAA J) 1538
Aerodynamics of slender bodies and wing-body combinations at $M\infty = 1$. John R. Spreiter and Stephen S. Stahara (AIAA J) 1784
Separation controlled transonic drag-rise modification for V-shaped notches. Ronald H. Howell and Helmut H. Korst (AIAA J) 2051
Trajectories of particles suspended in fluid flow through cascades. W. Tabakoff and M. F. Hussein (JA,EN) 60
Measurements of particulated gas flow pressure on cascade nozzles. W. Tabakoff and M. F. Hussein (JA,EN) 121
A correction for compressible subsonic planar flow. Helge Nørstrud (JA,EN) 123
Flow coefficients for supersonic nozzles with comparatively small radius of curvature throats. L. H. Back, and R. F. Cuffel (JSR,EN) 196
Vortices induced in a jet by a subsonic cross flow. N. A. Durando (AIAA J,TN) 325
Vortex shedding from circular cylinders in an oscillating freestream. C. F. Chen and David B. Ballengee (AIAA J,TN) 340
Forces on an inclined circular cylinder in super-critical flow. W. J. Bootle (AIAA J,TN) 514
Subsonic similarity rule for jet-flapped airfoil. Sheldon Elzweig (JA,EN) 744
Convergence-proof of discrete-panel wing loading theories. John DeYoung (JA,EN) 837
A new wind-tunnel technique for providing simulation of flight base flow. J. C. Y. Koh (JSR,EN) 1095
Calculation of a slender body moving through air at supersonic and subsonic velocities. M. L. Wilkins (AIAA J,TN) 2073
Transonic nozzle flow with nonuniform total energy. Dale B. Taulbee and Stanton Boraas (AIAA J,TN) 2102
Downwash-velocity potential method for lifting surfaces. John Kenneth Haviland (AIAA J,TN) 2268
Transonic flows by coordinate transformation. P. O. Baronti, S. Elzweig, and R. Vaglio-Laurin (AIAA J,TN) 2280
A wake-blockage in a perforated wall wind tunnel. M. Mokry (AIAA J,TN) 2462
Comments on "Flow with $M\infty = 1$ past thin airfoils." Graeme R. Kittson (AIAA J,TC) 1886

Supersonic and Hypersonic Flow

Hypersonic characteristics of sharp cones at angles of attack. Benjamin Diamant and Paul K. Chang (JSR,SYN) 1105
Survey of viscous interactions associated with high Mach number flight. Robert H. Korkegi (AIAA J,SA) 771
Predictions of vortex-lift characteristics by a leading-edge suction analogy. Edward C. Polhamus (JA) 193
Interaction of sonic transverse jets with supersonic external flows. C. C. Lee and B. F. Barfield (AIAA J) 304
Two-dimensional analysis of transonic gas-particle flows in axisymmetric nozzles. Joseph F. Regan, H, Doyle Thompson, and Richard F. Hoglund (JSR) 346
Expanding role of potential theory in supersonic aircraft design. E. Bonner (JA) 347
Some aspects of two-phase flows with mixing and combustion in bounded and unbounded flows. John Genovese, Raymond B. Edelman, and Owen F. Fortune (JSR) 352
Flutter of clamped skew panels in supersonic flow. Somayajulu Durvasula (JA) 461
Investigation of injectant properties on jet penetration in a supersonic stream. R. E. Reichenbach and K. P. Horn (AIAA J) 469
Comparison of free-flight experimental results with theory on the nonlinear aerodynamic effects of bluntness for slender cones at Mach Number 17. Gerald N. Malcolm and John V. Rakich (AIAA J) 473
Missile aerodynamic predictions to 180°. Millard L. Howard, Eugene N. Brooks, Jr., and Bernard F. Saffell Jr. (JSR) 488

Studies of engine-airframe integration on hypersonic aircraft. P. J. Johnston, J. M. Cubbage, and J. P. Weidner (JA) 495
A comparative study of three axisymmetric inlets for a hypersonic cruise mission. Daniel P. Bencze and Norman E. Sorensen (JA) 516
Prediction of interference loading on aircraft stores at supersonic speeds. F. Dan Fernandes (JA) 633
Application of heat and force fields to sonic-boom minimization. David S. Miller and Harry W. Carlson (JA) 657
Hypersonic flow on yawed wedges with leading-edge bluntness and viscous interaction. R. C. Boger and G. F. Aiello (JSR) 729
Theoretical analysis of vortex shedding from bodies of revolution in coning motion. G. D. Kuhn, S. B. Spangler, and J. N. Nielsen (AIAA J) 784
Boundary-layer pitot and hot-wire surveys at $M\infty \approx 20$. M. C. Fischer, D. V. Maddalon, L. M. Weinstein, and R. D. Wagner Jr. (AIAA J) 826
Analytic difficulties in predicting dynamic effects of separated flow. Lars E. Ericsson, J. Peter Reding, and Rolf A. Guenther (JSR) 872
An experimental investigation of the flowfield around a yawed cone. R. H. Feldhuhn, A. E. Winkelmann, and L. Pasiuk (AIAA J) 1074
An analysis of plume-induced boundary-layer separation. Michael C. Fong (JSR) 1107
Comparison of theoretical and flight-measured ionization in a blunt body re-entry flowfield. P. W. Huber, J. S. Evans, and C. J. Schexnayder Jr. (AIAA J) 1154
Supersonic flow of nonuniform freestreams past aerodynamic decelerators. Frankie G. Moore, Fred R. DeJarnette and Eugene N. Brooks Jr. (JSR) 1169
Shock-capturing, finite-difference approach to supersonic flows. Paul Kutler and Harvard Lomax (JSR) 1175
Experimental investigation of the effects of base mass addition on the near wake of a slender body. John E. Lewis, Wilhelm Behrens, and Donald J. Collins (AIAA J) 1506
A theory of supersonic flow past steady and oscillating blunt bodies of revolution. S. S-H. Chang (AIAA J) 1754
Integral theory for the instability of laminar compressible wakes behind slender bodies. Denny R. S. Ko (AIAA J) 1777
Experimental investigation of the expansion of moist air around a sharp corner. Leo T. Smith (AIAA J) 2035
Observations on the transition process of two-dimensional supersonic wakes. Anthony Demetriades (AIAA J) 2128
Adiabatic laminar boundary-layer/shock-wave interactions on flared axisymmetric bodies. Harry P. Horton (AIAA J) 2141
Flow coefficients for supersonic nozzles with comparatively small radius of curvature throats. L. H. Back and R. F. Cuffel (JSR,EN) 196
Static pressure measurements near an oblique shock wave. L. H. Back and R. F. Cuffel (AIAA J,TN) 345
Disintegration of a supersonic jet impinging normally on a flat plate. T. Nakatogawa, M. Hirata, and Y. Kukita (JSR,EN) 410
Use of flow variable gradients in design calculations of inlets. Raymond Sedney (JA,EN) 487
Comparative performances of two hypersonic deceleration devices. L. W. Sims, C. H. Bursey Jr., and R. J. Berman (JSR,EN) 538
New information on the two-dimensional jet interaction problem. William J. Thayer III (AIAA J,TN) 539
Kernel function for nonplanar oscillating surfaces in supersonic flow. Robert L. Harder and William P. Rodden (JA,EN) 677
Lift and drag of a wing-cone configuration in hypersonic flow. Adolfo Reggiori (AIAA J,TN) 744
Comparison of hypersonic aerodynamic deceleration systems based on gun-tunnel investigation. Wolfgang Wyborny and Hans-Peter Kabelitz (JSR,EN) 892
Measurements of shock wave location in hypersonic nitrogen flow. Mervin E. Hillard Jr., William D. Harvey, and M. Lawrence Emory (JSR,EN) 1004
Roughness effects on heat transfer in the supersonic region of a conical nozzle. Meyer Reshotko (JSR,EN) 1097
Injection into a supersonic stream from the windward side of sweptback injectors at angle of attack. M. Hersch and L. A. Povinelli (JSR,EN) 1101
Slipstream formed by a supersonic source in a hypersonic stream. Anthony M. Agnone (AIAA J,TN) 1419
Experimental investigation of the lee-side flow from a cone-cylinder model. Alfred M. Morrison and Charles W. Ingram (AIAA J,TN) 1421
Use of Padé fractions in the calculation of blunt body flows. Andrew H. Van Tuyl (AIAA J,TN) 1431
Laminar convective heat-transfer rates on a hemisphere cylinder in rarefied hypersonic flow. David E. Boylan (AIAA J,TN) 1661
Alleviation of vortex-induced heating to the lee side of slender wings in hypersonic flow. Allen H. Whitehead Jr. and Mitchel H. Bertram (AIAA J,TN) 1870
Molecular beam extraction from equilibrium gas flows. Ulf Bossel (AIAA J,TN) 2060
Exact numerical solutions for transient shear stress and boundary-layer induced pressure. Czeslaw M. Rodkiewicz and Roop N. Gupta (AIAA J,TN) 2075
Flap span effects on boundary-layer separation. Karlheinz O. W. Ball (AIAA J,TN) 2080
Transition and turbulence phenomena in supersonic wakes of wedges. Wilhelm Behrens, John E. Lewis, and Wilmot H. Webb (AIAA J,TN) 2083
Hypersonic flow over a rearward facing step. J. S. Shang, Wilber L. Hankey, and Douglas L. Dwoyer (AIAA J,TN) 2085
Sonic boom minimization including both front and rear shocks. A. R. George and R. Seebass (AIAA J,TN) 2091
Development of a sonic boom simulator with detonable gasses. R. T. Strugielski, L. E. Fugelso, and W. J. Bryne (AIAA J, (AIAA J,TN) 2266
Aerodynamic characteristics of slender wedge-wings in hypersonic strong interaction flows. C. M. Rodkiewicz and T. K. Chattopadhyay (AIAA J,TN) 2280
Approximate analytic solution for the position and strength of shock waves about cones in supersonic flow. Sanford S. Davis (AIAA J,TN) 2287
A new area rule for hypersonic wing-bodies. N. Malmuth (AIAA J,TN) 2460
Nonaffine similarity laws for power-law bodies. Howard Jaslow (AIAA J,TN) 2466
Erratum: "Prediction of geometry of sonic boom waves incident on arbitrarily oriented plane walls." Balusu M. Rao and Glen W. Zumwalt (JA,TC) 64
Comment on "Similarity rule estimation methods for cone flow with variable gamma." Ta-jin Kuo (AIAA J,TC) 1216
——Reply by author to Ta-jin Kuo. E. F. Blick (AIAA J,TC) 1216
Comment on "Analysis of an active thermal protection system for high-altitude flight." A. F. Mills (AIAA J,TC) 1439
——Reply by author to A. F. Mills. Paul A. Libby (AIAA J,TC) 1440

Nozzle and Channel Flow

Three-dimensional thrust nozzle design for maximum axial thrust. Lynn E. Snyder and H. Doyle Thompson (AIAA J,SYN) 1891
Incompressible flow in conical contractions using the method of integral relations. S. G. Liddle and R. D. Archer (JH) 25
Two-dimensional analysis of transonic gas-particle flows in axisymmetric nozzles. Joseph F. Regan, H. Dotle Thompson, and Richard F. Hoglund (JSR) 346
Some aspects of two-phase flows with mixing and combustion in bounded and unbounded flows. John Genovese, Raymond B. Edelman, and Owen F. Fortune (JSR) 352
Effects of engine exhaust flow on boattail drag. Dave Bergman (JA) 434
Jet flap diffuser: A new thrust amplifying device. Jean-Pierre Morel and Peter B. S. Lissaman (JA) 491
Computer study of nonequilbrium excitation in recombining nitrogen plasma nozzle flows. Stuart W. Bowen and Chul Park (AIAA J) 493
Correlation of turbofan engine thrust performance with compound nozzle flow theory. M. R. L'Ecuyer, J. J. Morrison, and W. E. Mallett (JA) 510
Incompressible, viscous, swirling flow through a nozzle. A. Mager (AIAA J) 649
Transonic flow in nozzles using the method of integral relations. S. G. Liddle and R. D. Archer (JSR) 722
Electron-beam studies of viscous flow in supersonic nozzles. Dietmar E. Rothe (AIAA J) 804
Some numerical results on viscous low-density nozzle flows in the slender-channel approximation. William J. Rae (AIAA J) 811
Exhaust nozzle drag: Engine vs airplane force model. Dave Bergman (JA) 825
Design and development of a fluidic chamber pressure control subsystem for the NERVA engine. J. J. Carroll, G. W. Felsing, J. D. Mockenhaupt, E. A. Sheridan, and W. S. Lewellen (JSR) 966
Prediction of installed nozzle flowfields. W. Presz Jr., M. Konarski, and E. Grund (JA) 988
Electron-ion recombination in a sonic orifice flow. Richard C. Jenkins (AIAA J) 1383
Effect of suspended solid particles on the properties in cascade flow. W. Tabakoff and M. F. Hussein (AIAA J) 1514
Design of maximum thrust plug nozzles for fixed inlet geometry. Robert P. Humphreys, H. Doyle Thompson, and Joe D. Hoffman (AIAA J) 1581
Vortex breakdown in swirling conical flows. Turgut Sarpkaya (AIAA J) 1792
Maximum thrust nozzles for nonequilibrium simple dissociating gas flows. M. Peter Scofield and Joe D. Hoffman (AIAA J) 1824
Effects of swirling inlet flow on pressure recovery in conical diffusers. A. T. McDonald, R. W. Fox, and R. V. Van Dewoestine (AIAA J) 2014
Inviscid flow through cascades in oscillatory and distorted flow. B. Schorr and K. C. Reddy (AIAA J) 2043
Calculation of theoretical equilibrium nozzle throat conditions when velocity of sound is discontinuous. Sanford Gordon (AIAA J, TN) 179
Flow coefficients for supersonic nozzles with comparatively small radius of curvature throats. L. H. Back and R. F. Cuffel (JSR,EN) 196
Injector design criteria using noncircular orifice geometry. R. M. McHale, W. H. Nurick, and S. D. Clapp (JSR,EN) 408
Analysis of sprays from rocket engine injectors. W. H. Nurick (JSR,EN) 796
Conical nozzle flow in the rarefied regime. G. T. Patterson and M. W. Milligan (JSR,EN) 798
Heat-transfer optimization of convergent section of a hypersonic flow nozzle. Tarit Kumar Bose and T. R. Sankaranarayanan (JSR,EN) 1090
Roughness effects on heat transfer in the supersonic region of a conical nozzle. Meyer Reshotko (JSR,EN) 1097

XUM

A channel test device for arc jet material ablation studies. Robert E. Sheldahl, George F. Wright, Jr., and Erich Muehlberger (JSR,EN) 1162
Water and oxygen particles in space from Apollo missions. Ravi D. Sharma, M. L. Kratage and A. C. Buffalano (JSR,EN) 1230
Mass blocking of swirling flow in nozzles. Cheng-Ting Hsu (JSR,EN) 1232
Some measurement in pipe flow. B. Bose (AIAA J,TN) 1405
Similar solutions in vibrational nonequilibrium nozzle flows. N. Muniswamy Reddy and Fred L. Daum (AIAA J,TN) 1622
Eddy viscosity model for turbulent pipe flow. Gdalia Kleinstein (AIAA J,TN) 1626
Supersonic nozzle discharge coefficients at low Reynolds numbers. N. M. Kuluva and G. A. Hosack (AIAA J,TN) 1876
Thermodynamic properties and nozzle flow of hydrogen to 1000 atm and 100,000°K. R. W. Patch (AIAA J,TN) 2298
A wake-blockage paradox in a perforated wall wind tunnel. M. Mokry (AIAA J,TN) 2462
Comment on "Choked Flow: A generalization of the concept and some experimental data." Anthony M. Agnone (AIAA J,TC) 768
——Reply by authors to A. M. Agnone. Harold J. Hoge and Ronald A. Segars (AIAA J,TC) 768

Rarefied Flows

Rarefied hypersonic flow about cones and flat plates by Monte Carlo simulation. F. W. Vogenitz and G. Y. Takata (AIAA J) 94
Method-of-characteristics solution of rarefied, monatomic gaseous jet expansion into a vacuum. S. J. Robertson and D. R. Willis (AIAA J) 291
——Comments on "Method-of-characteristics solution of a rarefied, monatomic, gaseous jet expansion into a vacuum." R. E. Grundy (AIAA J,TC) 2302
——Reply by authors to R. E. Grundy. S. J. Robertson and D. R. Willis (AIAA J,TC) 2302
Spherical expansions into vacuum: A higher-order analysis. D. R. Thomas (AIAA J) 451
Electron-beam studies of viscous flow in supersonic nozzles. Dietmar E. Rothe (AIAA J) 804
Some numerical results on viscous low-density nozzle flows in the slender-channel approximation. William J. Rae (AIAA J) 811
Hot-wire anemometry in low-density flows. E. M. Schmidt and R. J. Cresci (AIAA J) 2019
Mach disk in underexpanded exhause plumes. Michael Abbett (AIAA J,TN) 512
Design data for a disk rotating in a rarefied environment. D. G. Barbee, T. Shih, and P. H. Newell Jr. (JA,EN) 674
Inclination of pressure orifices in low-density flow. K. Kienappel (AIAA J,TN) 749
Normal momentum transfer on ideal crystalline surfaces. R. H. Notter and N. F. Sather (AIAA J,TN) 965
Transition regime sphere drag near the free molecule limit. Winfred M. Phillips and A. R. Kuhlthau (AIAA J,TN) 1434
Absolute velocity determination in a hypersonic low-density flow. K. A. Butefisch (AIAA J,TN) 1639
Laminar convective heat-transfer rates on a hemisphere cylinder in rarefied hypersonic flow. David E. Boylan (AIAA J,TN) 1661
Sharp slender cones in near-free-molecule hypersonic flow. M. I. Kussoy, D. A. Stewart, and C. C. Horstman (AIAA J,TN) 1879
Molecular beam extraction from equilibrium gas flows. Ulf Bossel (AIAA J,TN) 2060

Multiphase Flows

Breakup of liquid sheets and jets in a supersonic gas stream. Allan Sherman and Joseph Schetz (AIAA J) 666
Particle trajectories, heating, and breakup in hypersonic shock layers. G. D. Waldman and W. G. Reinecke (AIAA J) 1040
Effect of suspended solid particles on the properties in cascade flow. W. Tabakoff and M. F. Hussein (AIAA J) 1514
An experimental investigation of the stability of a thin liquid layer adjacent to a supersonic stream. William S. Saric and Billy W. Marshall (AIAA J) 1546
Behavior of a liquid jet near the thermodynamic critical region. J. A. Newman and T. A. Brzustowski (AIAA J) 1595
Radiation-resisted shock waves in gas-particle flows. Frank T. Buckley Jr. (AIAA J) 1603
Mixing and combustion in two-phase flows with application to the B-O-H-N system. Raymond B. Edelman, Constantino Economos, and John Boccio (AIAA J) 1935
Particulate matter in the exhaust of a boron-loaded solid propellant. A. M. Mellor (AIAA J) 1944
Experimental investigation of the expansion of moist air around a sharp corner. Leo T. Smith (AIAA J) 2035
Pitot pressure in hypersonic flow with condensation. D. D. McBride and P. M. Sherman (AIAA J) 2354
Optical technique for the measurement of local velocities in single- and two-phase flowfields. R. J. Burick, G. L. Cline, and R. N. Gurnitz (JSR,EN) 529
Chemical nonequilibrium boundary-layer effects on a simulated space shuttle configuration during re-entry. John C. Adams, Jr. (JSR,EN) 683
Pressure distribution on blades in cascade nozzle for particulate flow. W. Tabakoff and M. F. Hussein (JA,EN) 736
Stability of a liquid film. Ali Hasan Nayfeh and William S. Saric (AIAA J,TN) 750
Migration of a large gas-bubble under the lack of gravity in a rotating liquid. Helmut F. Bauer (AIAA J,TN) 1426
Condensation augmented velocity of a supersonic stream. P. M. Sherman (AIAA J,TN) 1628
Radiation from a porous wall heated internally by a gas. W. W. Short (AIAA J,TN) 1640
Underexpanded jets of liquid-gas bubble mixtures. Armand Gosselin and S. C. Kranc (AIAA J,TN) 1645
Mean curvature of a deformed spherical surface. L. K. Russell (AIAA J,TN) 1882

Reactive Flows

Structure of nonequilibrium boundary layer along a flat plate in a partially ionized gas. Michio Nishida and Kazuoki Matsuoka (AIAA J,SYN) 2117
Electron thermochemical nonequilibrium effects in re-entry boundary layers. Doyle D. Knight (AIAA J) 193
Control jet interaction investigation. Bob G. Gilman (JSR) 334
Reaction between oxygen difluoride and diborane: Kinetics and a proposed mechanism. Robert A. Rhein (AIAA J) 353
Computer study of nonequilibrium excitation in recombining nitrogen plasma nozzle flows. Stuart W. Bowen and Chul Park (AIAA J) 493
Dynamic of an explosive reaction center. L. J. Zajac and A. K. Oppenheim (AIAA J) 545
Spectra and temperature of propellant flames during depressurization. A. D. Baer, N. W. Ryan, and E. B. Schulz (AIAA J) 869
Comparison of theoretical and flight-measured ionization in a blunt body re-entry flowfield. P. W. Huber, J. S. Evans, and C. J. Schexnayder Jr. (AIAA J) 1154
Flat plate boundary-layer studies in a partially ionized gas. Raymond C. Tseng and L. Talbot (AIAA J) 1365
Electron-ion recombination in a sonic orifice flow. Richard C. Jenkins (AIAA J) 1383
Mean and fluctuating electron density in equilibrium turbulent boundary layers. Anthony Demetriades and Richard Grabow (AIAA J) 1533
Electron-density and electron-temperature measurements in boundary layers. Michael G. Dunn (AIAA J) 1561
Heterogeneous rate coupling for graphite oxidation. J. R. Baron and H. Bernstein (AIAA J) 1588
Measurements in ablating air-teflon boundary layers. John H. Chang and R. E. Center (AIAA J) 1819
Maximum thrust nozzles for nonequilibrium simple dissociating gas flows. M. Peter Scofield and Joe D. Hoffman (AIAA J) 1824
Reactive stream separation photography. D. T. Campbell, S. D. Clapp, R. L. Proffit, and G. L. Cline (AIAA J) 1832
Studies of translational freezing in free expanding jets using molecular beam techniques. Franco Torello (AIAA J) 1843
Mixing and combustion in two-phase flows with application to the B-O-H-N system. Raymond B. Edelman, Constantino Economos, and John Boccio (AIAA J) 1935
Measurement $C^+ + e^- + e^-$ and $CO^+ + e^-$ recombination in carbon monoxide flows. Michael G. Dunn (AIAA J) 2184
An electrostatic probe technique for determining the effectiveness of plasma alleviants. T. Luzzi and R. Jenkins (AIAA J) 2411
Calculation of theoretical equilibrium nozzle throat conditions when velocity of sound is discontinuous. Sanford Gordon (AIAA J, TN) 179
A method for computing the nonequilibrium radiant emission from near-equilibrium shock layers. Gene P. Menees (AIAA J,TN) 351
Nonequilibrium dissociating nitrogen flow over a circular cylinder. H. G. Hornung (AIAA J,TN) 1198
Electron number density at shock front due to precursor photoionization. S. S. R. Murty (AIAA J,TN) 1427
Similar solutions in vibrational nonequilibrium nozzle flows. N. Muniswamy Reddy and Fred L. Daum (AIAA J,TN) 1622
Population inversions behind normal shock waves. John D. Anderson Jr. and Michael T. Madden (AIAA J,TN) 1630
Influence of the injection conditions on the ignition of methane and hydrogen in a hot Mach 2 air stream. K. Bier, G. Kappler, and H. Wilhelmi (AIAA J,TN) 1865

Shock Waves and Detonations

Development of a double-oblique-shock scramjet model in a shock tunnel. I. T. Osgerby, H. K. Smithson, and D. A. Wagner (JA) 258
Particle trajectories, heating, and breakup in hypersonic shock layers. G. D. Waldman and W. G. Reinecke (AIAA J) 1040
An experimental study of the shock structure in a partially ionized gas. R. H. Kirchhoff and L. Talbot (AIAA J) 1098
Radiation-resisted shock waves in gas-particle flows. Frank T. Buckley Jr. (AIAA J) 1603

Shock-tube study of vibrational relaxation in carbon monoxide using pressure measurements. Ronald K. Hanson (AIAA J) 1811
Sonic boom reflection factors for flight near the threshold Mach number. Charles Thomas (JA,EN) 490
Application of transformation methods to wedge-shock/boundary-layer interactions. Donald R. Kotansky (AIAA J,TN) 731
Comparison of hypersonic aerodynamic deceleration systems based on gun-tunnel investigation. Wolfgang Wyborny and Hans-Peter Kabelitz (JSR,EN) 892
Direct measurement of the thermal conductivity of shock heated argon. R. Ewald and H. Grönig (AIAA J, TN) 946
Decay of a boundary-layer induced shock. Girard A. Simons (AIAA J,TN) 1417
Electron number density at shock front due to precursor photoionization. S. S. R. Murty (AIAA J,TN) 1427
Maximum turning angle across an oblique shock. Philip A. Thompson (AIAA J,TN) 1436
A high-performance shock tube with air driver. R. J. Storker, G. J. Healey, D. W. M. Kerr, and J. G. Bennett (AIAA J,TN) 1646
Measurements of the duration of constant reflected-shock tunnel. D. J. Monson (AIAA J,TN) 1872
Delta wing shock shape at hypersonic speed. Dhanvada Madhava Rao (AIAA J,TN) 2093
Development of a sonic boom simulator with detonable gases. R. T. Strugielski, L. E. Fugelso, and W. J. Byrne (AIAA J,TN) 2266
Approximate analytic solution for the position and strength of shock waves about cones in supersonic flow. Sanford S. Davis (AIAA J,TN) 2287
Nonequilibrium stagnation-point boundary-layer in a partially ionized gas. K. Matsuoka and M. Nishida (AIAA J,TN) 2457
An analytical method for real gas tailoring in a shock tube. N. M. Reddy (AIAA J,TN) 2458

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Optical crossed-beam measurements of turbulence intensities in a subsonic jet shear layer. M. Y. Su and F. R. Krause (AIAA J,SYN) 2113
Development of a double-oblique-shock scramjet model in a shock tunnel. I. T. Osgerby, H. K. Smithson, and D. A. Wagner (JA) 258
Anemometer measurements of velocity and density in projectile wakes. Jay Fox and Harald Rungaldier (AIAA J) 270
Interaction of sonic transverse jets with supersonic external flows. C. C. Lee and B. F. Barfield (AIAA J) 304
Vortex wakes behind high-lift wings. J. E. Hackett and M. R. Evans (JA) 334
Multiple jets exhausting into a crossflow. H. Ziegler and P. T. Wooler (JA) 414
Investigation of injectant properties on jet penetration in a supersonic stream. R. E. Reichenbach and K. P. Horn (AIAA J) 469
Experimental investigation to the mean flow of the laminar supersonic cone wake. Dennis K. McLaughlin, James E. Carter, Morton Finston, and J. Alan Forney (AIAA J) 479
Evolution of the laminar wake behind a flat plate and its upstream influence. L. I. Schneider and V. E. Denny (AIAA J) 655
Breakup of liquid sheets and jets in a supersonic gas stream. Allan Sherman and Joseph Schetz (AIAA J) 666
An experimental investigation of the interaction between a transverse sonic jet and a hypersonic stream. V. Zakkay, W. Calarese, and L. Sakell (AIAA J) 674
Experimental investigation of the stability of the laminar supersonic cone wake. Dennis K. McLaughlin (AIAA J) 696
Results of a strong interaction, wake-like model of supersonic separated and reattaching turbulent flows. Louis G. Hunter Jr. and Barry L. Reeves (AIAA J) 703
——Comment on "Results of a strong interaction, wake-like model of supersonic separated and reattaching flows." T. J. Kessler and R. H. Page (AIAA J,TC) 2478
——Reply by authors to T. J. Kessler and R. H. Page. Louis G. Hunter and Barry L. Reeves (AIAA J,TC) 2478
Calculated transonic flow past slender fuselages and afterbodies. Martin R. Fink (JA) 710
Penetration and mixing of multiple gas jets subjected to a cross flow. Leonard S. Cohen, Lawrence J. Coulter, and William J. Egan Jr. (AIAA J) 718
Theoretical analysis of vortex shedding from bodies of revolution in coning motion. G. D. Kuhn, S. B. Spangler, and J. N. Nielsen (AIAA J) 784
Jet aircraft air pollutant production and dispersion. John B. Heywood, James A. Fay, and Lawrence H. Linden (AIAA J) 841
Experimental stability studies in wakes of two-dimensional slender bodies at hypersonic speeds. Wilhelm Behrens and Denny R. S. Ko (AIAA J) 851
Airfoils in two-dimensional nonuniformly sheared slipstreams. G. R. Ludwig and J. C. Erickson Jr. (JA) 874
Separation and reattachment in transonic airfoil flow. E. Stanewsky and B. H. Little (JA) 952
A unified analysis of gaseous jet penetration. F. S. Billig, R. C. Orth, and M. Lasky (AIAA J) 1048
Intermediate altitude rocket exhaust plumes. J. C. Tannehill and E. W. Anderson (JSR) 1052
Acoustic characteristics of a high-subsonic jet. L. Maestrello and E. McDaid (AIAA J) 1058
A turbulent mixing coefficient correlation for coaxial jets with and without secondary flows. L. W. Tufts and L. D. Smoot (JSR) 1183
Inviscid solution of the steady, hypersonic near wake by a time-dependent method. John I. Erdos and Victor Zakkay (AIAA J) 1287
Experimental investigation of the effects of base mass addition on the near wake of a slender body. John E. Lewis, Wilhelm Behrens, and Donald J. Collins (AIAA J) 1506
Application of hot-wire anemometry and digital techniques to measurements in a turbulent helium jet. John Way and Paul A. Libby (AIAA J) 1567
Turbulent boundary-layer shock interaction with and without injection. E. Alzner and V. Zakkay (AIAA J) 1769
Integral theory for the instability of laminar compressible wakes behind slender bodies. Denny R. S. Ko (AIAA J) 1777
Studies of translational freezing in free expanding jets using molecular beam techniques. Franco Torello (AIAA J) 1843
Mixing and combustion in two-phase flows with application to the B-O-H-N system. Raymond B. Edelman, Constantino Economos, and John Boccio (AIAA J) 1935
Motion of freely falling spheres at moderate Reynolds numbers. Hermann Viets and D. A. Lee (AIAA J) 2038
Separation controlled transonic drag-rise modification for V-shaped notches. Ronald H. Howell and Helmut H. Korst (AIAA J) 2051
Observations on the transition process of two-dimensional supersonic wakes. Anthony Demetriades (AIAA J) 2128
Mixing of a shallow submerged heated water jet with an ambient reservoir. Bal M. Mahajan and James E. A. John (AIAA J) 2135
Adiabatic laminar boundary-layer/shock-wave interactions on flared axisymmetric bodies. Harry P. Horton (AIAA J) 2141
Reduction of noise from supersonic jet flows. Darshan S. Dosanjh, James C. Yu, and Amr N. Abdelhamid (AIAA J) 2346
Flowfield analysis of plumes of two-dimensional underexpanded jets by a time-dependent method. Ram Sinha, Victor Zakkay, and John Erdos (AIAA J) 2363
Equilibrium vortex positions. Donald D. Seath (JSR,EN) 72
Wave structure of exhaust from transonic aircraft. Allen E. Fuhs (JA,EN) 280
Vortices induced in a jet by a subsonic cross flow. N. A. Durando (AIAA J,TN) 325

Vortex wakes behind high-lift wings. J. E. Hackett and M. R. Evans (JA) 334
A general theory of aircraft response to three-dimensional turbulence. Frederick D. Eichenbaum (JA) 353
Obtaining nonlinear aerodynamic stability coefficients from free-angular motion of rigid bodies. Charles W. Ingram and John D. Nicolaides (JSR) 390
Approximate transfer functions for large aspect ratio wings in turbulent flow. L. T. Filotas (JA) 395
Unsteady airfoil stall, review and extension. Lars E. Ericsson and J. Peter Reding (JA) 609
Some considerations relative to the prediction of unsteady air loads on lifting configurations. Holt Ashley (JA) 747
Generalized aerodynamic forces on a flexible plate undergoing transient motion in a shear flow with an application to panel flutter. E. H. Dowell (AIAA J) 834
A variable phase velocity traveling wave pump. Charles W. Haldeman, John P. Sullivan, and Eugene E. Covert (AIAA J) 1389
Crossflow and unsteady boundary-layer effects on rotating blades. H. A. Dwyer and W. J. McCroskey (AIAA J) 1498
Unsteady entrance flows in elastic tubes with application to the vascular system. Norman R. Kuchar and Simon Ostrach (AIAA J) 1520
A theory of supersonic flow past steady and oscillating blunt bodies of revolution. S. S-H. Chang (AIAA J) 1754
Motion of freely falling spheres at moderate Reynolds numbers. Hermann Viets and D. A. Lee (AIAA J) 2038
Invescid flow through cascades in oscillatory and distorted flow. B. Schorr and K. C. Reddy (AIAA J) 2043
Unsteady supersonic aerodynamic forces on an oscillating circular cylindrical shell. Yuji Matsuzaki and Shigeo Kobayashi (AIAA J) 2358
Entrainment theory for compressible, turbulent boundary layers on adiabatic walls. William J. Sumner and J. Richard Shanebrook (AIAA J,TN) 330
Dynamic stall simulation problems. Lars E. Ericsson and J. Peter Reding (JA,EN) 579
Kernel function for nonplanar oscillating surfaces in supersonic flow. Robert L. Harder and William P. Rodden (JA,EN) 677
Pulsed air gust generator. Joseph Bicknell (JA,EN) 741
Time-dependent solutions of nonequilibrium dissociating flow past a blunt body. C. P. Li (JSR,EN) 812
Effect of unsteady pressure gradient reduction on dynamic stall delay. Franklin O. Carta (JA,EN) 839
Pressure waves for flow induced acoustic resonance in cavities. John B. Miles and George H. Watson (AIAA J,TN) 1402
Pressure and velocity fields in the Sondhauss oscillator. John B. Miles and Charles P. Mentesana (AIAA J,TN) 1436
Establishment time of laminar separated flows. Michael S. Holden (AIAA J,TN) 2296
An analytical method for real gas tailoring in a shock tube. N. M. Reddy (AIAA J,TN) 2458

STRUCTURAL MECHANICS AND MATERIALS

Structural Static Analysis

Elastic postbuckling predictions of plates using discrete elements. T. Y. Yang (AIAA J,SYN) 1665
Fatigue and fracture mechanics. Herbert F. Hardrath (JA,SA) 129
Bone articulations as systems of poroelastic bodies in contact. J. L. Nowinski (AIAA J) 62
Nonlinear dynamic analysis of shells of revolution by matrix displacement method. J. A. Stricklin, J. E. Martinez, J. R. Tillerson, J. H. Hong, and W. F. Haisler (AIAA J) 629
Stress concentration factors for bonded lap joints. Gary R. Wooley and Dale R. Carver (JA) 817
Circular viscoelastic plates subjected to in-plane loads. Samuel L. DeLeeuw (AIAA J) 931
Large deflection analysis of elastic-plastic shells using numerical integration. J. C. Gerdeen, F. A. Simonen and D. T. Hunter (AIAA J) 1012
Triangular plate bending elements with enforced compatibility. J. W. Harvey and S. Kelsey (AIAA J) 1023
Large strain, elasto-plastic finite element analysis. Lawrence D. Hofmeister, Gilbert A. Greenbaum, and David A. Evensen (AIAA J) 1248
A finite element procedure for large deflection analysis of plates with initial deflections. T. Y. Yang (AIAA J) 1468
Asymptotic solution for pressurized noncircular cylinders with nonuniform rings. Joseph E. Flaherty and W. P. Vafakos (AIAA J) 1725
Stress, buckling, and vibration of prismatic shells. David Bushnell (AIAA J) 2004
Fracture behavior of surface-cracked tension elements. Charles E. Feddersen (AIAA J) 2309
Development of 2021 aluminum alloy propellant tanks. Warren Berger and Elliott Willner (JSR,EN) 69
Flexibility coefficients for structural joint assemblies. Saul M. Kaplan (JSR,EN) 76
An approximate analysis technique for design calculations. R. L. Fox and H. Miura (AIAA J,TN) 177
Center deflections of square plates with elastic edge beams. James Ting-Shun Wang (JA,EN) 286
Implicit rigid body motion in curved finite elements. Paul M. Mebane and James A. Stricklin (AIAA J,TN) 344
6-ft-diam metallic diaphragm for fluid storage and positive expulsion systems. David Gleich (JSR,EN) 404
Governing equations for shells of pyrolytic graphite-type materials. R. L. Daugherty, H. S. Kliger, and J. R. Vinson (AIAA J,TN) 508
Laminated orthotropic plates under transverse loading. A. Holston Jr. (AIAA J,TN) 520
A finite element solution for Saint-Venant bending. Gerald F. Lauterbach, Richard J. Peppin, Sherman M. Schapiro, and Joseph L. Krahula (AIAA J,TN) 525
A high-precision triangular cylindrical shell finite element. Garry M. Lindberg and Mervyn D. Olson (AIAA J,TN) 530
Buckling of axially compressed, core-filled cylinders with transverse shear flexibility. Charles W. Bert (JSR,EN) 546
Thermal buckling of rotating orthotropic annular plates. Ernest B. Uthgenannt (JA,EN) 841
Connection between lift and particle displacement. Kenji Inouye (AIAA J,TN) 945
Influence coefficients for pressurized cylindrical shells of finite length. K. Y. Narasimhan (AIAA J,TN) 961
Optimal design of statically determinate beams subject to displacement and stress constraints. G. Dupuis (AIAA J,TN) 981
A specialization of Jones' generalization of the direct-stiffness method of structural analysis. Samuel W. Key (AIAA J,TN) 984
Multiple Fourier method for plate bending. Neville I. Robinson (AIAA J,TN) 1205
Analysis of open noncircular cylindrical shells of short length. P. K. Bhattacharyya (AIAA J,TN) 1396
Stiffness analysis using multi global axes system. Fred W. Beaufait (AIAA J,TN) 1400
Reissner's plate equations in polar coordinates. Y. C. Das and N. S. V. Kameswara Rao (AIAA J,TN) 1411
A new assumed stress hybrid finite element model for solid continua. Satyanadham Atluri (AIAA J,TN) 1647
On the singularity of influence coefficients of the externally pressurized spherical shells. Tatsuzo Koga (AIAA J,TN) 1860
Self-correcting initial value formulations in nonlinear structural mechanics. James A. Stricklin, Walter E. Haisler, and Walter A. Von Riesemann (AIAA J,TN) 2066
Discretization and computational errors in high-order finite elements. Isaac Fried (AIAA J,TN) 2071
Vibration characteristics of flexible beams about nonlinear equilibrium states. George E. Weeks and John E. Jackson (AIAA J,TN) 2081
Tests of cylindrical shell under concentrated loads applied to a reinforcing ring. Arnold Allentuch, Kevin Brady, Eugene Golub, and Joseph Kempner (AIAA J,TN) 2089
Accuracy of Donnell's equations for noncircular cylinders. S. L. Lucas and R. L. Daugherty (AIAA J,TN) 2276
Symmetrical bending of multicore circular sandwich plates. Fakhruddin Abdulhadi (AIAA J,TN) 2278

XUM

N-step conjugate gradient minimization sheme for nonquadratic functions. Isaac Fried (AIAA J,TN) 2286
Stress concentration in a cylindrical shell with an elliptical cutout. Ole Tingleff (AIAA J,TN) 2289
Plane stress analysis of two rigid circular inclusions. Thomas J. Kim and Vijay G. Ukadgaonker (AIAA J,TN) 2294
Self-correcting incremental approach in nonlinear structural mechanics. Donald A. Massett and James A. Stricklin (AIAA J,TN) 2464
Static solution of monoclinic circular plates. J. Padovan and J. Lestingi (AIAA J,TN) 2473
Comment on "Unsymmetrical bending of shells of revolution." Ahmed K. Noor (AIAA J,TC) 990
——Reply by author to A. K. Noor. J. J. Blech (AIAA J,TC) 991

Structural Stability Analysis

Elastic postbuckling predictions of plates using discrete elements. T. Y. Yang (AIAA J,SYN) 1665
Collapse analysis for elliptic cones. B. O. Almroth, F. A. Brogan, and M. B. Marlowe (AIAA J) 32
Effect of a local axisymmetric imperfection on the buckling behavior of a circular cylindrical shell under axial compression. J. W. Hutchinson, R. C. Tennyson and D. B. Muggeridge (AIAA J) 48
Buckling of circular cylindrical shells with different moduli in tension and compression. Robert M. Jones (AIAA J) 53
Buckling of imperfect stiffened cylindrical shells under axial compression. Josef Singer, Johann Arbocz, and Charles D. Babcock, Jr. (AIAA J) 68
Buckling of imperfect elliptical cylindrical shells under axial compression. R. C. Tennyson, M. Booton, and R. D. Caswell (AIAA J) 250
A comparison of methods for the analysis of wing-tail interaction flutter. William E. Triplett, Thomas H. Burkhart, and Edwin B. Birchfield (JA) 361
Designing for combined random loads. James R. Fuller (JSR) 396
Stochastic properties of turbulence excited rotor blade vibrations. Gopal H. Gaonkar and Kurt H. Hohenemser (AIAA J) 419
A study of the buckling of laminated composite plates. T. P. Kicher and J. F. Mandell (AIAA J) 605
Stress and vibration analysis of turbopump inducer blades by finite elements. H. J. Barten, J. A. Scheurenbrand, and D. D. Scheer (JSR) 657
Ring buckling of inflated drag bodies. A. D. Topping (JA) 869
Buckling of stiffened multilayered circular cylindrical shells with different orthotropic moduli in tension and compression. Robert M. Jones (AIAA J) 917
Buckling of circular cylindrical shells having axisymmetric imperfection distributions. R. C. Tennyson, D. B. Muggeridge, and R. D. Caswell (AIAA J) 924
Buckling of transversely isotropic Mindlin plates. E. J. Brunelle (AIAA J) 1018
Computer analysis of imperfection sensitivity of ring-stiffened orthotropic shells of revolution. Gerald A. Cohen (AIAA J) 1032
New design criteria for predicting buckling of cylindrical shells under axial compression. R. C. Tennyson, D. B. Muggeridge, and R. D. Caswell (JSR) 1062
Influence of damping on the dynamic stability of spherical caps under step pressure loading. J. Mescall and T. Tsui (AIAA J) 1244
Buckling of a thin annular plate under uniform compression. Saurindranath Majumdar (AIAA J) 1701
Imperfection sensitivity of axially compressed stringer reinforced cylindrical panels under internal pressure. Wendell B. Stephens (AIAA J) 1713
Buckling of clamped oval cylindrical shells under axial loads. G. Feinstein, Y. N. Chen, and J. Kempner (AIAA J) 1733
Stress, buckling, and vibration of prismatic shells. David Bushnell (AIAA J) 2004
A method of stability analysis of cylindrical shells under biaxial compression. Michael Życzkowski and Stefan Bučko (AIAA J) 2259
Stress and buckling of nonuniformly heated cylindrical and conical shells. David Bushnell and Strether Smith (AIAA J) 2314
Practical methods for elastic collapse analysis for shell structures. F. A. Brogan and B. O. Almroth (AIAA J) 2321
Free vibrations of pressure loaded paraboloidal shells. David S. Margolias and Victor I. Weingarten (AIAA J) 2339
Flexibility coefficients for structural joint assemblies. Saul M. Kaplan (JSR,EN) 76
An optimum design for the instability of cylindrical shells under lateral pressure. B. I. Hyman and A. W. Lucas Jr. (AIAA J,TN) 738
Stress redistribution and instability of rotating beams and disks. E. J. Brunelle (AIAA J,TN) 758
Stability of heavy circular arches with hinged ends. Donald A. DaDeppo and Robert Schmidt (AIAA J,TN) 1200
Effect of angle of attack on boundary-layer transition at Mach 21. Michael C. Fischer and David H. Rudy (AIAA J,TN) 1203
Determination of the stiffness of an elastic bar. Menahem Baruch (AIAA J,TN) 1637
Effect of ring out-of-plane bending stiffness on thermal buckling prediction for ring-stiffened cylinders. David Bushnell (AIAA J,TN) 1653
Stability test for a related Routh-Hurwitz problem. Bertrand T. Fang (AIAA J,TN) 1881
Koiter's modified energy functional for circular cylindrical shells. C. P. Mangelsdorf (AIAA J,TN) 2098
Collapse of elliptic cylinders under uniform external pressure. M. B. Marlowe and F. A. Brogan (AIAA J,TN) 2264
Self-correcting incremental approach in nonlinear structural mechanics. Donald A. Massett and James A. Stricklin (AIAA J,TN) 2464
Comment on "Buckling of orthotropic plates with one free edge." L. M. Lackman (AIAA J,TC) 192

Structural Dynamic Analysis

Cylindrical shell with an axisymmetric moving load. K. Schiffner and C. R. Steele (AIAA J) 37
Monte Carlo dynamic analysis for lunar module landing loads. D. H. Merchant and D. T. Sawdy (JSR) 48
Dynamics of circular periodic structures. Thomas J. McDaniel (JA) 143
Dynamic analysis of stiffened panel structures. R. N. Yurkovich, J. H. Schmidt, and A. R. Zak (JA) 149
Free vibrations of noncircular cylindrical shell segments. Carl Edward Kurt and Donald Edward Boyd (AIAA J) 239
Response of a cylindrical shell to random acoustic excitation. Daniel D. Kana (AIAA J) 425
Flutter of clamped skew panels in supersonic flow. Somayajulu Durvasula (JA) 461
Propagation of harmonic waves in composite circular cylindrical shells. Part II: Numerical analysis. Anthony E. Armenakas (AIAA J) 599
Numerical analysis of rotationally symmetric shells under transient loadings. Troy Alvin Smith (AIAA J) 637
A modal solution for wave propagation in finite shells of revolution. J. P. Raney and J. T. Howlett (JSR) 650
Stress and vibration analysis of turbopump inducer blades by finite elements. H. J. Barten, J. A. Scheurenbrand, and D. D. Scheer (JSR) 657
Dynamic analysis of a flexible vehicle moving along a flexible support. David A. Hunt (JSR) 665
Synthesis of tire equations for use in shimmy and other dynamic studies. L. C. Rogers and H. K. Brewer (JA) 689
Use of reinforced epoxy models to design and analyze aircraft structures. E. I. Riegner and A. E. Scotese (JA) 813
Jet noise excitation of an integrally stiffened panel. Mervyn D. Olson and Garry M. Lindberg (JA) 847
Stress waves in layered thermoelastic media generated by impulsive energy deposition. H. E. Gascoigne and I. K. McIvor (AIAA J) 937
Vibration study of clamped-free elliptical cylindrical shells. John L. Sewall and Christine G. Pusey (AIAA J) 1004
Vibration analysis of structures by component mode substitution. W. A. Benfield and R. F. Hruda (AIAA J) 1255
Reliability of randomly excited structures. J.-N. Yang and E. Heer (AIAA J) 1262
Paramentric response of crooked thin-walled columns. Stanley G. Ebner and Martin L. Moody (AIAA J) 1269
Free vibrations of freely supported oval cylinders. Larry D. Culberson and Donald E. Boyd (AIAA J) 1474
Theory of incomplete models of dynamic structures. Alex Berman and William G. Flannelly (AIAA J) 1481
Propagation of stress waves in fiber-reinforced composite rods. T. R. Tauchert and F. C. Moon (AIAA J) 1492
A method for the Liapunov stability analysis of force-free dynamical systems. Leonard Meirovitch (AIAA J) 1695
Finite-element analysis of large elastic-plastic transient deformations of simple structures. Richard W. H. Wu and Emmett A. Witmer (AIAA J) 1719
Minimum-mass design of a plate-like structure for specified fundamental frequency. Jean-Louis Armand (AIAA J) 1739
Dynamic behavior of liquids in elastic tanks. Ghassan R. Khabbaz (AIAA J) 1985
Dynamic response of an elastic cylindrical shell-solid core composite subject to time-independent loading. John J. Ruminer and Ivor K. McIvor (AIAA J) 1991
Nonlinear vibration of simply supported angle ply laminated plates. James A. Bennett (AIAA J) 1997
Stress, buckling, and vibration of prismatic shells. David Bushnell (AIAA J) 2004
Response of flight vehicles to nonstationary atmospheric turbulence. L. J. Howell and Y. K. Lin (AIAA J) 2201
Local modifications of damped linear systems. R. J. Pomazal and V. W. Synder (AIAA J) 2216
Response of plastic shells with metal cores to transient external pressures. G. S. Samuelsen and Willam Stuiver (AIAA J) 2246
Transverse vibrations of a rotating counterweighted cable of small flexural rigidity. William C. Kerr and Jacob M. Abel (AIAA J) 2326
Free vibrations of pressure loaded paraboloidal shells. David S. Margolias and Victor I. Weingarten (AIAA J) 2339
Dynamic response of a cylindrical shell in a resistant medium. Robert J. Ross and Jao-Shium Kao (JH,EN) 75
Flexibility coefficients for structural joint assemblies. Saul M. Kaplan (JSR,EN) 76
Vibration analysis by differential holographic interferometry. R. Aprahamian and D. A. Evensen (AIAA J,EN) 186

An expression for ring-baffle-slosh-damping under reduced gravity conditions. Harry J. Buchanan and Cornelius C. Shih (JSR,EN) 294
Impulse of a ring with nonlinear material behavior. Joel Sweet (AIAA J,TN) 332
Transient axisymmetric bending stress in an infinte cylindrical shell at an elastic ring stiffener. D. B. Longcope and M. J. Forrestal (AIAA J,TN) 339
Observations on the thermally induced twist of thin-walled open-section booms. Shabeer Ahmed (JSR,EN) 534
Effects of prestress on vibration behavior of certain shells of revolution. Alan M. Ebner (AIAA J,TN) 742
Dynamics of spin-stabilized satellites during extension of long flexible booms. D. B. Cherchas (JSR,EN) 802
Free vibrations of an isotropic nonhomogeneous circular plate. D. M. Mishra and A. K. Das (AIAA J,TN) 963
Vibrations of pressurized orthotropic shells. Clive L. Dym (AIAA J,TN) 1201
Shock and vibration isolation using a nonlinear elastic suspension. T. E. Shoup (AIAA J,TN) 1643
Wave propagation in three-layered plates. Anthony E. Armenàkas and Henry E. Keck (AIAA J,TN) 1855
Stability of transient solution of moderately thick plate by finite-difference method. Tien Yu Tsui and Pin Tong (AIAA J,TN) 2062
Comparison of two numerical methods for the time-wise integration of transient structural response. Robert E. Ball (AIAA J,TN) 2068
Maximal plastic deformation of semi-infinite rods. W. C. Sweatt and W. J. Stronge (AIAA J,TN) 2069
Vibration characteristics of flexible beams about nonlinear equilibrium states. George E. Weeks and John E. Jackson (AIAA J,TN) 2081
Vibration of slightly curved beams of transversely isotropic composite materials. John N. Rossettos (AIAA J,TN) 2273
Elastic-plastic wave cancellation in energy-absorbing materials. J. C. S. Yang (AIAA J,TN) 2451
Comment on "Thermally induced vibration and flutter of flexible booms." Giuliano Augusti (JSR,TC) 202
Comment on "Thermally induced vibration and flutter of a flexible boom." Peter F. Jordan (JSR,TC) 204
——Reply by author to P. F. Jordan and G. Augusti and new results of two-mode approximation based on a rigorous analysis of thermal bending flutter of a flexible boom. Yi-Yuan Yu (JSR,TC) 205
Comment on "Torsional oscillation of an encased hollow cylinder of finite length." G. L. Anderson (JSR,TC) 303
——Reply by author to G. L. Anderson. J. D. Achenbach (JSR,TC) 304
Errata: "Vibrations of pressurized orthotropic cylindrical membranes." Clive L. Dym (AIAA J,TC) 992
Comment on "A direct numerical analysis method for cylindrical and spherical elastic waves." Pravin K. Mehta, Norman Davids, and N. T. Patel (AIAA J,TC) 1887

Aeroelasticity and Hydroelasticity

Dynamics of circular periodic structures. Thomas J. McDaniel (JA) 143
Dynamic analysis of stiffened panel structures. R. N. Yurkovich, J. H. Schmidt, and A. R. Zak (JA) 149
Effects of rotary inertia on the superonic flutter of sandwich panels. Frank A. Marafioti and E. Russell Johnston Jr. (AIAA J) 245
——Comments on "Effects of rotary inertia on the supersonic flutter of sandwich panels." Larry L. Erickson (AIAA J,TC) 2110
——Reply by authors to L. L. Erickson. Frank A. Marafioti and E. Russell Johnston Jr. (AIAA J,TC) 2111
Flutter analysis of rotating cylindrical shells immersed in a circular helical flowfield of air. A. V. Srinivasan (AIAA J) 394
Analysis of nonlinear panel flutter and response under random excitation or nonlinear aerodynamic loading. Franklin E. Eastep and Samuel C. McIntosh Jr. (AIAA J) 411
Interaction of a compressible fluid and an elastic membrane. John C. O'Callahan and Richard Madden (AIAA J) 444
Computer aided stabilator design including aeroelastic constraints. William E. Triplett and Klaus D. Ising (JA) 554
General instability of eccentrically stiffened cylindrical panels. George J. Simitses (JA) 569
An approximate true damping solution of the flutter equation by determinant iteration. Hermann J. Hassig (JA) 885
A two-dimensional theory for rotor blade flutter in forward flight. K. W. Shipman and E. R. Wood (JA) 1008
Optimization of complex structures to satisfy flutter requirements. Carl S. Rudisill and Kumar G. Bhatia (AIAA J) 1487

Unsteady supersonic aerodynamic forces on an oscillating circular cylindrical shell. Yutji Matsuzaki and Shiego Kobayashi (AIAA J) 2358
Structural optimization of a panel flutter problem. Raymond H. Plaut (AIAA J,TN) 182
Kernel function for nonplanar oscillating surfaces in supersonic flow. Robert L. Harder and William P. Rodden (JA,EN) 677
Flutter of a buckled plate exposed to a static pressure differential. C. S. Ventres (AIAA J,TN) 958
Supersonic membrane flutter. David J. Johns (AIAA J,TN) 960

Hypervelocity Impact

Calculated equilibrium composition and radiation of metallic plasmas produced in hypervelocity impact. Kenneth E. Harwell, James L. Reid, and Albert R. Hughes (JSR) 358
Large deformation, deep peneration theory for a compressible strain-hardening target material. Sathya Hanagud and Bernard Ross (AIAA J) 905
Artificial simulation of micrometeoroids. Siegfried Auer (AIAA J,TN) 516

Properties of Materials

Fatigue and fracture mechanics. Herbert F. Hardrath (JA,SA) 129
Hydrospace materials. George Sorkin and Danos H. Kallas (JH) 79
Deterioration of stainless steel regeneratively cooled thrust chambers. James K. Stanley (JSR) 329
Landing impact protection through a hybrid attenuation system. E. J. Merz, J. A. Burnes, and S. R. McClure (JSR) 879
Development of 2021 aluminum alloy propellant tanks. Warren Berger and Elliott Willner (JSR,EN) 69
Safety factors and the probability of failure in fatigue. M. P. Bieniek and J. C. Joanides (AIAA J,TN) 753
Summary of the NASA-SRI Round Robin Ablation Program. N. K. Hiester, C. F. Clark, and N. S. Vojvodich (JSR,EN) 886

Structural Composite Materials (Including Coatings)

Advanced design concepts for buckling-critical composite shell structures. L. B. Greszczuk and R. J. Miller (JA) 367
Graphite-epoxy wing for BQM-34E supersonic aerial target. Edward J. McQuillen and Shih L. Huang (JA) 480
Minimum weight design of stiffened fiber composite cylinders. Thomas P. Kicher and Tung-Lai Chao (JA) 562
Development of JT8D turbofan engine composite fan blades. S. A. Satter, H. Stargardter, and D. G. Randall (JA) 648
A finite-element analysis including transverse shear effects for applications to laminated plates. C. W. Pryor Jr. and R. M. Barker (AIAA J) 912
Buckling of stiffened multilayered circular cylindrical shells with different orthotropic moduli in tension and compression. Robert M. Jones (AIAA J) 917
Composite airframe design. D. G. Whinery, K. I. Clayton, and C. Tanis (JA) 924
Interfiber stresses in filamentary composites. Longin B. Greszczuk (AIAA J) 1274
Propagation of stress waves in fiber-reinforced composite rods. T. R. Tauchert and F. C. Moon (AIAA J) 1492
Effect of environment on the elastic response of layered composite plates. J. M. Whitney and J. E. Ashton (AIAA J) 1708
Dynamic response of an elastic cylindrical shell-solid core composite subject to time-dependent loading. John J. Ruminer and Ivor K. McIvor (AIAA J) 1991
Nonlinear vibration of simply supported angle ply laminated plates. James A. Bennett (AIAA J) 1997
Reinforced composite materials with curved fibers. Farrad Tabaddor and C. H. Chen (JSR,EN) 301
Some characteristics of laminated filamentary composites. K. S. Chu (AIAA J,TN) 1407
Wave propagation in three-layered plates. Anthony E. Armenàkas and Henry E. Keck (AIAA J,TN) 1855
Vibration of slightly curved beams of transversely isotropic composite materials. John N. Rossettos (AIAA J, TN) 2273
Symmetrical bending of multicore circular sandwich plates. Fakhruddin Abdulhadi (AIAA J,TN) 2278
Some results on a fiber-reinforced viscoelastic beam. R. Ray Nachlinger (AIAA J,TN) 2300

Optimal Structural Design

A direct search algorithm for automated optimum structural design. Michael Pappas and Chintakindi L. Amba-Rao (AIAA J) 387
Designing for combined random loads. James R. Fuller (JSR) 396
Optimization of structures based on fracture mechanics and reliability criteria. Ewald Heer and Jann-Nan Yang (AIAA J) 621
Application of fully stressed design procedures to wing and empennage structures. W. Lansing, W. Dwyer, R. Emerton, and E. Ranalli (JA) 683
Composite airframe design. D. G. Whinery, K. I. Clayton, and C. Tanis (JA) 924
Design of an astronaut-operated, lunar-surface antenna-aiming mechanism. N. S. Ajlouny and A. R. Spencer (JSR,SYN) 1009
Optimized components in frame synthesis. Lewis P. Felton and Richard B. Nelson (AIAA J) 1027
Reliability of randomly excited structures. J.-N. Yang and E. Heer (AIAA J) 1262

XUM

Optimization of complex structures to satisfy flutter requirements. Carl S. Rudisill and Kumar G. Bhatia (AIAA J) 1487

Review of SERT II power conditioning. James W. Bagwell (JSR) 225
SERT II: Solar array power system. G. A. D. Shaw and J. D. Falconer (JSR) 231
Behavior of a large nonequilibrium MHD generator. Reiner Decher, Myron A. Hoffman, and Jack L. Kerrebrock (AIAA J) 357
NERVA technology reactor integrated with NASA Lewis Brayton cycle space power systems. L. H. Boman and J. G. Gallagher (JSR) 500
Comparison of some excitation schemes for a jet MHD induction generator. Igor R. Kirillov and Edward S. Pierson (AIAA J) 570
Alternating current operation of a colloid source. W. C. Burson Jr. and P. C. Herren Jr. (JSR) 606
Performance of a large scale, nonequilibrium MHD generator with rare gases. B. Zauderer and E. Tate (AIAA J) 1136
Magnetohydrodynamic instabilities in a weakly ionized, radiating plasma. Merritt L. Hougen and James E. McCune (AIAA J) 1947
Effects of electrode size on the performance of a combustion-driven MHD generator. E. S. Rubin and R. H. Eustis (AIAA J) 1162
Ionizational and electron thermal nonequilibrium in MHD boundary layers. Donald W. Cott (AIAA J) 2404
Plane wave magnetoacoustic stability of an MHD induction machines. Richard C. Lessmann (AIAA J) 2428
Solar array degradation due to meteoroid impacts during extended planetary missions. A. J. Richardson and J. W. Warren (JSR,EN) 681
Preionization and velocity effects in MHD channels with nonequilibrium plasmas. Lajos L. Lengyel (AIAA J,TN) 745
A cascade connected electrode scheme for MHD applications. L. L. Lengyel (AIAA J,TN) 2471
Comment on "Spectroscope study of ion-neutral coupling in plasma acceleration." Denis J. Connolly and Ronald J. Sovie (AIAA J,TC) 1885
Reply by author to D. J. Connolly and R. J. Sovie. A. C. Malliaris (AIAAJ, TC) 1886

Atmospheric, Space, and Oceanographic Sciences

A study of fog clearing using a CO_2 laser. G. J. Mullaney, W. H. Christiansen, and D. A. Russell (JA) 108
Radiative transfer properties of a shocked Venus model atmosphere. H. J. Deacon Jr. and W. F. Rumpel (JSR) 177
Space station requirements and utilization. R. E. Greer and C. W. Roberts (JSR) 958
Approximate optimal atmospheric entry trajectories. Jason L. Speyer and M. Edward Womble (JSR) 1120
Interaction of solar wind with the Moon and possibly other planetary bodies. C. P. Wang (AIAA J) 1148
Laboratory simulation of the atmospheric boundary layer. J. E. Cermak (AIAA J) 1746
Lunar surface temperatures at tranquillity base. C. J. Cremers, R. C. Birkebak, and J. E. White (AIAA J) 1899
Magnetospheres of Jupiter and Saturn. James W. Heffner (AIAA J) 2422
Effective Martian sky temperatures for inclined plates. Joseph P. Wachter (JSR,EN) 191
Ocean-height measurement by satellite altimetry. J. G. Marsh and B. C. Douglas (JSR,EN) 543
A system analysis of applications of Earth orbital space technology to selected cases in water management and agriculture. A. H. Muir (JSR,EN) 675
Astrobee D: An advanced technology meteorological rocket vehicle. R. B. Jenkins, J. P. Taylor, T. P. Browne, and L. A. Briggs (JSR,EN) 895
Pressure change accompanying mixing of two ideal gases. J. R. O'Loughlin (JSR,EN) 898
Determination of gravity at Apollo 14 landing site. Joseph St. Amand and Kenneth R. Goodwin Jr. (JSR,EN) 905
Acoustics: A new approach for monitoring the environment near airports. D. W. Beran (JA,EN) 934
An advanced upper atmosphere meteorological sounding facility. A. A. Duff (JSR,EN) 998
Water and oxygen particles in space from Apollo missions. Ravi D. Sharma, M. L. Kratage, and A. C. Buffalano (JSR,EN) 1230
Solar electron temperatures and x-ray flare activity. D. M. Horan and R. W. Kreplin (AIAA J,TN) 1634

Navigation, Control, and Guidance Theory

Optical crossed-beam measurements of turbulence intensities in a subsonic jet shear layer. M. Y. Su and F. R. Krause (AIAA J,SYN) 2113
Aircraft elastic mode control. Robert L. Swaim (JA,SA) 65
Optimal desaturation of momentum exchange control systems. C. D. Johnson and R. E. Skelton (AIAA J) 12
Coordinate system influence on the regularized trajectory optimization problem. J. M. Lewallen, O. A. Schwausch, and B. D. Tapley (JSR) 15
Identification of stochastic linear dynamic systems using Kalman filter representation. Raman K. Mehra (AIAA J) 28
A simplified Kalman estimator for an aircraft landing display. Robert B. Merrick (JA) 44
Approach guidance to circular flight paths. F. H. Kishi and I. Pfeffer (JA) 89
Optimum horizontal guidance techniques for aircraft. Heinz Erzberger and Homer Q. Lee (JA) 95
Turning characteristics and control of submerged and floating vehicles. Allen G. Lindgren and Brian N. Belanger (JH) 118
Minimum time turns for a supersonic airplane at constant altitude. J. Karl Hedrick and Arthur E. Bryson Jr. (JA) 182
Sequential estimation of the state and the observation-error covariance matrix. Byron D. Tapley and George H. Born (AIAA J) 212
Flight path optimization with multiple time scales. Henry J. Kelley (JA) 238
Constrained gain problem and its application to aircraft control systems. S. J. Asseo (JA) 241
An identification algorithm that is insensitive to initial parameter estimates. Dallas G. Denery (AIAA J) 371
Magnetic compensation of a gravity-gradient stabilized satellite. D. L. Klinger, M. G. Lyons, E. D. Scott, and J. J. Rodden (JSR) 435
Combined inertial—ILS aircraft navigation systems. James W. Burrows (JA) 439
A magnetic attitude control system for an axisymmetric spinning spacecraft. John A. Sorensen (JSR) 441
Semipassive and active nutation dampers for dual-spin spacecraft. D. L. Mingori, J. A. Harrison, and G. T. Tseng (JSR) 448
Optimum complementation of VOR/DME with air data. Norbert B. Hemesath (JA) 456
Optimal station-keeping at collinegr points. Edward A. Euler and E. Y. Yu (JSR) 513
Seeking a new precision approach and landing system—A test of maturity. Siegbert B. Poritzky (JA) 538
Equations of motion of flexible spacecraft. Philip B. Grote, John C. McMunn, and Rafael Gluck (JSR) 561
Stable limit cycles due to nonlinear damping in dual-spin spacecraft. Peter W. Likins, Gan-tai Tseng and D. Lewis Mingori (JSR) 568
Generalized multistep methods for second-order equations and applications to orbit computation. James Dyer and Mohan Ananda (AIAA J) 614
Optimum mixing of inertial navigator and position fix data. Walter M. Hollister and Michel Claude Brayard (JA) 698
Nutation damping and vibration isolation in a flexibly coupled dual-spin spacecraft. C. K. Cretcher and D. L. Mingori (JSR) 817

A pilot-vehicle systems approach to longitudinal flight director design. D. T. McRuer, D. H. Weir, and R. H. Klein (JA) 890
Optimal interplanetary trajectories for chemically propelled spacecraft. George A. Hazelrigg Jr. (JSR) 915
Optimal transition from entry to cruising flight. Robert F. Stengel (JSR) 1126
Low-thrust mission analysis using an analytical trajectory optimization model. P. M. Lion, A. L. Kornhauser, and G. A. Hazelrigg Jr. (AIAA J) 1170
An approximate method for nonlinear ordinary differential equations. Tsai-Chen Soong (AIAA J) 1175
Empirical Bayes estimation of observation error variances in linear systems. Harry F. Martz, Jr. and George H. Born (AIAA J) 1183
Position-required and its application to guidance problems. Jack D. Culbertson (AIAA J) 1188
SMART—A three-axis stabilized attitude reference technique. Paul R. Rupert (JSR) 1195
The critical dynamic errors of a strapdown guidance system. D. Sargent and H. Zarett (JSR) 1208
An analytic solution for constant-thrust, optimal-coast, minimum-propellant space trajectories. A. L. Kornhauser, P. M. Lion, and G. A. Hazelrigg (AIAA J) 1234
Suboptimal control of linear systems derived from models of lower dimension. R. O. Rogers and D. D. Sworder (AIAA J) 1461
Effect of collisions on cold ion collection by means of Langmuir probes. C. H. Shih and E. Levi (AIAA J) 1673
An experimental study of the cylindrical Langmuir probe response in the transition regime. R. H. Kirchhoff, E. W. Peterson, and L. Talbot (AIAA J) 1686
A method for the Liapunov stability analysis of force-free dynamical systems. Leonard Meirovitch (AIAA J) 1695
Experiments with two flow-swallowing enthalpy probes in high-energy supersonic streams. Lewis A. Anderson and Robert E. Sheldahl (AIAA J) 1804
Reactive stream separation photography. D. T. Campbell, S. D. Clapp, R. L. Proffit, and G. L. Cline (AIAA J) 1832
Theory of a cooled spherical electrostatic probe in a continuum gas. Robert L. Chapkis and Eric Baum (AIAA J) 1963
A parameter dependent spacecraft guidance boundary value problem. P. J. Cefola and C. N. Shen (AIAA J) 1975
Theoretical and experimental study of piston gas-heating with laminar energy losses. Stellan Knöös (AIAA J) 2119
A modified perturbation method for solving optimal control problems with state variable inequality constraints. W. E. Williamson and B. D. Tapley (AIAA J) 2222
Matched asymptotic solutions for optimum lift controlled atmospheric entry. Yun-Yuan Shi (AIAA J) 2229
Cuspidal point on the primer locus. N. X. Vinh (AIAA J) 2239
Determination of the collision parameters by means of Langmuir probes. C. H. Shih and E. Levi (AIAA J) 2417
A combined parallel-tangents/penalty-function approach to solving trajectory-optimization problems. Peter J. Wong, Robert M. Dressler, and David G. Luenberger (AIAA J) 2443
Control surface pumping—A pilot's technique for controlling the flight path precisely. William Bihrle Jr. (JA,EN) 56
Ratio of turbulent flight miles to total flight miles in the altitude range 45,000-65,000 ft. Edward V. Ashburn and David E. Waco (JA,EN) 127
An exact differential method to determine Liapunov stability. M. A. Rahman (AIAA J,TN) 186
Nonlinear proportional navigation and the minimum time-to-turn. A. G. Rawling (JSR,EN) 198
Construction of a Liapunov function in the critical case. J. R. Weiss and E. Y. Yu (AIAA J,TN) 522
Asymptotic behavior of the Kalman filter with exponential aging. R. W. Miller (AIAA J,TN) 537
Suboptimal linear filtering with a limited state. John R. Hatfield, Donald Rockwell, and Paul Abramson (AIAA J,TN) 747
Inequality constraints in primer-optimal, N-impulse solutions. D. J. Jezewski and N. L. Faust (AIAA J,TN) 760
An optimal, analytic solution to the linear-gravity, constant-thrust trajectory problem. Donald J. Jezewski (JSR,EN) 793
Stability of a model reference control system. D. J. G. James (AIAA J,TN) 950
Computation of Chebycheff optimal control. Gerald J. Michael (AIAA J,TN) 973
A new guidance system figure-of-merit. George R. Young (JSR,EN) 1103
Rocket guidance with a steering angle-rate constraint. Paul A. Meschler (JSR,EN) 1167
Optimal intercept guidance for short-range tactical missiles. Ronald G. Cottrell (AIAA J,TN) 1414
Empirical Bayes state estimation in discrete time linear systems. H. F. Martz Jr. and S. J. Kamat (AIAA J,TN) 1654
A generalized quadrature formula for Cauchy integrals. Valter J. E. Stark (AIAA J,TN) 1854
Linear system stability via Liapunov's direct method and the square integral. Lee Rosenthal (AIAA J,TN) 1858
Allen and Vincenti blockage corrections in a wind tunnel. C. Dalton (AIAA J,TN) 1864
Measurements of the duration of constant reflected-shock temperature in a reflected-shock tunnel. D. J. Monson (AIAA J,TN) 1872
Mass flow rate measurements in a heterogeneous medium. R. F. Davey (AIAA J,TN) 1874
Stability test for a related Routh-Hurwitz problem. Bertrand T. Fang (AIAA J,TN) 1881
Molecular beam extraction from equilibrium gas flows. Ulf Bossel (AIAA J,TN) 2060
A higher performance electric-arc-driven shock tube. Wesley A. Menard (AIAA J,TN) 2090
Use of polynominal approximations to calculate suboptimal controls. W. E. Williamson (AIAA J,TN) 2271
An analytical method for real gas tailoring in a shock tube. N. M. Reddy (AIAA J,TN) 2458
A wake-blockage paradox in a perforated wall wind tunnel. M. Mokry (AIAA J,TN) 2462
Skin-friction measurement in flow with pressure gradient. R. G. Bradley and A. R. Mann (AIAA J,TN) 2470
Comment on "A practical nondiverging filter." J. E. Sacks and H. W. Sorenson (AIAA J,TC) 767
——Reply by authors to J. E. Sacks and H. E. Sorenson. Tzyh Jong Tarn and John Zaborszky (AIAA J,TC) 767
Comments on "Optimal controls for out-of-plane motion about the translunar libration point." Robert W. Farquhar (JSR,TC) 815
——Reply by author to R. W. Farquhar. T. A. Heppenheimer (JSR,TC) 816
Comments on "Study of nonlinear systems." Iwao Sugai (AIAA J,TC) 990
Extension of angle-only state-determination to curvilinear coordinates. Alan M. Schneider (JSR,TC) 1238
Comment on "Spectroscopic study of ion-neutral coupling in plasma acceleration. Denis J. Connolly and Ronald J. Sovie (AIAA J,TC) 1885
Reply by author to D. J. Connolly and R. J. Sovie. A. C. Malliaris (AIAAJ, TC) 1886

Research Facilities and Instrumentation

A 12 Mw, 200 atm arc heater for re-entry testing. James H. Painter and Ronald J. Ehmsen (AIAA J, SYN) 2307
Remote sensing of sea conditions with microwave radio-meter systems. J. C. Aukland, P. J. Caruso, Jr., and W. H. Conway (JH) 15
Worldwide oceanic wind and wave predictions using a satellite radar-radiometer. Richard K. M. Moore and Willard J. Pierson Jr. (JH) 52
Starting phenomena in a supersonic tube wind tunnel. J. A. Johnson III and D. Cagliostro (AIAA J) 101
High-pressure high-enthalpy test facility. E. R. Pugh, R. M. Patrick, and A. M. Schneiderman (AIAA J) 200
Obtaining nonlinear aerodynamic stability coefficients from free-angular motion of rigid bodies. Charles W. Ingram and John D. Nicolaides (JSR) 390
A deterministic steady-state error model for floated inertial gyroscope. Robert H. Wilkinson (JSR) 399
Accelerometer calibration in the low-g range by means of mass attraction. Konrad Reinel (JSR) 777
Measurement and analysis of pilot scanning behavior during simulated instrument approaches. David J. Weir and Richard H. Klein (JA) 897
Methods for the wind-tunnel measurement of unsteady nonlinear aerodynamic forces. Michael Judd (AIAA J) 1302
Application of hot-wire anemometry and digital techniques to measurements in a turbulent helium jet. John Way and Paul A. Libby (AIAA J) 1567
Laboratory simulation of the atmospheric boundary layer. J. E. Cermak (AIAA J) 1746
Hot-wire anemometry in low-density flows. E. M. Schmidt and R. J. Cresci (AIAA J) 2019
An electrostatic probe technique for determining the effectiveness of plasma alleviants. T. Luzzi and R. Jenkins (AIAA J) 2411
Vibration analysis by differential holographic interferometry. R. Aprahamian and D. A. Evensen (AIAA J,TN) 186
A heated wire device for shock tube diaphragm bursting. M. R. Davis (AIAA J,TN) 190
Supersonic molecular beams with cycling-pressure sources. W. S. Young, W. E. Rodgers, C. A. Cullian, and E. L. Knuth (AIAA J,TN) 323
A shielded fine-wire probe for rapid measurement of total temperature in high-speed flows. Leonard M. Weinstein (JSR,EN) 425
Optical technique for the measurement of local velocities in single-and two-phase flowfields. R. J. Burick, G. L. Cline, and R. N. Gurnitz (JSR,EN) 529
Inclination of pressure orifices in low-density flow. K. Kienappel (AIAA J,TN) 749
Human factors study of keyboards for cockpit data entry. C. A. Fenwick and H. M. Schweighofer (JA,EN) 936
Influence of film thickness on the calibration of thin-film-gage backing materials. Ronald K. Hanson (AIAA J,TN) 975
Use of hot wires in low-density flows. G. P. D. Rajasooria and C. L. Brundin (AIAA J,TN) 979

XUM

A new wind-tunnel technique for providing simulation of flight base flow. J. C. Y. Koh (JSR,EN) 1095
Absolute velocity determination in a hypersonic low-density flow. K. A. Bütefisch (AIAA J,TN) 1639
A high-performance shock tube with air driver. R. J. Storker, G. J. Healey, D. W. M. Kerr, and J. G. Bennett (AIAA J, TN) 1646
Probe geometry effects on turbulent plasma diagnostics. A. K. Ghosh and C. Richard (AIAA J,TN) 2104

Aerospace Technology Utilization

Project delphi—Technical aid to the developing nations by consulting services satellite. R. G. Pay (JSR) 847
Frequency stability characteristics and stabilization techniques in an SSB-FDMA/PhM multiple access system. S. J. Andrzejewski (JSR) 977
Aerodynamic design of a land speed record car. T. P. Torda and Thomas A. Morel (JA) 1029
Ocean-height measurement by satellite altimetry. J. G. Marsh and B. C. Douglas (JSR,EN) 543
Reduction of tractor-trailer cross-wind response. Roger J. Hawks (JA,EN) 583
A system analysis of applications of Earth orbital space technology to selected cases in water management and agriculture. A. H. Muir (JSR,EN) 675

Computer Technology and Computer Simulation Techniques

Computer-aided wiring and cabling design as applied to aircraft avionics systems. W. J. Balchunas (JA) 50
Use of ground based simulators in aircraft design. P. G. Dillenschneider and A. W. Shaw (JA) 113
Human perception of angular acceleration and implications in motion simulation. J. D. Stewart (JA) 248
Design of a dual wide-angle visual cue simulator. J. L. Copeland, W. M. Kahlbaum Jr., L. E. Barker Jr., G. G. Steinmetz, and R. D. Grove (JA) 374
Requirements in simulators used in handling qualities research. J. T. Gallagher (JA) 917
A parameter dependent spacecraft guidance boundary value problem. P. J. Cefola and C. N. Shen (AIAA J) 1975
Airplane economic design evaluation (AEDE) computerized model and its application. Howard D. Ramlow and Richard M. Thatcher (JA,EN) 576
Interpretation of n-dimensional covariance matrices. I. A. Gura and R. H. Gersten (AIAA J,TN) 740
Nonorthogonal coordinates. R. C. K. Lee (AIAA J,TN) 1409
Oscillations in digital control systems. Charles L. Phillips, John C. Johnson, and Darrel L. Chenoweth (AIAA J,TN) 2106

Checkout Systems

Selection and evaluation of AIDS for aircraft nonavionics subsystems. H. R. Wulff (JA) 312
Apollo spacecraft certification test program. J. H. Levine and P. E. Fitzgerald Jr. (JSR,EN) 677
An improved method for accelerometer precision centrifuge test data reduction. Theodore C. Maier (JSR,EN) 686

Aerospace Management

Law, History, Policy, and Sociology

Reliability, Quality Control, and Maintainability

Safety

Unperturbed multiple elliptical orbit re-entry of isotopic heaters. Arthur W. Barsell (JSR,EN) 1235

Lasers

Kinetic processes in noble gas ion lasers: A Review. Shao-Chi Lin and Chuan-Cheng Cheŋ (AIAA J,SA) 4
Population inversions behind normal shock waves. John D. Anderson Jr. and Michael T. Madden (AIAA J,TN) 1630

Information for Contributors to Journals of the AIAA

General Requirements: Send all manuscripts, with covering letter, to the Managing Editor, AIAA Scientific Publications, 1290 Avenue of the Americas, New York, N. Y. 10019. Each manuscript must be accompanied by written assurance as to security clearance in the event the subject matter lies in a classified area or if the paper originates under government sponsorship. Full responsibility rests with the author. Signed assurance must be given that the manuscript or its equivalent *has not been submitted for publication elsewhere*. The AIAA has prior publication rights to any paper presented at its meetings, but preprints will be considered for publication only if the author requests it. All manuscripts must be as *brief and concise* as proper presentation of the ideas will allow.

Send 3 complete copies of each manuscript and 3 sets of figures. The manuscript must be in English, typed *double spaced* on one side of the page only, with wide margins to allow for editorial instructions. Footnotes, references, and figure captions also should be typed double spaced. Use standard-size ($8\frac{1}{2} \times 11$-in.) good-quality bond paper.

Synoptics: Alternatively, and at his option, an author may submit a Synoptic. Many subjects can be covered in a more useful and economical form for the majority of readers as a Synoptic, not exceeding 8 double-spaced typed pages (2 journal pages), with two major headings: *Theme*, which describes the purpose of the papers; the *Contents*, which is a concise but self-sufficient presentation of the key results in a form that readers can use without having to consult the full paper. Prior work and details of methodology generally may be omitted, but a few key references may be cited for important related work. Make a serious effort to write the Synoptic so that it is understandable to the general engineering community by replacing specialist jargon terms and acronyms with terms that the nonspecialist can understand. Where a device is the subject of the paper, a simple line diagram showing those elements being discussed in the Synoptic should be given. Coordinates should be shown on the diagram when pertinent, and symbols appearing in the tables and graphs of the Synoptic should be defined. Information should be given in tabular form rather than in prose when this simplifies the presentation and expedites comprehension. The relation of the author's contribution to the state-of-the-art should be indicated briefly.

If you have submitted a full paper, the Editors may request you to prepare a Synoptic for review instead. A Synoptic must still be accompanied by a full paper, preprint or company report for verification. If the Synoptic is published, the back-up paper or preprint will be available from The National Technical Information Service or the AIAA Library (to be cited in a footnote on first page of Synoptic), where it will be available to readers who wish to purchase copies.

Full-Length Papers: In terms of standard-size *double-spaced* typed pages, the maximum length for full-length papers is 36 pages (including equations), where each normal-sized figure counts as one page. If a figure has several parts, each part counts as one page. Greater length usually will be unacceptable and may be the basis for return of the paper to the author for reduction prior to review.

Abstract: Each full-length paper must be accompanied by a 100- to 200-word abstract, written as a single paragraph. It should be a summary (not an introduction!) and complete in itself (no numerical references). The abstract should indicate the subject dealt with in the paper and should state the objectives of the investigation. Newly observed facts and conclusions of the experiment or argument discussed in the paper must be stated in summary form. Readers should not have to read the paper to understand the abstract.

Introduction: The paper also must include an Introduction—a brief assessment of prior work by others and an explanation of how the paper contributes to the field.

Technical (or Engineering) Notes and Technical Comments: Short manuscripts, not exceeding one quarter the length stated for a full paper, may qualify for publication in one of these categories. *Notes* are intended for prompt disclosures of new, significant data or developments of limited scope. *Comments* should relate to papers previously published by AIAA. These categories are reviewed only by an editor and usually are published several months sooner than a full paper or Synoptic.

Titles and Authors' Names: The title should be brief and concise. The author's name should be typed on the line below the title, and it is preferable to use the full name. The company affiliation should follow on the next line, with the author's official title given in a footnote. This applies to all categories of papers.

Mathematics: Equations and symbols may be handwritten or typewritten; clarity is essential. If handwritten, be sure that a reader can distinguish between capital and lower case letters; the letter o and zero; ell, the number one, and prime; k and kappa; u and mu, v and nu, n and eta. Always use the *solidus* for fractions in the text and for simple fractions in displayed equations.

References: References are to be grouped at the end of the manuscript and are to be given as follows:

1) Journals: Walker, R. E., Stone, A. R., and Shandor, M., "Secondary Gas Injection in a Conical Rocket Nozzle," *AIAA Journal*, Vol. 1, No. 2, Feb. 1963, pp. 334–338.

2) Books: Turner, M. J., Martin, H. C., and Leible, R. C., "Further Development and Applications of Stiffness Method," *Matrix Methods of Structural Analysis*, 1st ed., Vol. 1, Macmillan, New York, 1964, pp. 203–206.

Segrè, E., ed., *Experimental Nuclear Physics*, 1st. ed., Vol. 1, Wiley, New York, 1953, pp. 6–10.

3) Reports: Book, E. and Bratman, H., "Using Compilers to Build Compilers," SP-176, Aug. 1960, Systems Development Corp., Santa Monica, Calif.

4) Transactions/Proceedings: Soo, S. L., "Boundary Layer Motion of a Gas-Solid Suspension," *Proceedings of the Symposium on Interaction between Fluids and Particles*, Institute of Chemical Engineers, Vol. 1, 1962, pp. 50–63.

Always give inclusive page numbers for references to journal articles and a page or chapter number for books. Each reference must be cited in the text.

Illustrations: Line drawings must be clear and sharp. Use black ink on white paper or tracing cloth. Lettering should be large enough to be legible (at least $\frac{1}{16}$ in. high) after reduction. Plan figures for reduction to column width ($3\frac{1}{4}$ in.). Photographs should be glossy prints, not matte or semimatte. Each figure must have a caption; captions should be listed on a separate sheet. Write your name and the figure number in the margin of each figure. Cite each figure in numerical order in the text.

Tables: Type a double rule at the top and bottom of each table and a single rule under the column headings. Table footnotes should be placed under the final double rule and should be indicated by letters, a, b, c, etc. Do not number table footnotes consecutively with text references. Each table must have a number and a caption. Cite each table in numerical order in the text.

Symbols and Units: Use standard symbols whenever possible, preferably those recommended by the American Standards Association. The metric or dual system of units (metric and English) should be used, wherever possible, in accordance with an endorsement by the AIAA Board of Directors. Although such use is not mandatory, authors are urged to comply.

SAVE ON JOURNAL COSTS

These four journals of the AIAA are available to members at exceptionally low costs.

***AIAA JOURNAL*—Regularly $60 per year, member price just $14**

Each month the AIAA Journal carries authoritative and lasting contributions on fundamental research in your specialty—new ideas, complete treatments, recent data, and fundamental reviews emphasizing basic research and exploratory developments in all aerospace fields.

***JOURNAL OF SPACECRAFT AND ROCKETS*—Regularly $50 per year, for members just $12**

The Journal of Spacecraft and Rockets carries authoritative articles on space technology—basic engineering systems studies and advances. *Monthly* issues contain timely engineering notes in propulsion, power systems, life systems, guidance, material, and all other disciplines in the space flight field—plus an average of 17 articles.

***JOURNAL OF AIRCRAFT*—Nonmembers pay $40 yearly, your cost only $10**

The Journal of Aircraft provides informative professional articles on current aeronautical engineering topics and special reviews on the technological, operational, and design problems of military and commercial aircraft and ground effect vehicles. This basic journal publishes up to a dozen full-length articles monthly plus engineering notes of current interest to aeronautical engineers.

***JOURNAL OF HYDRONAUTICS*—$12 a year for nonmembers, $4 for you**

The Journal of Hydronautics carries significant articles that contribute to the advancement of science and engineering concerning all types of marine craft, installations, and instrumentation. Launched in July, 1967, the *Journal of Hydronautics* deals with the hydromechanics of propulsion, the stability and control of surface vessels and submersibles, and methods for providing mobility and habitation in water. *Published semiannually.*

higher-order terms in a series...

Volume 24 and subsequent volumes in the series *Progress in Astronautics and Aeronautics*, sponsored by the American Institute of Aeronautics and Astronautics, are published by The MIT Press. Individuals and institutions who place a standing order for this series will be granted a discount of 20%.

Martin Summerfield is Series Editor.

Published in 1971:

Volume 24
Heat Transfer and Spacecraft Thermal Control
edited by John W. Lucas
$20.00

Volume 25
Communication Satellites for the 70's: Technology
edited by Nathaniel E. Feldman and Charles M. Kelly
$18.50

Volume 26
Communication Satellites for the 70's: Systems
edited by Nathaniel E. Feldman and Charles M. Kelly
$18.95

Published or to be published during the first half of 1972:

Volume 27
Thermospheric Circulation
edited by Wilis L. Webb
Fred L. Whipple writes in his foreword to this book that "not only the meteors but almost all of the phenomena studied in this important volume are interface phenomena, partly or wholly arising from external radiation or particles from space impinging on our own private space ship, the Earth."

The papers included are focused on the physical processes that form the structure of the base of the thermosphere and on the meteor trail radar observational technique for extending synoptic meteorological exploration into the thermospheric region.

Synoptic exploration of the upper atmosphere has proceeded rapidly during the past decade. Two experimental methods are most prominent in this work — the radar tracking of the ionization tracks of meteors and soundings with physical probes carried by high-altitude research rockets. The results obtained from these methods have demonstrated that the upper atmosphere is meteorologically active; the prior assumption was that this region was quiescent and neutral.
$14.95

Volume 28
Thermal Characteristics of the Moon
edited by John W. Lucas
The papers included in this volume were especially prepared to bring to the attention of the scientific community the important discoveries that have been made in recent times concerning the thermal characteristics of the moon. From a knowledge of the thermal characteristics, deductions concerning lunar structure and the history of the formation of the moon are facilitated. Written by leading lunar and thermal authorities, the papers are grouped into four parts, covering measurements made from earth, measurements made on the moon, studies of material brought to earth from the moon, and an overall historical survey of the moon's interior from a thermal standpoint.
$17.50 est.

Volume 29
Spacecraft Thermal Design
edited by John W. Lucas
$20.00 est.

The MIT Press
Massachusetts Institute of Technology
Cambridge, Massachusetts 02142
